## **Shang Civilization:**

**The Shang Dynasty** Kirsty Holmes, 2020-07-15 The Shang Dynasty was the earliest recorded dynasty in China. It was in power for less than 600 years but they ruled during great advances in math, art, astronomy, and military technology. If life was so great during this time, why did the Shang Dynasty end? Invasion is one main reason that readers learn about in this compelling volume full of information about the civilization the Shang Dynasty created and about ancient China. Historical images and a timeline aid in comprehension of the social studies content included throughout. **Violence, Kinship and the Early Chinese State** Roderick Campbell, 2018-05-03 Situated between myth and history, the Shang has been hailed both as China's first historical dynasty and as one of the world's primary civilizations. This book is an up-to-date synthesis of the archaeological, palaeographic, and transmitted textual evidence for the Shang polity at Anyang c. 1250-1050 BCE. Roderick Campbell argues that violence was not the antithesis of civilization at Shang Anyang but rather its foundation in war and sacrifice. He explores the social economy of practices and beliefs that produced the ancestral order of the Shang polity. From the authority of posthumously deified kings to the animalization of human sacrificial victims, the ancestral ritual complex structured the Shang world through its key institutions of war, sacrifice, and burial. Mediated by hierarchical lineages, participation in these practices was basic to being Shang. This volume, which is based on the most up-to-date evidence, offers comprehensive and cutting-edge insight into the Chinese Bronze Age civilization. Shang Civilization Kwang-chih Chang, 1980 **China in the Early Bronze Age** Robert L. Thorp, 2006 One of the great breakthroughs in Chinese studies in the early twentieth century was the archaeological identification of the earliest fully historical dynasty of kings, the Shang, ca. 1300-1050 BCE. The last fifty years have seen major advances in all areas of Chinese archaeology, but recent studies of the Shang, their ancestors, and their contemporaries have been especially rich. Since the last English language overview of Shang civilization appeared in 1980, the pace of discovery has quickened. China in the Early Bronze Age: Shang Civilization is the first work in twenty-five years to synthesize current knowledge of the Shang for everyone interested in the origins of Chinese civilization. China in the Early Bronze Age traces the development of early Bronze Age cultures in North and Northwestern China from about 2000 BCE, including the Erlitou culture (often identified with the Xia) and the Erligang culture. Robert L. Thorp introduces major sites, their architectural remains, burials, and material culture, with special attention to jades and bronze. He reviews the many discoveries near Anyang, site of two capitals of the Shang kings. In addition to the topography of these sites, Thorp discusses elite crafts and devotes a chapter to the Shang cult, its divination practices, and its rituals. The volume concludes with a survey of the late Shang world, cultures contemporary with Anyang during the late second millennium BCE. Fully documented with references to Chinese archaeological sources and illustrated with more than one hundred line drawings, China in the Early Bronze Age also includes informative sidebars on related topics and suggested readings. Students of the history and archaeology of early civilizations will find China in the Early Bronze Age the most up-to-

date and wide ranging introduction to its topic now in print Scholars in Chinese studies will use this work as a handbook and research guide This volume makes fascinating reading for anyone interested in the formative stages of Chinese culture

**Civilizations** Felipe Fernandez-Armesto, 2001-09-14 In *Civilizations* Felipe Fernandez Armesto once again proves himself a brilliantly original historian capable of large minded and comprehensive works here he redefines the subject that has fascinated historians from Thucydides to Gibbon to Spengler to Fernand Braudel the nature of civilization To Fernandez Armesto a civilization is civilized in direct proportion to its distance its difference from the unmodified natural environment by its taming and warping of climate geography and ecology The same impersonal forces that put an ocean between Africa and India a river delta in Mesopotamia or a 2 000 mile long mountain range in South America have created the mold from which humanity has fashioned its own wildly differing cultures In a grand tradition that is certain to evoke comparisons to the great historical taxonomies each chapter of *Civilizations* connects the world of the ecologist and

geographer to a panorama of cultural history In *Civilizations* the medieval poem *Sir Gawain and the Green Knight* is not merely a Christian allegory but a testament to the thousand year long deforestation of the trees that once covered 90 percent of the European mainland The Indian Ocean has served as the world's greatest trading highway for millennia not merely because of cultural imperatives but because the regular monsoon winds blow one way in the summer and the other in the winter In the words of the author Unlike previous attempts to write the comparative history of civilizations it is arranged environment by environment rather than period by period or society by society Thus seventeen distinct habitats serve as jumping off points for a series of brilliant set piece comparisons thus tundra civilizations from Ice Age Europe are linked with the Inuit of the Pacific Northwest and the Mississippi mound builders and the deforesters of eleventh century Europe are both understood as civilizations built on woodlands Here of course are the familiar riverine civilizations of Mesopotamia and China of the Indus and the Nile but also highland civilizations from the Inca to New Guinea island cultures from Minoan Crete to Polynesia to Renaissance Venice maritime civilizations of the Indian Ocean and South China Sea even the Bushmen of Southern Africa are seen through a lens provided by the desert civilizations of Chaco Canyon More here are fascinating stories brilliantly told of the voyages of Chinese admiral Chen Ho and Portuguese commodore Vasco da Gama of the Great Khan and the Great Zimbabwe Here are Hesiod's tract on maritime trade in the early Aegean and the most up to date genetics of seed crops Erudite wide ranging a work of dazzling scholarship written with extraordinary flair *Civilizations* is a remarkable achievement a tour de force by a brilliant scholar

Marks,2011-12-16 This deeply informed and beautifully written book provides a comprehensive and comprehensible history of China from prehistory to the present Focusing on the interaction of humans and their environment Robert B Marks traces changes in the physical and cultural world that is home to a quarter of humankind Through both word and image this work illuminates the chaos and paradox inherent in China s environmental narrative demonstrating how historically sustainable

practices can in fact be profoundly ecologically unsound The author also reevaluates China's traditional heroic storyline highlighting the marginalization of nature that followed the spread of Chinese civilization while examining the development of a distinctly Chinese way of relating to and altering the environment Unmatched in his ability to synthesize a complex subject clearly and cogently Marks has written an accessible yet nuanced history for any reader interested in China past or present Indeed he argues successfully that all of humanity has a stake in China's environmental future
