SELF-DESTRUCTION

A STUDY OF THE SUICIDAL IMPULSE

PROPHYLACTIC SUGGESTIONS: Based on an analysis of circumstances in family and community life which tend to prevent or modify the development of self-destructive impulses.

Writer of several other authoritative and best-selling books on psychiatry, the author (a psychiatrist and psychoanalyst) attempts to determine the nature of the experiences which predispose to the "anger and despair" underlying self-destruction.

SELF-DESTRUCTION BEULAH CHAMBERLAIN. BOSSELMAN,2018 **Self-Destruction** Bosselman,1958 Self Destruction Beulah Chamberlain Bosselman, M.D.,1961 Self-Destruction\$da Study of the Suicidal Impulse Beulah Chamberlain Bosselman,1958 Self-Destruction Beulah Chamberlain Bosselman,2018-01-29 Excerpt from Self Destruction A Study of the Suicidal Impulse In most instances of suicide the circumstances which lead step by step to the violent gesture are never known and the world s verdict is based on explanations such as those quoted any of which are often concomitant symptoms or precipitating factors rather than causes The psychiatrist in his work with disturbed people is closely concerned with the problems of self destructiveness When a per son after an attempt to die comes to a psychiatrist he unfolds a story which has within it many of the basic emotional elements of every suicidal crisis It can contribute therefore to a clearer understanding of values in human life It emphasizes the fact that any person s happiness and good fortune are not determined by the superficial appearances of his life but by the struggles that go on deep within his mind hidden from the world hidden often from himself To know this is to be more tolerant less facile in judgment About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

American Literature in Transition, 1876-1910: Volume 4 Lindsay V. Reckson,2022-08-18 Addressing US literature from 1876 to 1910 this volume aims to account for the period s immense transformations while troubling the ideology of progress that underwrote much of its self understanding This volume queries the various forms and formations of post Reconstruction American literature It contends that the literature of this period most often referred to as turn of the century might be more productively oriented by the end of Reconstruction and the haunting aftermath of its emancipatory potential than by the logic of temporal and social advance that underwrote the end of the century and the beginning of the Progressive Era Acknowledging that nearly all US literature after 1876 might be described as post Reconstruction the volume invites readers to reframe this period by asking under what terms did post Reconstruction American literature challenge or re consolidate the nation as an affective political and discursive phenomenon And what kind of alternative pasts and futures did it write into existence Kierkegaard's Romantic Legacy Anoop Gupta,2005 In Kierkegaard s Romantic Legacy Anoop Gupta develops an original theory of the self based on Kierkegaard s writings Gupta proceeds by historical exegesis and considers several

important ways of thinking about self outside of the natural sciences His study moves theories of the self from theology toward sociology from a God relationship to a social one and illustrates how a loss in theological underpinnings partly contributes to the rise in the popularity of cultural relativism By drawing on Kierkegaard s writings Gupta develops a metaphysical account of the self that provides an alternative to the idea that there is no such thing as human nature **The**

Sanchez,2010-06-15 Finally a book that explains suicide using the latest research in suicidology A must read for mental health professionals and the survivors of suicide who want to understand why suicide happens The material in this book should be incorporated into the curriculum of psychology and psychiatry because suicide is such a vital topic that is hardly covered in medical schools due to the lack of a coherent theory of the brain in general and suicide in particular This is an important book for all professionals who deal with mental disorders in general and suicide in particular It is the author s fifth book where suicide is explained not as a mysterious process but as a natural consequence of the reactions of the brain under certain conditions when suffering mental disorders The author begins with a brief summary of the statistics of the whos the hows and the wheres of suicide This gives us a clear idea of the magnitude of the problem of suicide of the cost not only in lives but of the emotional toll of the survivors as well as the financial burdens on society as a whole Then as an important first step to understanding the medical community s standard approaches to mental disease he reviews briefly the current psychiatric terminology and the diagnostic tools concerning mental disorders He presents the most accepted current theories and models of suicide He explains what a psychiatric emergency is and what to expect if one ever encounters such a situation And he explains how suicide risk assessment is currently done along with other important considerations He proceeds to explain in everyday language where possible his theory of how the brain works beginning with a simple explanation of how neurons communicate with each other Later he explains how the brain controls the body and how we see with the back of our heads how memory systems become a logical extension or expansion of our sensory and motor systems Awareness and attention are introduced first as an evolutionary tool that aids the senses gather more information from the environment and ultimately as tools that aid in thinking reasoning and constructing our past our lives and our identities But all this would mean nothing without the introduction of emotions and how the brain constructs contexts He explains how emotions are an integral part of memories and how these are related to contexts how basically the brain has created a very concise and compact filing memory system A clear explanation of how emotions are triggered regulated and dissipated is next These lead to a learned discussion of how these various systems can go haywire causing mental disorders A brief but perhaps new and revolutionary approach to these mental disorders is presented next including Obsessive Compulsive Disorder Delirium Dementia and Other Amnesic Disorders Manic Depression and Depression and Schizophrenia Ultimately it becomes clear how under certain conditions these disorders can lead to suicide The difference between attempters and completers is also

explained He then presents a suicide autopsy as an exercise to show how varied the opinions of experts in the field of suicidology are and compares it to his own theories and lets the reader decide for himself who is closer to the truth The fallacy of many expert opinions of where research needs to go is presented The book gives a few words of advice on various therapies and the rationality of their approaches and cautions against their limitations The book devotes a chapter to suicide prevention in the military and how these efforts are bound to fail and another chapter on suicide prevention The author makes important suggestions of how to prevent suicide and lessen suicide rates particularly among the young And lastly a chapter is devoted to the specifics of grief for suicide survivors *McClure's Magazine* ,1908 **Developmental**
