as to whether or not this was really so Originally published in 1982 this title started as a small scale exploratory study of clients with marital problems and how they came to seek help Using a sociological approach to marriage the authors compare the medical and non medical settings the clients attended and looks at their social networks as a way to see how people view and conduct their marital relationships It also looks at the broader concept of marriage and how it came to be seen as problematic in our society and became part of wider public discourse at the time Today reissued with a new preface it can be read in its historical context Workmen's Compensation Problems International Association of Industrial Accident Boards and Commissions,1926 *The Hysterectomy Hoax* Stanley West,Paula Dranov,2002 Dr West takes a firm stand against the surgery except in cases where a woman has cancer He argues that the surgery can do more harm than good and presents unnecessary risks except in those situations involving a life threatening illness The Good Doctor Ron Paterson,2013-11-01 Drawing upon real accounts of negligence incompetence and distrust this book seeks to identify the key competencies of a good doctor the ways in which medical care fails and the roadblocks to ensuring that every licensed doctor is capable Arguing that it is possible to improve patient care by lifting the veils of secrecy and better informing patients by establishing more effective ways of checking doctors competence and by ensuring that medical watchdogs protect the public this discussion offers an expert s perspective on health care **Medical Problems of Legislation** American Academy of Medicine,1917 *Essential Guide to Educational Supervision in Postgraduate Medicine* Mr. Rohit Manglik,2024-03-24 Covers educational supervision in postgraduate medicine focusing on mentorship assessment and professional development Essential Guide to Educational Supervision in Postgraduate Medical Education Nicola Cooper,Kirsty Forrest,2009-04-01 The world of postgraduate medical education is changing and educational supervisors need the knowledge and skills to be able to do their job effectively Many of those who want to do this job well feel unprepared for the task Essential Guide to Educational Supervision is a handbook for educational supervisors everywhere The topics covered are generic to medical education whatever the specialty Although the focus is on postgraduate medical education many of the topics in this book are also applicable to undergraduates Essential Guide to Educational Supervision is written for Consultants and General Practitioners who work with trainees Educational supervisors People who organise postgraduate training programmes Written by experts in their field each chapter gives an overview of key topics in educational supervision with references and further resources The book provides evidence and theory when applicable but is deliberately practical with case studies and tips for good practice as well **The Company Doctor** Elaine Draper,2003-01-30 To limit the skyrocketing costs of their employees health insurance companies such as Dow Chevron and IBM as well as many large HMOs have increasingly hired physicians to supervise the medical care they provide As Elaine Draper argues in The Company Doctor company doctors are bound by two conflicting ideals serving the medical needs of their patients while protecting the company s bottom line Draper analyzes the advent of the corporate physician both as an independent phenomenon and as an index of contemporary

culture reaching startling conclusions about the intersection of corporate culture with professional autonomy Drawing on over 100 interviews with company physicians scientists and government and labor officials as well as historical legal and statistical sources and medical trade association data Draper presents an illuminating overview of the social context and meaning of professional work in corporations Draper finds that while medical journals speeches and ethical codes proclaim the independent professional judgment of corporate physicians the company doctors she interviewed often expressed anguish over the tightrope they must walk between their patients health and the corporate oversight they face at every turn Draper dissects the complex position occupied by company doctors to explore broad themes of doctor patient trust employee loyalty privacy issues and the future direction of medicine She addresses such controversial topics as drug screening and the difficult position of company doctors when employees sue companies for health hazards in the workplace Company doctors are but one example of professionals who have at times ceded their autonomy to corporate management Physicians provide the prototypical professional case for exploring this phenomenon due to their traditional independence extensive training and high levels of prestige But Draper expands the scope of the book tracing parallel developments in the law science and technology to draw insightful conclusions about changing conditions in the professional workplace as corporate cultures everywhere adapt to the new realities of the global economy The Company Doctor provides a compelling examination of the corporatization of American medicine with far reaching implications for professionals in many other fields The Trust Crisis in Healthcare David A. Shore,2007 This is a comprehensive survey of the causes and consequences of declining trust in healthcare and provides suggestions for its restoration The authors identify the elements of trust in the environment of modern healthcare and analyse the sources of mistrust in key areas of medicine **Alcohol and the Public Health** John Kemm,1991-04-10 Alcohol consumption and alcohol induced social and health problems are fast increasing while safe intake levels are revised downwards Result a resurgence of concern This authoritative balanced and factual book is for social workers community nurses health visitors midwives GP s community and religious leaders politicians police voluntary and action groups schools and teachers and of course those in the drinks trade Most importantly it applies to those at risk their families and carers Free from medical jargon loaded with diagrams graphs and tables it dissects and informs without mystifying or judging An extremely lucid and competent piece of work Dr Martin Plant Alcohol Research Group University of Edinburgh *Royal Society of Medicine Career Handbook: ST3 - Senior Doctor* Kaji Sritharan,Muhunthan Thillai,2012-05-25 Whether you are just starting out as a senior doctor or half way up the ladder this book will give you the help and advice you need to develop your career pathway in primary care or hospital medicine and achieve success in your professional life Simple practical tips strategies and well researched advice will empower you to Excel when applying EBOOK: Patient Safety: Research into Practice Kieran Walshe,Ruth Boaden,2005-11-16 Winner of the Basis of Medicine Award in the BMA Book Medical Book Competition 2006 In many countries during the last decade there has been a growing

