Self And The Political Order Hb:

Nationalist Thought and the Colonial World Partha Chatterjee, 1993 If it isn't obvious from the title of this book that this is going to be full of postmodern jargon it becomes clear quite quickly that Chatterjee prefers difficult terms like problematic thematic and discourse without always defining them he even admits his admiration for Rorty Barthes Foucault and Derrida Nonetheless underneath all of this verbiage is a strong and convincing argument about the three stages of nationalism in India the moment of departure epitomized by Bankimchandra Chattopadhyay the moment of manoeuvre Gandhi and the moment of arrival Nehru Chatterjee clearly shows how nationalism in India was akin to Gramsci's concept of the passive revolution i.e. merely a drive towards independence not towards transforming or breaking up colonial institutions He argues that instead of supporting nationalism we should instead challenge the marriage between reason and capital From the title of this book one might expect Chatterjee to draw links to other anti colonial nationalisms but he doesn't rather he only discusses India not even other parts of South Asia While this approach doesn't really make this book too useful for examining anti colonial nationalisms in general for someone like me who has never read a book on Indian nationalism this is a good introduction from Amazon.ca [Wealth, Power, and Authoritarian Institutions](#) Michaela Collord, 2024-07-12 Through an analysis of the recent political history of Tanzania and Uganda *Wealth Power and Authoritarian Institutions* offers a novel explanation of why authoritarian parties and legislatures vary in strength and why this variation matters Michaela Collord elaborates a view of authoritarian political institutions as both reflecting and magnifying elite power dynamics While there are many sources of elite power the book centres on material power It outlines how diverse trajectories of state led capitalist development engender differing patterns of wealth accumulation and elite contestation across regimes These differences in turn influence institutional landscapes Where accumulation is more closely controlled by state and party leaders as was true in Tanzania until economic liberalization in the 1980s rival factions remain subdued Ruling parties can then consolidate relatively strong institutional structures and parliament remains marginal Conversely where a class of private wealth accumulators expands as occurred in Tanzania after the 1980s and in Uganda after the National Resistance Movement took power in 1986 rival factions can more easily form simultaneously eroding party institutions and encouraging greater legislative strength Collord uses this analysis to reassess the significance of a stronger legislature She considers its influence on distributive politics both regressive and progressive She also considers its relation to democratization particularly in a context of broader liberalizing reforms The book ultimately encourages a closer examination of how would be democratic institutions interact with an underlying power distribution shaping in whose interests they operate *Oxford Studies in African Politics and International Relations* is a series for scholars and students working on African politics and International Relations and related disciplines Volumes concentrate on contemporary developments in African political science political economy and International Relations such as electoral politics democratization decentralization gender and political

representation the political impact of natural resources the dynamics and consequences of conflict comparative political thought and the nature of the continent's engagement with the East and West Comparative and mixed methods work is particularly encouraged Case studies are welcomed but should demonstrate the broader theoretical and empirical implications of the study and its wider relevance to contemporary debates The focus of the series is on sub-Saharan Africa although proposals that explain how the region engages with North Africa and other parts of the world are of interest

General Editors Nic Cheeseman Peace Medie and Ricardo Soares de Oliveira **Local Self-Governance and Varieties of Statehood** Dieter Neubert, Hans-Joachim Lauth, Christoph Mohamad-Klotzbach, 2022-12-13 The debate on governance originates in the OECD world At the latest since the postcolonial debate we know that we need to test our assumptions under radically different conditions This book offers an extended perspective of local self governance by examining cases from South Asia Africa and Latin America together with a study of militias in the USA The chapters present a wide variety of local actors who pursue different notions of order legitimized by local traditions based on hierarchy or deeply rooted communalism Islamic theology or grassroots democracy Some local actors claim a state like authority and challenge the territorial state In such cases there is no longer a shadow hierarchy but opposition to the state Different violent actors fight for supremacy and the state is just one actor among others The empirical studies presented in this book show how different kinds of local self governance are combined with varieties of statehood and thus contribute to an understanding of the notion of governance in a fundamental sense that goes beyond the special case of the OECD world *Ethnicity and Violence* Diego Muro, 2013-05-13 This book provides a genealogy of radical Basque nationalism and the means by which this complex often violent political movement has reinforced Basque identity Radical nationalists are mobilized by a shared frame of reference where ethnicity and violence are intertwined in a nostalgic recreation of a golden age and a quasi religious imperative to restore that distant past Muro critically examines the origins of the ethno nationalist conflict and provides a comprehensive examination of Euskadi Ta Askatasuna's ETA violent campaign The book analyzes the interplay of ethnicity and violence and stresses the role of inherited myths memories and cultural symbols to explain the ability of radical Basque nationalism to endure

