Self Person World:

The Eschatological Person Andrew T. J. Kaethler, 2022-07-12 Both Alexander Schmemmann and Joseph Ratzinger insist that the human person remains shrouded in mystery without God's self disclosure in the person of Jesus Christ. Like us, Jesus lived in a particular time and location and therefore time and temporality must be part of the ontological question of what it means to be a human person. Yet Jesus, the one who has time for us, ascended to the Father and the bride of Christ awaits his return and therefore time and temporality are conditioned by the eschatological. With this in mind, the ontological question of personhood and temporality is a question that concerns eschatology: how does eschatology shape personhood? Bringing together Schmemmann and Ratzinger in a theological dialogue for the first time, this book explores their respective approaches and answers to the aforementioned question. While the two theologians share much in common, it is only Ratzinger's relational ontological approach that, by being consistently relational from top to bottom, consistently preserves the meaningfulness of temporal existence.

The Psychology of Personhood Jack Martin, Mark H. Bickhard, 2012-11-29 What is a person? Surprisingly little attention is given to this question in psychology. For much of the past century, psychology has tended to focus on the systematic study of processes rather than on the persons who enact and embody them. In contrast to the reductionist picture of much mainstream theorising, which construes persons as their mental lives, behaviours, or neurophysiological particulars, *The Psychology of Personhood* presents persons as irreducibly embodied and socially situated beings. Placing the study of persons at the centre of psychology, this book presents novel insights on the typical everyday actions and experiences of persons in relation to each other and to the broader society and culture. Leading scholars from diverse academic disciplines paint an integrative portrait of the psychological person within evolutionary, historical, cultural, developmental, and everyday contexts.

Persons — What Philosophers Say about You Warren Bourgeois, 2006-01-01 Can a person suffer radical change and still be the same person? Are there human beings who are not persons at all? Western philosophers from the ancient Greeks to contemporary thinkers gave the concept of person great importance in their discussions. They saw it as crucial to our understanding of our world and our place in it. Prompted by tragedy—a loved one's descent into dementia—Warren Bourgeois explored Western philosophical ideas to discover what constitutes a person. The first edition of *Persons: What Philosophers Say About You* was the result of his search. This new second edition focuses on making this material easily available and accessible to students and has been redesigned as an introduction to the philosophy of mind and its history, concentrating on the central concept of person in contemporary controversies concerning abortion, euthanasia, genetic engineering, and human rights. Bourgeois has mined Western philosophy for ideas students can apply today as technology challenges their beliefs about what we are. He then uses the concept of person to unite the various subdivisions of philosophy, applying theories of knowledge, reality, and value to help students understand what we believe about ourselves. The result is a living philosophy and an introductory text with a difference. While the ideas of the great philosophers cannot

be meaningfully summarized in one introductory text this book provides a comparison of what many of them say about the concept of person and will encourage students to read further *Poetic Epistemologies* Megan Simpson,2000-01-27

dialogue between the psychological basis of person centred therapy and its application within the real world As well as psychology students it will be of interest to those from other disciplines counselling trainees those within the caring professions and person centred therapists from a non psychological background Ewan Gillon is Director of The Edinburgh Psychology Centre and Lecturer in Counselling Psychology at Glasgow Caledonian University **The Complete Guide to Behavioural Change for Sport and Fitness Professionals** Sarah Bolitho,Debbie Lawrence,Elaine McNish,2013-07-01 Written by fitness and sport professionals for fitness and sport professionals this is a key text for anybody working with clients who knows that the biggest roadblock to success is the client s ability to make a change in their day to day life Many fitness professionals and sports coaches working with clients find difficulties in ensuring their clients stay motivated Any professional prescribing a fitness programme to a client knows that the biggest roadblock to success is the client s ability to make a change in their day to day life You can tell clients what they need to know but you can t make lifestyle changes for them You can however show understanding put changes in perspective offer motivation and lay out the smaller steps that build towards a greater goal The Complete Guide to Behavioural Change for Sport and Fitness Professionals covers both theoretical issues related to behaviour change and motivation and practical application in the fitness or sport setting outlining all the different models of behaviour change and discussing clear motivation strategies It is especially relevant for fitness professionals prescribing exercise to clients with health issues or referred clients who need support to become more active But it is equally suited to helping recreational and amateur athletes who want to change their lifestyle or mental attitude in order to improve their performance Written in clear accessible language for the non scientist this a reference guide for Fitness instructors and personal trainers Sports coaches and sports psychologists Professionals from the health and fitness industry working at Levels 3 and 4 of the qualifications framework Undergraduates and postgraduates in sports studies and health and fitness Those working to promote activity in community settings Anyone wishing to increase personal knowledge of behaviour change and motivation **The Upanishads** ,2004-01-29 An Upanisad is a teaching session with a guru and these thirteen texts the Principal Upanisads form a series of philosophical discourses between teacher and student that question the inner meaning of the world Composed from around the eighth century BCE the Upanisads have been central to the development of Hinduism and explore the central doctrines of rebirth karma overcoming death and achieving detachment equilibrium and spiritual bliss Speaking to the reader in direct unadorned prose or lucid verse they embody humanity s perennial search for truth and knowledge *The Social Construction of the Person* K.J. Gergen,K.E. Davis,2012-12-06 This volume grew out of a discussion between the editors at the Society for Experimental Social Psychology meeting in Nashville in 1981 For many years the Society has played a leading role in encouraging rigorous and sophisticated research Yet our discussion that day was occupied with what seemed a major problem with this finely honed tradition namely it was preoccupied with accurate renderings of reality while generally insensitive to the process by which such renderings

are achieved This tradition presumed that there were brute facts to be discovered about human interaction with little consideration of the social processes through which factuality is established To what degree are accounts of persons constrained by the social process of rendering as opposed to the features of those under scrutiny This concern with the social process by which persons are constructed was hardly ours alone In fact within recent years such concerns have been voiced with steadily increasing clarity across a variety of disciplines Ethno methodologists were among the first in the social sciences to puncture the taken for granted realities of life Many sociologists of science have also turned their attention to the way social organizations of scientists create the facts necessary to sustain these organizations Historians of science have entered a similar enterprise in elucidating the social economic and ideological conditions enabling certain formulations to flourish in the sciences while others are suppressed Many social anthropologists have also been intrigued by cross cultural variations in the concept of the human being

A Metaphysics of Creation for the Information Age Liran Shia Gordon,2022-05-23 The metaphysical and theological writings of John Duns Scotus 1265 6 1308 one of the most intriguing albeit if now nigh forgotten philosophers of the late Middle Ages were seminal in the emergence of modernity A Metaphysics of Creation for the Information Age A Dialogue with Duns Scotus uses the prism of the concept of Creation as the leitmotif to assemble and interpret Scotus s system of thought in a unified manner In doing so Liran Shia Gordon reframes Scotus s metaphysics such that it confronts the challenges posed by information technology and its impact on our lives thought and actions Surprisingly although there has been great interest in the emergence and dissemination of information technology through the popular media there has not yet been a genuine and vigorous philosophical consideration of the multiple ways information technology alters the basic categories by which we perceive and understand reality Juxtaposing medieval philosophy and information technology offers an unconventional horizon to frame the foundational changes carried by the information revolution and reassess the relevancy of medieval philosophy
