Korbinian Reiter, 2020-02-06 This book provides a comprehensive analysis of the remedies practice the European Commission has adopted on the basis of articles 7 and 9 of regulation 1 03 Using article 7 as a normative benchmark it shows that most of the criticism levelled at the Commission's article 9 decisions and the Alrosa judgment of the CJEU is not justified since critics tend to over state both the rigour of article 7 and the laxness of article 9 Remaining inconsistencies between the commitment practice and the standards for infringement decisions can it be justified by the consensual nature of commitment decisions and their underlying goal of procedural economy Moreover it is suggested that too little importance is generally assigned to the beneficial effect which commitments bring about by providing for precise and enforceable obligations without sacrificing the concerned undertakings freedom to choose how to put the infringement to an end Adopting a case oriented approach this study provides valuable insights for academics and practitioners alike

systematic study of EU economic law in areas where private regulation is both important and legally controversial Mislav Mataija discusses how the interpretation of both free movement and competition rule adapts to the rise of private regulation and examines the diminishing relevance of the public private distinction As private regulators take on increasingly important tasks the legal scrutiny over their measures becomes broader and moves towards what Mataija describes as regulatory autonomy This approach broadly disciplines but also recognizes the legitimacy of private regulators granting them an explicit margin of discretion and focusing on governance and process considerations rather than on their impact on trade and competition The book also demonstrates how the application of EU internal market law fits in the context of strategic attempts by the EU institutions to negotiate substantive reforms in areas where private regulation is pervasive Surveying recent case law of the Court of Justice of the European Union and the practice of the European Commission Mataija demonstrates how EU internal market law is used as a control mechanism over private regulators
