The Single Homemaker and Material Culture in the Long Eighteenth Century David Hussey,Margaret Ponsonby,2016-03-03 The Single Homemaker and Material Culture in the Long Eighteenth Century represents a new synthesis of gender history and material culture studies It seeks to analyse the lives and cultural expression of single men and women from 1650 to 1850 within the main focus of domestic activity the home Whilst there is much scholarly interest in singleness and a raft of literature on the construction and apprehension of the home no other book has sought to bring these discrete studies together Similarly scholarly work has been limited in evaluating gendered consumption practices during the long eighteenth century because of an emphasis on the homes of families Analysing the practices of single people emphasises the differences but also amplifies the similarities in their strategies of domestic life

The English Reformation and the Laity Caroline Litzenberger, 2002-05-16 This book examines the effects of the English Reformation on the full spectrum of lay religion from 1540 to 1580 through an investigation of individuals and parishes in Gloucestershire Rather than focusing on either the acceptance of Protestantism or the demise of the traditional Catholic religion as other historians have done it considers all shades of belief against the backdrop of shifting official religious policy The result is the story of responses ranging from stiff resistance to eager acceptance creating a picture of the religion of the laity which is diverse and complex but also layered as parishes and individuals expressed their faith in ways which reflected the institutional or personal nature of their piety Finally while the book focuses on Gloucestershire it reveals broad patterns of beliefs and practices which could probably be found all over England

Old Age and the English Poor Law, 1500-1700 Lynn A. Botelho, 2004 Based on documents from two Suffolk villages this study examines the operation of the poor law and the individual effort the elderly poor needed to make to survive This study is a test case of the old poor law In its exploration of the virtually unknown world of the aged poor in sixteenth and seventeenth century England it asks how the elderly poor

managed to survive in a pre industrial economy and answers through focusing on the many factors that make up the experience of old age status health wealth and local culture in two Suffolk villages Botelho demonstrates that the poor law did not nor did it intend to provide complete support and she documents the individual efforts of the poor as they made their own old age arrangements drawing as heavily upon their own initiatives as upon charity and legislated relief LYNN

BOTELHO is Associate Professor of History Indiana University of Pennsylvania **Slavery in the North** Marc Howard Ross,2018-08-01 In 2002 we learned that President George Washington had eight and later nine enslaved Africans in his house while he lived in Philadelphia from 1790 to 1797 The house was only one block from Independence Hall and though torn down in 1832 it housed the enslaved men and women Washington brought to the city as well as serving as the country's first executive office building Intense controversy erupted over what this newly resurfaced evidence of enslaved people in Philadelphia meant for the site that was next door to the new home for the Liberty Bell How could slavery best be remembered and memorialized in the birthplace of American freedom For Marc Howard Ross this conflict raised a related and troubling question why and how did slavery in the North fade from public consciousness to such a degree that most Americans have perceived it entirely as a Southern problem Although slavery was institutionalized throughout the Northern as well as the Southern colonies and early states the existence of slavery in the North and its significance for the region's economic development has rarely received public recognition In *Slavery in the North* Ross not only asks why enslavement disappeared from the North's collective memories but also how the dramatic recovery of these memories in recent decades should be understood Ross undertakes an exploration of the history of Northern slavery visiting sites such as the African Burial Ground in New York Independence National Historical Park in Philadelphia the ports of Rhode Island old mansions in Massachusetts prestigious universities and rediscovered burying grounds Inviting the reader to accompany him on his own journey of discovery Ross recounts the processes by which Northerners had collectively forgotten 250 years of human bondage and the recent and continuing struggles over recovering and commemorating what it entailed **The Scholar in**

