Self Realization:

A Basic Handbook for Spiritual Self-realization & Meditation Senthil Vellaichamy, 2018-06-21 What is the biggest impediment of learning anything new It is the jargons People usually get scared by the jargons For example the fundamental jargons used in economics are Currency GDP GNP inflation deflation etc If one wishes to master economics one must learn to understand those jargons So the easiest way to learn the fundamentals of a new subject is to understand the jargons used in that field But if people find it difficult to understand the definition of the jargons they will simply show no interest to learn further in that field Similarly spirituality has evoked little interest among the masses because of the lack of down to earth explanations for the jargons used Therefore keeping those in mind who have very little time to explore the jargons on their own this book contains very simple explanations for the spiritual jargons as well as very simple techniques to do meditation So anyone who goes through this book will develop a taste for spirituality and will learn to meditate very quickly and easily It is immaterial whether you are a believer in God or not but if you are someone who has the courage to question anything and everything this book is for you **Life! People-Oriented Education Transformation Zhaohui Chu,2022-01-13 This book explores the reforms sweeping China s educational sector Traditionally dominated by rote learning China s educational system has increasingly been criticized by the rising middle class for failing to foster creativity for arbitrary placement of students and for fostering regional inequities Reforms to make Chinese education people oriented are slowly but surely gaining steam as the sector embraces comprehensive reforms This book will be of interest to journalists educators and China watchers **Strokes of Luck** Gerald Lang,2021-06-10 Strokes of Luck provides a detailed and wide ranging examination of the role of luck in moral and political philosophy The first part tackles debates in moral luck which are concerned with the assignment of blameworthiness to individuals who are separated only by lucky differences Anti luckists think that one who for example attempts and succeeds

in an assassination and one who attempts and fails are equally blameworthy This book defends an anti anti luckist argument according to which the successful assassin is more blameworthy than the unsuccessful one Moreover the successful assassin is all things equal a worse person than the unsuccessful one The worldly outcomes of our acts can make an all important difference not only to how bad our acts can be deemed but to how bad we are The second part enters into debates about distributive justice Lang argues that the attempt to neutralize luck in the distribution of advantages among individuals does not deserve its prominence in political philosophy the luck egalitarian programme is flawed A better way forward is to re invest in John Rawls s justice as fairness which demonstrates a superior way of taming the bad effects of luck and unchosen disadvantage

Artifacts, Representations and Social Practice C. Gould, Robert S. Cohen, 2012-12-06 The essays collected here in honor of Marx Wartofsky s sixty fifth birthday are a celebration of his rich

contribution to philosophy over the past four decades and a testimony to the wide influence he has had on thinkers with quite various approaches of their own His diverse philosophical interests and main themes have ranged from constructivism and realism in the philosophy of science to practices of representation and the creation of artifacts in aesthetics and from the development of human cognition and the historicity of modes of knowing to the construction of norms in the context of concrete social critique Or again in the history of philosophy his work spans historical approaches to Hegel Feuerbach and Marx as well as contemporary implications of their work and in applied philosophy problems of education medicine and new technologies Marx s philosophical theorizing moves from the highest levels of abstraction to the most concrete concern with the everyday and with contemporary social and political reality And perhaps most notably it is acutely sensitive to the importance of historical development and social practice As a student of John Herman Randall Jr and Ernest Nagel at Columbia Marx developed an exemplary background in both the history of philosophy and systematic philosophy and subsequently combined this with a wide acquaintance with analytic philosophy He is at once aware of the requirements of system and of the need for rigorous and careful detailed argument *Dynamics Of Human Helplessness* Fakir M.
