underserved and underrepresented demographics it is meaningful to be highlighted and be given credit for their contributions This book showcases to the world the many Black Indigenous People of Color and LGBTQ scientists leading marine conservation both in terms of scientific research and science communication It has been shown in the literature that diversity in scientists creates diversity in thought which leads to innovation Strong minority voices are exactly what is needed to bring greater attention to the conservation of sharks and this book illustrates innovative science by people who were historically excluded from STEM It highlights the unique perspectives these scientists bring to their field that allow them to interact with stakeholders particularly in the areas of conservation and outreach As we continue to amplify these often forgotten voices through research outreach and engagement we hope to stimulate innovation and transformative change in the field of shark conservation and marine science **Subject Guide to Books in Print** ,2001 **School Library Media**