His Study Curator of Renaissance Collections Department of Medieval and Modern Europe Dora Thornton,Dora Thornton,1998-01-01 In fifteenth and sixteenth century Italy many leading citizens constructed and furnished distinctive studies for themselves The study was an individually designed room for private and social use as an office library a family archive or treasury as the nucleus of an art collection or as a space for contemplation This book is an account of the Renaissance Italian study and its contents Illustrated with depictions of studies and the precious and unusual objects they contained the book examines the significance of the study to its owner and visitors its structure and location and the prized possessions that might fill such a special room **The Oxford History of the Laws of England: The Canon law and ecclesiastical jurisdiction from 597 to the 1640s** R. H. Helmholz,2003 This is one of the first volumes to appear in a landmark new series The Oxford History of the Laws of England It traces the history of the reception and role of the canon

law in England between 597 and 1649 examining both the establishment of ecclesiastical courts and the heads of jurisdiction within them Legal practice is viewed against the background of the formal canon law Readership Libraries and scholars of ecclesiastical law and history canon law and history Medieval and Early Modern history and comparative law **The Widows' Might** Vivian Bruce Conger, 2009-03-01 In early American society one's identity was determined in large part by gender The ways in which men and women engaged with their communities were generally not equal married women fell under the legal control of their husbands who handled all negotiations with the outside world as well as many domestic interactions The death of a husband enabled women to transcend this strict gender divide Yet as a widow a woman occupied a third liminal gender in early America performing an unusual mix of male and female roles in both public and private life With shrewd analysis of widows' wills as well as prescriptive literature court appearances newspaper advertisements and letters *The Widows' Might* explores how widows were portrayed in early American culture and how widows themselves responded to their unique role Using a comparative approach Vivian Bruce Conger deftly analyzes how widows in colonial Massachusetts South Carolina and Maryland navigated their domestic legal economic and community roles in early American society *The Origins of the Consumer Revolution in England* Joanne Sear, Ken Sneath, 2020-01-17 *The Origins of the Consumer Revolution in England* explores the rise of consumerism from the end of the medieval period through to the beginning of the nineteenth century The book takes a detailed look at when the consumer revolution began tracing its evolution from the years following the Black Death through to the nineteenth century In doing so it also considers which social classes were included and how different areas of the country were affected at different times examining the significant role that location played in the development of consumption This new study is based upon the largest database of English probate records yet assembled which has been used in conjunction with a range of other sources to offer a broad and detailed chronological approach Filling in the gaps within previous research it examines changing patterns in relation to food and drink clothing household furnishings and religion focussing on the goods themselves to illuminate items in common ownership rather than those owned only by the elite Using a combination of qualitative and quantitative evidence to explore the development of consumption *The Origins of the Consumer Revolution in England* will be of great use to scholars and students of late medieval and early modern economic and social history with an interest in the development of consumerism in England *A Lost Frontier Revealed* Alan Fox, 2010-04 A traveller through the length and breadth of England is soon aware of cultural differences some of which are clearly visible in the landscape The eminent English historian Charles Phythian Adams has put forth that England through much of the last millennium could be divided into regional societies which broadly coincided with groups of pre 1974 counties These shire assemblages in turn lay largely within the major river drainage systems of the country In this unusual study Alan Fox tests for and establishes the presence of an informal frontier between two of the proposed societies astride the Leicestershire Lincolnshire border which lies on the watershed between

the Trent and Witham drainage basins The evidence presented suggests a strong case for a cultural frontier zone which is announced by a largely empty landscape astride the border between the contrasting settlement patterns of these neighbouring counties

Rural Society and Economic Change in County Durham A. T. Brown, 2015 In the middle of the fifteenth century the economy of north east England was beset by crises population was low production was stagnant and many landowners faced penury By the end of the sixteenth century however the precocious development of the coal industry and high levels of inflation provided opportunities for investment and profit in the Durham countryside This book examines the development of agrarian capitalism estate management tenure and the land market social mobility the gentrification of merchant wealth and the emergence of the yeomanry during this period in the region It looks at such questions as how the coal industry was affected by the fifteenth century recession and the effects its rapid expansion had upon landed society reassesses debates on the rise of the gentry and the crisis of the aristocracy and considers how the wholesale economic changes of this period affected the social structure of late medieval and early modern England Although this period is often seen as a transitional era this book argues that it needs to be studied as one long agrarian cycle showing the degree to which patterns of landholding fixed during the fifteenth century recession affected the distribution of profits between different types of lords and tenants in the sixteenth and early seventeenth century A T Brown is an Addison Wheeler Fellow at Durham University
