Language learning and professionalization in higher education: pathways to preparing learners and teachers in/for the 21st century

Béatrice Dupuy, Muriel Grosbois, 2020-11-16 In this volume language learning and professionalization are explored by addressing the existing gap between pressing needs for enhanced soft skills in work environments wherein technology mediated multilingual communication is increasingly the norm and current foreign language teaching and learning offerings in higher education Considering theoretical methodological and pedagogical perspectives for preparing language learners and teachers in for the 21st century this volume s eight chapters underscore that research findings should inform the design of learning experiences so that people s communication needs in fast changing work environments are met and the link between language education and professionalization within a lifelong learning perspective is sustained Co-Enrollment in Deaf Education Marc Marschark, Shirin Antia, Harry Knoors, 2019-03-01 Co enrollment programming in deaf education refers

to classrooms in which a critical mass of deaf and hard of hearing DHH students is included in a classroom containing mainly hearing students and which is taught by both a mainstream teacher and a teacher of the deaf. It thus offers full access to both DHH and hearing students in the classroom through co-teaching and avoids academic segregation of DHH students as well as their integration into classes with hearing students without appropriate support services or modification of instructional methods and materials. Co-enrollment thus seeks to give DHH learners the best of both mainstream and separate educational worlds. Described as a bright light on the educational horizon, co-enrollment programming provides unique educational opportunities and educational access for DHH learners comparable to that of their hearing peers. Co-enrollment programming shows great promise. However, research concerning co-enrollment programming for DHH learners is still in its infancy. This volume sheds light on this potentially groundbreaking method of education, providing descriptions of 14 co-enrollment programs from around the world, explaining their origins, functioning, and available outcomes. Set in the larger context of what we know and what we don't know about educating DHH learners, the volume offers readers a vision of a brighter future in deaf education for DHH children, their parents, and their communities. Bulletin, 1922. *Etude Music Magazine*. Theodore Presser, 1892. Includes music. **Music, a Way of Life for the Young Child**. Kathleen M. Bayless, Marjorie E. Ramsey, 1991. For future early education teachers, this text describes the rationale and techniques for using music with infants, toddlers, and young children through the age of five and the developmentally appropriate stages for its introduction. Coverage is built on a strong foundation of research and theory, incorporating findings in the field and the suggestions of users. The authors take a developmental approach to the role of music in the life of the young child and offer a sound program for successfully bringing music into the early childhood educational environment.
