## **Problems In Neolithic Archaeology:**

**Problems in Neolithic Archaeology** Alasdair Whittle, 1988 *Problems in Neolithic Archaeology* is a notable contribution to the debate about how we can write prehistory. Drawing on both processual and post processual approaches it reaffirms the central role of theory and interpretation while accepting as permanent the uncertainty which makes the testing of archaeological hypotheses difficult or even impossible. Dr Whittle asserts in particular the need for greater self confidence and for the formulation of new theory and questions more appropriate to the archaeological record. The book's specific strength lies however in a close contextual study of the Neolithic period in western and central Europe. In this respect it provides an admirable complement to his textbook *Neolithic Europe*. **The Culture Problem in Neolithic Archaeology: Examples and Possible Solutions in the Middle Yangzi River Region** Richard Ehrich, 2017 Archaeological cultures have been an essential part of the study of prehistory especially the Neolithic Age since the beginning of the discipline. However for a long time now doubts have been raised about their ability to reflect the reality of life in antiquity. These Neolithic cultures as they are defined by archaeologists appear to have little semblance to how anthropology or the general public understand the concept of culture. This thesis aims to re conceptualize archaeological cultures and demonstrate ways in which these constructs of our modern typology can be made to relate to ancient human behavior. I apply these ideas in the archaeology of ancient China where the use of archaeological cultures has gone largely unquestioned and certain prehistoric cultures are ascribed a special significance in the formation of Chinese civilization. After tracing the history of the culture concept in anthropology and the archaeologies of America Europe and China I present a new framing of the term based on current ideas about style practice and social boundaries. The identification of cultures relies on detecting behaviors that are so ingrained that they are subject to little conscious manipulation and hence dependable signifiers of the cultural environment they were acquired in. In terms of Neolithic archaeology the best way of achieving this is by discerning certain behavioral steps in the production of pottery in this case the forming of the vessel rim. I give a detailed introduction to a group of Neolithic cultures in the Middle Yangzi River Region in Central China and demonstrate how the traditional culture concept by which they were defined has created problems in interpreting the underlying processes resulting in a long and unresolved debate about their relationship to each other. Then I apply my own typology of vessel rims to published material on the one hand and plot my measurements of the rims of vessels in Chinese museum collections on the other hand. The emerging patterns hint towards the invention and adoption of the potter's wheel in this time and region as a decisive force of cultural change.

**Archaeological Theory and Scientific Practice** Andrew Jones, 2001-12-06 Is archaeology an art or a science? This question has been hotly debated over the last few decades with the rise of archaeological science. At the same time archaeologists have seen a change in the intellectual character of their discipline as many writers have adopted approaches influenced by social theory. The discipline now encompasses both archaeological scientists and archaeological theorists and

discussion regarding the status of archaeology remains polarised In this 2001 book Andrew Jones argues that we need to analyse the practice of archaeology Through an analysis of archaeological practice influenced by recent developments in the field of science studies and with the aid of extensive case studies he develops a new framework which allows the interpretative and methodological components of the discipline to work in tandem His reassessment of the status and character of archaeology will be of interest to students scholars and professionals The Archaeology of Iran from the Palaeolithic to the Achaemenid Empire Roger Matthews,Hassan Fazeli Nashli,2022-06-30 The Archaeology of Iran from the Palaeolithic to the Achaemenid Empire is the first modern academic study to provide a synthetic diachronic analysis of the archaeology and early history of all of Iran from the Palaeolithic period to the end of the Achaemenid Empire at 330 BC Drawing on the authors deep experience and engagement in the world of Iranian archaeology and in particular on Iran based academic networks and collaborations this book situates the archaeological evidence from Iran within a framework of issues and debates of relevance today Such topics include human environment interactions climate change and societal fragility the challenges of urban living individual and social identity gender roles and status the development of technology and craft specialisation and the significance of early bureaucratic practices such as counting writing and sealing within the context of evolving societal formations Richly adorned with more than 500 illustrations many of them in colour and accompanied by a bibliography with more than 3000 entries this book will be appreciated as a major research resource for anyone concerned to learn more about the role of ancient Iran in shaping the modern world The Oxford Companion to Archaeology Brian M. Fagan,1996-12-05 In The Oxford Companion to Archaeology readers have a comprehensive and authoritative overview of this fascinating discipline in a book that is itself a rare find a treasure of up to date information on virtually every aspect of the field The range of subjects covered here is breathtaking everything from the domestication of the camel to Egyptian hieroglyphics to luminescence dating to the Mayan calendar to Koobi Fora and Olduvai Gorge The Companion offers extensive coverage of the methods used in archaeological research revealing how archaeologists find sites remote sensing aerial photography ground survey how they map excavations and report findings and how they analyze artifacts radiocarbon dating dendrochronology stratigraphy mortuary analysis Every Oxford Companion aspires to be the definitive overview of a field of study at a particular moment of time This superb volume is no exception Featuring 700 articles written by hundreds of respected scholars from all over the world The Oxford Companion to Archaeology provides authoritative stimulating entries on everything from bog bodies to underwater archaeology to the Pyramids of Giza and the Valley of the Kings **The Origins of Agriculture in Europe** I. J. Thorpe,2003-09-02 The Origins of Agriculture in Europe takes a look at current ideas in the light of a considerable mass of literature and archaeological evidence examining the transition to agriculture through the comparison of social and economic developments across Europe In this volume I J Thorpe manages to evaluate various alternative explanations in detailed examples whilst also succeeding in addressing the broader theoretical questions which

