The Shapes of Galaxies and Their Dark Halos Priyamvada Natarajan, 2002 This book constitutes the proceedings of a very topical workshop aimed at understanding the shapes of the baryonic and dark matter components of galaxies Several groups presented their recent results from observations and numerical N body simulations

**Shapes Of Galaxies And Their Dark Halos, The - Proceedings Of The Yale Cosmology Workshop** Priyamvada Natarajan, 2002-03-28 This book constitutes the proceedings of a very topical workshop aimed at understanding the shapes of the baryonic and dark matter components of galaxies Several groups presented their recent results from observations and numerical N body simulations

Identification Of Dark Matter, The - Proceedings Of The Fifth International Workshop Neil J C Spooner, Vitaly Kudryavtsev, 2005-05-12 The prestigious Identification of Dark Matter workshop series was initiated to assess the status of work that attempts to identify the constitution of dark matter In particular it aims to review the success of current methods that are used in the search for dark matter as well as the new techniques that are likely to improve prospects for detecting possible dark matter candidates in the future In the 5th International Workshop special emphasis was placed on the recent results obtained in experiments searching for baryonic and non baryonic dark matter This volume comprises the high quality review articles and papers contributed by leaders and promising young physicists who attended the conference It provides the most recent updates on dark matter searches from both experimental and theoretical points of view The proceedings have been selected for coverage in Index to Scientific Technical Proceedings ISTP ISI Proceedings Index to Scientific Technical Proceedings ISTP CDROM version ISI Proceedings CC Proceedings Engineering Physical Sciences *Data Analysis in Cosmology* Vicent J. Martinez, Enn Saar, Enrique Martinez Gonzales, Maria Jesus Pons-Borderia, 2009-07-09 The amount of cosmological data has dramatically increased in the past decades due to an unprecedented development of telescopes detectors and satellites Efficiently handling and analysing new data of the order of terabytes per day requires not only computer power to be processed but also the development of sophisticated algorithms and pipelines Aiming at students and researchers the lecture notes in this volume explain in pedagogical manner the best techniques used to extract information from cosmological data as well as reliable methods that should help us improve our view of the universe

**The Many Scales in the Universe** J.C. Toro Iniesta, Emilio Javier Alfaro, Javier Garcia Gorgas, E. Salvador-Solé, H. Butcher, 2006-02-23 This book gathers the invited conferences presented at the Thirteenth Joint European and National Astronomical Meeting JENAM organized by the European Astronomical Society EAS and the Spanish Astronomical Society Sociedad Española de Astronomía SEA and hosted by the Instituto de Astrofísica de Andalucía IAA-CSIC The event held from September 13 to 17 2004 in Granada was at the same time the Sixth Scientific Meeting of the SEA The proceedings of such national meetings are traditionally collected in a series of books generically entitled Highlights of Spanish Astrophysics which will be momentarily interrupted in this occasion as the contributions of the Spanish astronomers to the meeting share

the present publication with those of their colleagues from other European countries or to be more exact from countries all over the world The meeting brought together indeed more than 450 participants from 30 different countries making it one of the most successful JENAMs ever celebrated This success was undoubtedly due to the fact that as readily seen from the titles of the parallel sessions the scientific scope of this JENAM reached for the first time all fields of astronomy and astrophysics In fact there was still another parallel session opened to teachers and professionals of popularisation in astronomy whose proceedings are published elsewhere

**Penetrating Bars through Masks of Cosmic Dust** David L. Block, Iv nio Puerari, K. C. Freeman, R. Groess, Elizabeth K. Block, 2013-04-17 THE EDITORS DAVID L BLOCK AND KENNETH C FREEMAN SOC CO CHAIRS IVANIO PUERARI ROBERT GROESS AND LIZ K BLOCK 1 Harvard College Observatory 1958

The past century has truly brought about an explosive period of growth and discovery for the physical sciences as a whole and for astronomy in particular Galaxy morphology has reached a renaissance The year 1958 The date October 1 The venue Harvard College Observatory The lecturer Walter Baade With amazing foresight Baade penned these words Young stars supergiants and so on make a terrific splash lots of light The total mass of these can be very small compared to the total mass of the system Dr Layzer then asked the key question the discussion raises the point of what this classification would look like if you were to ignore completely all the Population I and just focus attention on the Population II We stand on the shoulders of giants The great observer E E Barnard in his pioneering efforts to photograph the Milky Way devoted the major part of his life to identifying and numbering dusty holes and dust lanes in our Milky Way No one could have dreamt that the pervasiveness of these cosmic dust masks not only in our Galaxy but also in galaxies at high redshift is so great that their penetration is truly one of the pioneering challenges from both space borne telescopes and from the ground

Impact of Gravitational Lensing on Cosmology (IAU S225) International Astronomical Union. Symposium, 2005-09-05 This book contains the proceedings of the International Astronomical Union Symposium no 225 held in July 2004 at the Ecole Polytechnique Federale de Lausanne EPFL in Lausanne Switzerland The meeting focused on the applications of gravitational lensing to cosmological physics and this book summarizes the most recent theoretical and observational developments With chapters written by leading scientists in the field this is a valuable resource for professional astronomers and graduate students in astronomy physics and astroparticle physics

**Statistical Challenges in Modern Astronomy IV** Gutti Jogesh Babu, Eric D. Feigelson, 2007 This is the fourth in a series of international conferences for the vanguard of researchers in the cross disciplinary field of astrostatistics Both astronomical and statistical communities now recognize the wide array of fascinating methodological issues faced by the modern astronomer Ranging from terabyte wide field surveys to small N samples from cosmology to the search for Earth like planets astronomical research can no longer be pursued with a small toolbox of familiar statistical methods Over thirty distinguished scholars from both fields

presented invited talks and commentaries on leading problems in astrostatistics The methodological challenges of inferring cosmological insights from the cosmic microwave background fluctuations the distribution of galaxies in space gravitational lensing and galaxy structure we describe in detail Time series analysis is discussed in a variety of contexts sparse Poisson data multiply periodic systems gravitational wave detection and most dramatically in the search for extrasolar planets Here sophisticated Bayesian model selection with MCMC computations plays a critical role Other topics covered include image processing analysis of mega datasets from large surveys and small N problems in both astronomy and particle physics The volume ends with cross disciplinary overviews and software tutorials The book will be valuable to graduate students and researchers in both astronomy and statistics who seek insights into this promising avenue of cross disciplinary research
