## **Self In The Family A Classification Of Personality Criminality And Psychopathology:**

*The Self in the Family* Luciano L'Abate, 1997-01-07 In his acclaimed book *A Theory of Personality Development* Luciano L'Abate introduced a revolutionary theory of personality development and functioning that departed radically from traditional theories In place of hypothetical traits existing in an empirical vacuum Dr L'Abate offered an image of observable interpersonal competencies functioning within the basic contexts of home work leisure and the marketplace Central to his theory was a developmental model that posited the family as the primordial setting in which propensities are formed and behavior patterns set By defining personality in terms of the growth and interplay of interpersonal competencies the L'Abate theory provided an epistemologically and empirically sound basis for understanding personality function and dysfunction as corollaries and extensions of one another In *The Self in the Family* Luciano L'Abate and Margaret Baggett again break new ground by expanding the L'Abate theory of personality development to encompass criminal and psychopathological behavior Drawing upon mounting empirical evidence that the family paradigm is the major determinant of personality socialization throughout the life span the authors develop a selfhood model with demonstrable links between the three domains of personality function criminality and psychopathology With the help of the model they show how it is now possible to arrive at a personality based interpretation of most deviant behaviors including criminality psychopathology addictions and even psychosomatic illnesses and they describe various preventive and psychotherapeutic applications for this expanded theory of family based personality development The authors further elaborate on the theories developed in Dr L'Abate's previous books by introducing the core concepts of hurt the basic feeling underlying much of personality functioning and dysfunctioning and a continuum of likeness the fundamental determinant of interpersonal choices and behavior in friendships parent child relations and marital relations Offering an empirically rigorous developmentally based unified field theory of personality function criminality and psychopathology *The Self in the Family* is essential reading for developmental and clinical psychologists family therapists personality theorists and criminality and psychopathology researchers
