argues that the language acquisition process needed to learn these forms of language is not given enough attention by schools and that this places unfair demands on poor and minority students The book compares this with learning as a process outside the classroom applying this idea to computer and video games and exploring the particular processes of learning which take place as a child interacts with others and technology to learn and play In doing so Gee examines what video games can teach us about how to improve learning in schools and engages with current debates on subjects such as communities of practice and digital literacies Bringing together the latest research from a number of disciplines Situated Language and Learning is a bold and controversial book by a leading figure in the field and is essential reading for anyone interested in education and language

Disruptive Fixation Christo Sims, 2017-03-28 In New York City in 2009 a new kind of public school opened its doors to its inaugural class of middle schoolers Conceived by a team of game designers and progressive educational reformers and backed by prominent philanthropic foundations it promised to reinvent the classroom for the digital age Ethnographer Christo Sims documented the life of the school from its planning stages to the graduation of its first eighth grade class Disruptive Fixation is his account of how this school for digital kids heralded as a model of tech driven educational reform reverted to a more conventional type of schooling with rote learning an emphasis on discipline and traditional hierarchies of authority Troubling gender and racialized class divisions also emerged Sims shows how the philanthropic possibilities of new media technologies are repeatedly idealized even though actual interventions routinely fall short of the desired outcomes often dramatically so He traces the complex processes by which idealistic tech reform perennially takes root unsettles the worlds into which it intervenes and eventually stabilizes in ways that remake and extend many of the social predicaments reformers hope to fix Sims offers a nuanced look at the roles that powerful elites experts the media and the intended beneficiaries of reform in this case the students and their parents play in perpetuating the cycle Disruptive Fixation offers a timely examination of techno philanthropism and the yearnings and dilemmas it seeks to address revealing what failed interventions do manage to accomplish and for whom

Manifesto for a Dream Michelle Jackson, 2020-10-20 A searing critique of our contemporary policy agenda and a call to implement radical change Although it is well known that the United States has an inequality problem the social science community has failed to mobilize in response Social scientists have instead adopted a strikingly insipid approach to policy reform an ostensibly science based approach that offers incremental narrow gauge and evidence informed interventions This approach assumes that the best

that we can do is to contain the problem It is largely taken for granted that we will never solve it In Manifesto for a Dream Michelle Jackson asserts that we will never make strides toward equality if we do not start to think radically It is the structure of social institutions that generates and maintains social inequality and it is only by attacking that structure that progress can be made Jackson makes a scientific case for large scale institutional reform drawing on examples from other countries to demonstrate that reforms that have been unthinkable in the United States are considered to be quite unproblematic in other contexts She persuasively argues that an emboldened social science has an obligation to develop and test the radical policies that would be necessary for equality to be assured for all

Guadalupe Valdes,2014-04-04 This book is about bilingual young people who have been selected by their families to carry out the hard work of interpreting and translating to mediate communication between themselves and the outside world between minority and majority communities It examines the experiences of these young interpreters and the skills they develop in order to fulfill this role The authors purpose in this volume is to contribute to extending current definitions of gifted and talented by proposing and offering evidence that the young people who are selected to serve as family interpreters perform at remarkably high levels of accomplishment when compared with others of their age experience and environment and should thus clearly be included in the 1993 U S federal definition of giftedness They maintain that not only are these capabilities currently overlooked by existing assessment procedures but also that there is little understanding of the ways in which the unique talents of young interpreters might be nurtured and developed in academic settings A strong case is made that in order for such students to be identified as gifted on the basis of their bilingual abilities the field of gifted and talented education must embrace the concept that bilingualism is a strength The field must also make developing bilingualism a focus of programs designed to meet the needs of the increasingly multilingual student population in the United States The research this book reports part of a larger five year study of giftedness through linguistic and cultural lenses funded by OERI through the National Research Center on the Gifted and Talented was conducted by researchers whose background is very much outside the field of gifted education Rather their focus is on language working within the traditions of qualitative sociolinguistics Thus this book offers a unique approach to the exploration of giftedness It asks researchers and practitioners ordinarily accustomed to working with quantitative data to examine and make sense of detailed and rich analyses of students linguistic performance and argues that it is only by understanding the challenges of such bilingual interactions that the field of gifted and talented education can expand and reframe its vision of giftedness