form the nucleus of contemporary debates This clearly written and accessible text is an extremely valuable resource for students of European prehistory *Ecology and Ceramic Production in an Andean Community* Dean E. Arnold, 2003-10-16 This ethnoarchaeological study looks at pottery production in a contemporary Peruvian Andean community Agriculture and the Onset of Political Inequality Before the Inka Christine A. Hastorf, 1993 The nature of power and political diversity is examined in the Andean region of central Peru **Regional Approaches to Mortuary Analysis** Lane Anderson Beck, 2013-11-11 In this volume archaeologists offer a new direction for burial research by expanding the models for mortuary analysis from a site specific to a regional level Contributors explore how regional mortuary approaches allow the introduction of new questions about peer polity interactions and regional alliances extending traditional settlement system and exchange analyses This volume features case studies examining mortuary sites as components of the archaeological landscape **Ancient Metallurgy in the USSR** Evgenil Nikolaevich Chernykh, 1992-12-03 One of the leading Soviet archaeologists describes the development of ancient mining and metallurgy in the northern half of Eurasia While the first traces of metallurgical activity date from between the seventh and the sixth millennium BC significant mining developed only in the fifth millennium BC in the northern Balkans and Carpathians Metal producing centres were in these northern barbarian peripheral regions rather than in the Near East and Asia Minor areas traditionally associated with early classical civilization Professor Chernykh describes successive periods of metallurgical activity in different regions the Carpatho Balkan Metallurgical Province of the Copper Age the Circumpontic of the Early and Middle Bronze Age and the Eurasian European Caucasian Central Asian and Irano Afghan of the Late Bronze Age He provides detailed information about the different groups of copper and bronze artefacts their chemical composition and their dispersion in time and space He analyses the international metallurgical trade and division of labour and finally the collapse of the sociocultural systems in these metallurgical centres in the first millennium BC **The Imperial Network in Ancient China** Maxim Korolkov, 2021-11-18 This book examines the emergence of imperial state in East Asia during the period ca 400 BCE 200 CE as a network based process showing how the geography of early interregional contacts south of the Yangzi River informed the directions of Sinitic state expansion Drawing from an extensive collection of sources including transmitted textual records archaeological evidence excavated legal manuscripts and archival documents from Liye this book demonstrates the breadth of human and material resources available to the empire builders of an early imperial network throughout southern East Asia from institutions and infrastructures to the relationships that facilitated circulation This network is shown to have been essential to the consolidation of Sinitic imperial rule in the sub tropical zone south of the Yangzi against formidable environmental epidemiological and logistical odds This is also the first study to explore how the interplay between an imperial network and alternative frameworks of long distance interaction in ancient East Asia shaped the political economic trajectory of the Sinitic world and its involvement in Eurasian globalization Contributing to debates around imperial state formation the applicability

of world system models and the comparative study of empires The Imperial Network in Ancient China will be of significant interest to students and scholars of East Asian studies archaeology and history

**Coins and Power in Late Iron Age Britain** John Creighton, 2000-07-06 Cunobelin Shakespeare's Cymbeline ruled much of south east Britain in the years before Claudius' legions arrived creating the Roman province of Britannia But what do we know of him and his rule and that of competing dynasties in south east Britain This book examines the background to these the first individuals in British history It explores the way in which rulers bolstered their power through the use of imagery on coins myths language and material culture After the visit of Caesar in 55 and 54 BC the shadow of Rome played a fundamental role in this process Combining the archaeological literary and numismatic evidence John Creighton paints a vivid picture of how people in late Iron Age Britain reacted to the changing world around them

The Early Slavs Pavel Dolukhanov, 2014-07-10 The history of the early Slavs is a subject of renewed interest and one which is highly controversial both politically and historically This pioneering text reviews the latest archaeological and other evidence concerning the first settlers their cultural identities and their relationship with their modern successors Dr Dolukhanov explores the various historiographical debates before offering his own interpretations