Self-Interest before Adam Smith Pierre Force,2003-09-04 Self Interest before Adam Smith inquires into the foundations of economic theory It is generally assumed that the birth of modern economic science marked by the publication of The Wealth of Nations in 1776 was the triumph of the selfish hypothesis the

idea that self interest is the motive of human action Yet as a neo Epicurean idea this hypothesis had been a matter of controversy for over a century and Smith opposed it from a neo Stoic point of view But how can the Epicurean principles of orthodox economic theory be reconciled with the Stoic principles of Adam Smith s philosophy Pierre Force shows how Smith s theory refutes the selfish hypothesis and integrates it at the same time He also explains how Smith appropriated Rousseau s republican critique of modern commercial society and makes the case that the autonomy of economic science is an unintended consequence of Smith s republican principles

Liberalism and the Emergence of American Political Science Robert Adcock,2014 This book situates the origins of American political science in relation to the transatlantic history of liberalism In a corrective to earlier accounts it argues that as political science took shape in the nineteenth century American academy it did more than express a pre existing American liberalism The pioneers of American political science participated in transatlantic networks of intellectual and political elites that connected them directly to the vicissitudes of liberalism in Europe The book shows how these figures adapted multiple contemporary European liberal arguments to speak to particular challenges of mass democratic politics and large scale industry as they developed in America Political science s pioneers in the American academy were thus active agents of the Americanization of liberalism When political science first secured a niche in the American academy during the antebellum era it advanced a democratized classical liberal political vision overlapping with the contemporary European liberalism of Tocqueville and John Stuart Mill As political science expanded during the dramatic growth of university ideals and institutions in the Gilded Age divergence within its liberalism came to the fore in the area of political economy In the late nineteenth century this divergence was fleshed out into two alternative liberal political visions progressive liberal and disenchanted classical liberal with different analyses of democracy and the administrative state During the early twentieth century both visions found expression among early presidents of the new American Political Science Association and subsequently within contests over the meaning of liberalism as this term acquired salience in American political discourse In sum this book showcases how the history of American political science offers a venue in which we see how a distinct current of mid nineteenth century European liberalism was divergently transformed into alternative twentieth century American liberalisms

[Ending ETA's Armed Campaign](#) Imanol Murua,2016-11-10 This book explains how and why the Basque separatist armed group ETA

decided to end its armed campaign against the Spanish state The ETA s armed campaign for Basque independence lasted fifty years and led to more than 800 casualties This book analyzes the factors that led to ETA ending its campaign of violence in 2011 despite having yet to achieve its political objectives It explains how the Basque pro independence movement s political leadership won an internal battle and brought ETA to a position in which abandoning violence was the only feasible choice The work argues that the key factor leading to the cessation of violence was the loss of support for armed struggle within the pro independence social base and it examines why and how that support decreased so decisively Written by a former journalist the narrative is based on more than 30 interviews including former members of ETA Spanish judges former ministers of the Spanish government political leaders of all Basque political parties from the Nationalist Left to the Partido Popular PP and international mediators As such it is the first book to recount in detail the inside story of the internal struggle within the Nationalist Left movement and particularly between the political party Batasuna and ETA This book will be of much interest to students of political violence ethnic conflict nationalism Spanish politics security studies and IR *Reality, Reason, and Rights* Douglas B.
