Self-portrait David Douglas Duncan, 1969 *A Corpus of Rembrandt Paintings IV* Ernst van de Wetering, 2010-07-19
Volume IV of *A Corpus of Rembrandt Paintings* deals uniquely with the self portraits of Rembrandt. In a clearly written explanatory style, the head of the Rembrandt Research Project and Editor of this Volume, Ernst van de Wetering, discusses the full body of work of paintings and etchings portraying Rembrandt. He sets the different parameters for accepting or rejecting a Rembrandt self portrait as such, whilst also discussing the exact working environment of Rembrandt and his apprentices. This workshop setting created a surroundings where apprentices could be involved in working on Rembrandt paintings, making it more difficult to determine the hand of the master. Van de Wetering, who is one of the Rembrandt experts of our day and age, goes down to great detail to explain how the different self portraits are made and what techniques Rembrandt uses, also giving an overview of which paintings are to be attributed to the Dutch Master and which not. In the additional catalogue, the self portraits are examined in detail. In clear and accessible explanatory text, the different paintings are discussed, larded with immaculate images of each painting. Details are shown where possible, as well as the results of modern day technical imaging like X radiography. This work of art history and art research should be part of every serious art historical institute, university or museum. Nowhere in the art history have all Rembrandt's self portraits been discussed in such detailed and comparative manner by an authority such as Ernst van de Wetering. This is a standard work for decades to come. *Vincent van Gogh* Susie Hodge, 2019-12-16
He did not paint his pictures; it was like he exhaled them in a gasping, boiling breath. Julius Meier Graef. Van Gogh's distinctive style of expressive brushstrokes and bold colors is now world famous, but during his lifetime, the artist was met with cold disinterest from his contemporaries. This book explores the fascinating life story of this tortured soul who came late to art and suffered throughout his life from anxiety and depression. It unravels the influences behind his artworks, from the luminous landscapes of the south of France to the Japanese woodblock prints he so admired, and explores how he developed his own unique style. This detailed monograph features Van Gogh's major works and examines the light they shed on this enigmatic character, serving as a wonderful introduction to one of the best artists of all time. ABOUT THE SERIES: The Great Artists series by Arcturus Publishing introduces some of the most significant artists of the past 150 years, looking at their lives, inspirations, and techniques, as well as presenting a selection of their best work.

Germania, USA Noel Iverson, 1967-02-10
Germania USA was first published in 1967. Minnesota Archive Editions uses digital technology to make long unavailable books once again accessible and are published unaltered from the original University of Minnesota Press editions. An unusual community in southern Minnesota, New Ulm, a town of about 12,000 inhabitants, is the subject of this sociological study. New Ulm was founded in 1856 by a group of German immigrants who came to the United States as refugees from the revolution of 1848 in Germany. They were members of the Turnverein, a society of liberal thinkers who were a political minority in Germany. In founding New Ulm, they established a utopian ethnic

community became the town's status elite and for a long time monopolized its economic, political, and cultural life. Professor Iverson analyzes four aspects of sociological change in the community: class, status, power, and assimilation. Each aspect is viewed according to the differences found between two generations of the upper status group, the Turners, and two corresponding generations of non-Turners. In addition to its substantive contribution to our knowledge of ethnic settlements, the study demonstrates a gain in methodological precision over many earlier studies of ethnic communities. Its chief methodological innovation is in the use of scales to verify and measure the changing structure of class, status, and power, and to gauge the extent of assimilation. The book is of interest not only to sociologists, especially those concerned with the study of community change, but also to political scientists interested in the study of community power structures. Also, the methodology will be instructive to those interested in the design of community studies.

ART is More Jan Laurens SIESLING, 2015-06-15 This book turns traditional art history inside out. Not styles or forms or movements or artists or art theories are its point of departure, but the reason for being of art in civilization. Since the very beginnings of society, art has raised and responded to the existential questions of the human kind. The history of the arts is the history of those questions, and from that angle, art should be presented here. It is. When reading this book, unfolding like a novel, we think, yes, of course, no doubt why didn't we think of this before. And we agree that art is not a hobby or a profession or an entertainment, but the very heartbeat of the human race.

Marguerite Yourcenar and the USA Bérengère Deprez, 2009 This is a very welcome contribution to the debate on the real effect of the United States on Yourcenar's life and thought, a good read on a fascinating subject which critics have often treated dismissively. Future scholarship will be obliged to weigh Berengère Deprez's arguments and evidence seriously and thank her for her clearheaded thoroughness. Prof. Brian Gill, University of Calgary, Canada.