Stone Tools & Society Mark Edmonds, 2012-11-12 Stone tools are the most durable and in some cases the only category of material evidence that students of prehistory have at their disposal Exploring the changing character and context of stone tools in Neolithic and Bronze Age Britain Mark Edmonds examines the varied ways in which these artefacts were caught up in the fabric of past social life Key themes include stone tool procurement and production the nature of technological traditions stone tools and social identity the nature of exchange and the significance of depositional practices As well as contributing to current debate about the interpretation of material culture Dr Edmonds uses the evidence of stone tools to reconsider some of the major horizons of change in later British prehistory From the production of tools at spectacularly located quarries to their ceremonial burial or destruction at ritual monuments this well illustrated study demonstrates that our understanding of these varied and sometimes enigmatic artefacts requires a concern with their social as well as their practical dimensions

*Prehistoric Europe* Andrew Jones, 2008-11-10 Prehistoric Europe Theory and Practice provides a comprehensive introduction to the range of critical contemporary thinking in the study of European prehistory Presents essays by some of the most dynamic researchers and leading European scholars in the field today Ranges from the Neolithic period to the early stages of the Iron Age and from Ireland and Scandinavia to the Urals and the Iberian Peninsula

**The Agricultural Revolution in Prehistory** Graeme Barker, 2009 Addressing one of the most debated revolutions in the history of our species the change from hunting and gathering to farming this title takes a global view and integrates an array of information from archaeology and many other disciplines including anthropology botany climatology genetics linguistics and zoology

Farmers as Hunters Susan Kent, 1989-08-31 Farmers as hunters analyses from an essentially ethnographic perspective the role of hunters in small scale farming societies The twelve contributors examine the

effects of hunting and mobility on behaviour diet economy and material culture at both culture specific and cross cultural levels The influence of sedentism and the increasing use of domesticates is also explored across a wide range of societies from the American southwest and Amazonian to Africa New Guinea and the Phillipines Differing perceptions of the status of animals and plants are reviewed and cultural values are throughout given due weight in a field where discussion too often verges on the economically deterministic

Simulating Transitions to Agriculture in Prehistory Salvador Pardo-Gordó, Sean Bergin, 2022-01-24 This book highlights new and innovative approaches to archaeological research using computational modeling while focusing on the Neolithic transition around the world The transformative effect of the spread and adoption of agriculture in prehistory cannot be overstated Consequently archaeologists have often focused their research on this transition hoping to understand both the ecological causes and impacts of this shift as well as the social motivations and constraints involved Given the complex interplay of socio ecological factors the answers to these types of questions cannot be found using traditional archaeological methods alone Computational modeling techniques have emerged as an effective approach for better understanding prehistoric data sets and the linkages between social and ecological factors at play during periods of subsistence change Such techniques include agent based modeling Bayesian modeling GIS modeling of the prehistoric environment and the modeling of small scale agriculture As more archaeological data sets aggregate regarding the transition to agriculture researchers are often left with few ways to relate these sets to one another Computational modeling techniques such as those described above represent a critical next step in providing archaeological analyses that are important for understanding human prehistory around the world Given its scope this book will appeal to the many interdisciplinary scientists and researchers whose work involves archaeology and computational social science Chapter The Spread of Agriculture Quantitative Laws in Prehistory is available open access under a Creative Commons Attribution 4.0 International License via [springer.com](https://www.springer.com)

*The First Farmers of Central Europe* Penny Bickle, Alasdair Whittle, 2013-07-09 From about 5500 cal BC to soon after 5000 cal BC the lifeways of the first farmers of central Europe the LBK culture Linearbandkeramik are seen in distinctive practices of longhouse use settlement forms landscape choice subsistence material culture and mortuary rites Within the five or more centuries of LBK existence a dynamic sequence of changes can be seen in for instance the expansion and increasing density of settlement progressive regionalisation in pottery decoration and at the end some signs of stress or even localised crisis Although showing many features in common across its very broad distribution however the LBK phenomenon was not everywhere the same and there is a complicated mixture of uniformity and diversity This major study takes a strikingly large regional sample from northern Hungary westwards along the Danube to Alsace in the upper Rhine valley and addresses the question of the extent of diversity in the lifeways of developed and late LBK communities through a wide ranging study of diet lifetime mobility health and physical condition the presentation of the bodies of the deceased in mortuary ritual It uses an innovative combination of isotopic principally carbon nitrogen and

strontium with some oxygen osteological and archaeological analysis to address difference and change across the LBK and to reflect on cultural change in general      **Ancient Mesoamerica** Richard E. Blanton, 1993-04-30 In this revised and updated 1993 edition the authors synthesize recent research to provide a comprehensive survey of Mesoamerica
