Resumo

Este artigo apresenta o desenvolvimento e a aplicação de um jogo sério de interface adaptativa para crianças e jovens com transtorno do espectro autista, chamado de Aventura Espacial. A construção do jogo decorre de estudos sobre o autismo e de uma experiência direta de interação com jovens autistas, em um ambiente equipado com jogos informáticos. A pesquisa busca responder à questão sobre como desenvolver um jogo que interage com as condutas recorrentes de sujeitos autistas no contexto da saúde mental. Através do perfil dos jovens e de suas experiências ao jogarem, o jogo Aventura Espacial possibilita que a interface e os desafios se modifiquem, de modo a atender às necessidades dos jogadores. Pudemos compreender que, ao convidar o jogador para uma experiência de interação social com os outros e com as circunstâncias do meio, o jogo, projetado a partir de uma ontologia que acompanhou as ações dos jovens autistas participantes, favorece que os jogadores exerçitem as diferentes formas de funcionamento da atenção com os desafios e sugestões que oferece, ao mesmo tempo em que possibilita ao profissional da saúde mental acompanhar o percurso de sua realização por cada sujeito.

Palavras-chave: Transtorno do espectro autista; Jogo sério; Cognição; Interação; Saúde mental.

Abstract

This paper presents the development and application of a serious adaptive interface game for children and young people with autism spectrum disorder called Space Adventure. The construction of the game stems from studies on autism, and from a direct experience of interacting with young autism in an environment equipped with computer games. The research answers the question about how to develop a game that interacts with recurrent actions of autistic individuals in the context of mental health. Through the profile of young people and playing experiences, the Space Adventure game enables the interface and challenges to change to meet the needs of the players. We could understand that by inviting the player to social experience with others, the game favors the players to exercise the different ways of playing. The serious game was designed from an ontology that contemplates the actions of young autistic participants. Attention to the challenges and suggestions it offers, while allowing the mental health professional to follow the path of its accomplishment by each subject.

Crestiane Andrada Zanrosso Coordenadora do IX Curso de Estudos de Política e Estratégia da Adesg. [Revista do Mercosul](#), 2000. [A história da civilização](#) Will Durant, 2025-07-15. Concebida há quase um século e concluída em 1975, a história da civilização permanece uma das mais ambiciosas e bem sucedidas tentativas de narrar de uma forma ao mesmo tempo acessível e rigorosa o desenvolvimento histórico do Ocidente. Ao longo de onze volumes, Will Durant acompanha a formação e de instituições, valores, obras e ideias que moldaram a experiência humana ao longo dos séculos. Nascida em uma época em que ainda se confiava na possibilidade de uma sintese ampla humanista e inteligível da história, esta obra fruto de vasta erudição e de notável talento narrativo e impressiona tanto pela amplitude do horizonte que abrange quanto pela clareza e elegância de sua exposição. Mais que uma série de volumes, o leitor encontrará uma verdadeira introdução ao drama da civilização, a aventura do espirito humano ao longo do tempo. Neste primeiro volume, o autor aborda primeiramente as origens e histórias ricas da civilização, sintetizando as descobertas da Arqueologia e da Antropologia a fim de formar uma imagem precisa e vívida do homem primitivo. A seguir, são retratadas as grandes civilizações orientais que precederam e influenciaram o Ocidente. Sumário: Egito, Babilônia, Índia, China entre outras. De cada uma delas, Durant apresenta um panorama completo desde suas origens remotas até o seu declínio ou, em casos como o Japão, até a década de 1930. Um clíssico absoluto da escrita histórica, este volume convida o leitor a uma jornada intelectual fascinante para compreender as raízes da cultura ocidental e sua vida profunda, partindo com as civilizações orientais.
