Shares And Other Securities In The Conflict Of Laws:

Shares and Other Securities in the Conflict of Laws Maisie Ooi, 2003 This book examines the problems of choice of law relating to shares and other securities It is a subject that occupied a fairly obscure corner of conflict of laws until the impetus given to it by *Macmillan v Bishopsgate Investment Trust No 3* and recent interest generated by fears within the international financial community that the conflicts problems arising from the modern system of securities holding through intermediaries threatens the system's viability At both European and international levels efforts have been made to legislate for certainty in an area of the greatest practical importance to the major players in the capital markets as the value of cross border transactions in such securities runs into billions of pounds daily *Shares and Other Securities in the Conflict of Laws* is divided into two parts Part I determines the present state of English law with respect to choice of law treatment of dealings in shares and examines the basic rules involved It considers the context in which the rules have evolved the situations in which they are said to apply and have been applied and the place of the rules in the conflicts treatment of securities transactions today The main focus is on dealings with shares in the traditional direct holding system from which the basic rules developed Part II considers the difficulties associated with the application and extension of the basic rules to the choice of law issues that arise in the indirect holding system the various theories and legislative reforms of the EU and at the Hague that have been suggested in respect to their resolution and the extent to which they provide a viable solution Comparison is also made with the related law reform initiatives in the US of Revised Articles 8 and 9 of the Uniform Commercial Code The book concludes with an examination of special choice of law concerns in insolvency and arising from collateralization such as perfection and recharacterization the impact of dematerialization and immobilization on shares and the choice of law problems posed by them

The Law of Ship Mortgages David Osborne, Charles Buss, Joanne Champkins, 2024-08-26

This fully updated and comprehensive 3rd edition of *The Law of Ship Mortgages* provides readers with a practical commercially based and definitive guide to the English law of ship mortgages. The authors, being seasoned practitioners, bring their extensive experience to bear on a number of difficult and developing areas of the law such as mortgagees' duties, liability to charterers, the conflict of laws, work-outs, restructurings and cross-border insolvency. The 3rd edition includes new chapters on pre-delivery security, security over shares and on the increasingly important topic of ship leasing as a method of finance. It is written against the background of and has regard to ever-increasing sanctions affecting shipping and ship finance as well as the continued regulatory and industry-driven push towards reduction of emissions IMO 2020 and IMO 2050. Written primarily with practitioners in mind, *The Law of Ship Mortgages* will continue to be extremely useful to legal professionals, especially in common law jurisdictions involved in international ship finance or ship mortgage enforcement. It will also be a valuable resource for postgraduate students and academics, especially those with an interest in shipping law or the law of personal property more generally.

Intermediation and Beyond Louise Gullifer, Jennifer Payne, 2019-01-24 The global shift from the direct holding of securities by investors to the current intermediated holding system raises many important legal issues. These include the impact of the intermediated holding system on the rights of investors and the enforcement of those rights against intermediaries and issuers. The cross-border nature of many holding patterns adds another layer of complexity to these issues and reduces legal certainty. Against this, intermediation offers benefits for many investors, including the ability to hold a cross-border portfolio with one intermediary, a reduction in costs and the facilitation of the use of securities in the collateral repo and securities lending markets. This book covers a number of legal topics relating to intermediated securities, including the history of intermediation, the benefits and problems in the current intermediated holding system and how future legal and technological developments could help to resolve these problems while retaining the benefits of intermediation. It also examines the possible impact of FinTech on this area, in particular the potential for Blockchain to be used in the issuing, holding and settlement of securities, the extent to which this will solve some of the difficulties that currently exist and whether the use of Blockchain will create new difficulties that will need to be overcome. This book, which originated in a series of workshops organised by the Commercial Law Centre at Harris Manchester College, Oxford, will appeal to those interested in financial and corporate law, including academics, practitioners, policy makers and students.
