## Self And Substance In Leibniz:

Self and Substance in Leibniz Marc Elliott Bobro, 2006-01-16 There is a close connection in Gottfried Wilhelm Leibniz's mind between the notions of self and substance R W Meyer in his classic 1948 text *Leibniz and the Seventeenth Century* Revolution writes that the monad is nothing but a representation in both senses of the French word of Leibniz's personality in metaphysical symbols and there was under contemporary circumstances no need to introduce this concept apart from propounding it It is not clear what Meyer means here except that from the consideration of his own self in some way Leibniz comes to his concept of simple substance or monad Herbert Carr in an even earlier work notes that Leibniz held that the only real unities in nature are formal not material and for a long time Leibniz was content to call the formal unities or substantial forms he was speaking about souls This had the advantage that it referred at once to the fact of experience which supplies the very type of a substantial form the self or ego Finally Nicholas Rescher in his usual forthright manner states that in all of Leibniz's expositions of his philosophy the human person is the paradigm of a substance

**Leibniz's Metaphysics** Christia Mercer, 2001-11-19 This book offers a major reassessment of Leibniz's metaphysics Christia Mercer has exposed the underlying doctrines of Leibniz's philosophy By analysing Leibniz's early works she demonstrates that the metaphysics of pre-established harmony developed many years earlier than previously believed and for reasons which have not been understood As a result of this analysis she has unearthed a philosophical school that Leibniz scholars have not recognized A much deeper understanding of some of Leibniz's key doctrines emerges Moreover since the Leibniz that is revealed here does not fit neatly into the standard accounts of the history of philosophy and science Christia Mercer's study will prompt scholars to reconsider their basic assumptions about early modern philosophy and science

Leibniz's Naturalized Philosophy of Mind Larry M. Jorgensen, 2019-02-21 Larry M Jorgensen provides a systematic reappraisal of Leibniz's philosophy of mind revealing the full metaphysical background that allowed Leibniz to see farther than most of his contemporaries In recent philosophy much effort has been put into discovering a naturalized theory of mind Leibniz's efforts to reach a similar goal three hundred years earlier offer a critical stance from which we can assess our own theories But while the goals might be similar the content of Leibniz's theory significantly diverges from that of today's thought Perhaps surprisingly Leibniz's theological commitments yielded a thoroughgoing naturalizing methodology the properties of an object are explicable in terms of the object's nature Larry M Jorgensen shows how this methodology led Leibniz to a fully natural theory of mind

**Causality and Mind** Nicholas Jolley, 2013-11 This text presents 17 of Nicholas Jolley's essays on early modern philosophy They focus on two main themes the debate over the nature of causality and the issues posed by Descartes' innovations in the philosophy of mind Together they show that philosophers in the period are systematic critics of their contemporaries and predecessors

**Self and Sensibility** Udo Thiel, 2024-12-02 This volume collects 19 of the author's essays on eighteenth century accounts of self consciousness personal identity and related issues covering over a hundred years of a philosophical debate that has shaped

the way in which these topics are discussed today After a detailed analysis of the seventeenth century background the essays analyze and critically evaluate French British and German contributions ranging from Claude Buffier early in the century to Kant and aspects of the Post Kantian debate The essays deal with a large number of diverse sources including the views and arguments of well known philosophers such as Hume and Kant as well as lesser known thinkers such as LeLarge de Lignac and Thomas Cooper organized around four partly overlapping main themes a the self and its identity as a matter of a special feeling sentiment intime Selbstgef hl in thinkers such as Condillac Rousseau and Feder b materialist treatments of these issues in for example Priestley and Hi mann c Scottish Common Sense accounts with a special focus on Reid and d Kant s analysis and the philosophical context in which it was developed with a particular emphasis on the German debate Wolff and his critics Lossius Tetens and others *Hegel's Grand Synthesis* Daniel Berthold-Bond,1989-01-01 This book offers the first genuinely systematic treatment of Hegel s eschatology in the literature It is an investigation into Hegel s project to demonstrate the ultimate unity of thought and being consciousness and reality self and world The author traces the project through Hegel s epistemology metaphysics and philosophy of history The grand synthesis creates a basic tension an ambivalence that reaches its most acute formulation in Hegel s eschatological language of a final completion or fulfillment of history This conflicts with his dialectic and Heraclitian metaphysics of becoming Berthold Bond concludes that a substantially new approach to Hegel s eschatology is needed **Leibniz's Monadology** Lloyd Strickland,2014-09-10 Lloyd Strickland presents a new translation of the Monadology alongside key parts of the Theodicy and an in depth section by section commentary that explains in detail not just what Leibniz is saying in the text but also why he says it

Transformation of the Self in the Thought of Schleiermacher Jacqueline Mariña,2008-04-24 The philosopher s stone The principle of individuation Personal identity The world is the mirror of the self The highest good Individual and community Transformation of the self through Christ Outpourings of the inner fire experiential expressivism and religious pluralism

The Scottish Review ,1890 **Nietzsche's Metaphysics of the Will to Power** Tsarina Doyle,2018-02-15 Nietzsche s controversial will to power thesis is convincingly rehabilitated in this compelling book Tsarina Doyle presents a fresh interpretation of his account of nature and value which sees him defy the dominant conception of nature in the Enlightenment and overturn Hume s distinction between facts and values Doyle argues that Nietzsche challenges Hume indirectly through critical engagement with Kant s idealism and that in so doing and despite some wrong turns he establishes the possibility of objective value in response to nihilism and the causal efficacy of consciousness as a necessary condition of human autonomy Her book will be important for scholars of Nietzsche s metaphysics and of the history of philosophy and science more generally **Earthly Paradise** Milad Doueihi,2009 Paradise has shaped our poetic and religious imagination and informed literary and theological accounts of man s relation with his creator with language and history Doueihi contemplates the philosophical reception and uses of Paradise marked by the rise of critical and historical methods in the

*Ideas and Mechanism* Margaret Dauber Wilson, 2014-07-14 For more than three decades Margaret Wilson's essays on early modern philosophy have influenced scholarly debate Many are considered classics in the field and remain as important today as they were when they were first published Until now however they have never been available in book form and some have been particularly difficult to find This collection not only provides access to nearly all of Wilson's most significant work but also demonstrates the continuity of her thought over time These essays show that Wilson possesses a keen intelligence coupled with a fearlessness in tackling the work of early modern philosophers as well as the writing of modern commentators Many of the pieces collected here respond to philosophical issues of continuing importance The thirty one essays gathered here deal with some of the best known early philosophers including Descartes Leibniz Locke Spinoza and Berkeley As this collection shows Wilson is a demanding critic She repeatedly asks whether the philosophers arguments were adequate to the problems they were trying to solve and whether these arguments remain compelling today She is not afraid to engage in complex argument but at the same time her own writing remains clear and fresh *Ideas and Mechanism* is an essential collection of work by one of the leading scholars of our era