Physicians at War Fritz Allhoff, 2008-03-22 This paper offers a brief examination of ethical health issues arising from military operations and outlines which if any of these ethical health issues apply to current Australian Defence Force ADF military operations The transparency of military operations provided through real time global media reporting and the Internet has raised public awareness of incidents that can be viewed broadly as ethical issues or dilemmas While many of these issues are not new it is the changing context of post cold war military operations and scale and demand of humanitarian operations that places new requirements on how the ADF best addresses these potential issues before they become critical incidents In identifying potential ethical issues arising from military health operations it is recognized that military health personnel operate within a command and control organizational structure and associated culture It is also recognized that the complexity of the issues and the environment within which military health personnel are expected to operate will raise ethical health issues not likely to be encountered to the same degree by those health practitioners operating in the average suburban practice or hospital except when health personnel are confronted with large scale emergencies such as those encountered with recent terrorist attacks and massacres

Through the Patient's Eyes Margaret Gerteis, Susan Edgman-Levitan, Jennifer Daley, Thomas L. Delbanco, 2002-05-03 Sponsored by the Picker Commonwealth Program for Patient Centered Care In this comprehensive research based look at the experiences and needs of patients the authors explore models of care that can make hospitalization more humane Through the Patient's Eyes provides insights into why some hospitals are more patient centered than others how physicians can become more involved in patient centered quality efforts and how patient centered quality

can be integrated into health care policy standards and regulations The authors show how by bringing the patient s perspective to the design and delivery of health services providers can improve their ability to meet patient s needs and enhance the quality of care

Marital Violence Margaret Borkowski,Mervyn Murch,Val Walker,2023-07-05 In the early 1980s the subject of violence in marriage was in danger of being overlooked once again as new social problems dominated the political scene and the Government pursued policies of retrenchment that were likely to deprive refugees of the necessary central government support Yet improvements in the services for victims of marital violence were still urgently needed as this study shows Originally published in 1983 this book is based on research into the way practitioners in the medical legal and social services viewed marriage and violence at the time It examines marital violence from a number of perspectives Taking samples from groups of doctors solicitors social workers health visitors and women s aid refugees the authors have investigated the ways in which different agencies and practitioners respond to the problem of marital violence They use a combination of statistical evidence and interviews with practitioners and the victims themselves to build up a picture of the extent of the problem how it is defined how much comes to the attention of the public services and of the ways in which the attitudes and professional status of the practitioners form a response that is in varying degrees adequate or otherwise to deal with the problems that exist The authors produce evidence to show that marital violence is still widespread though largely hidden because of the way privacy determines family relationships They show how present provisions are inadequate to deal with the problem and make recommendations about ways of improving the services available to help battered women

The Politics of Medical Encounters Howard Waitzkin,1991-01-01 The complaints that patients bring to their doctors often have roots in social issues that involve work family life gender roles and sexuality aging substance use or other problems of nonmedical origin In this book physician sociologist Howard Waitzkin examines interactions between patients and doctors to show how physicians focus on physical complaints often fails to address patients underlying concerns and also reinforces the societal problems that cause or aggravate these maladies A progressive doctor patient relationship Waitzkin argues fosters social change Waitzkin provides a pathbreaking analysis of medical encounters applying perspectives from structuralism post structuralism and critical literary theory to transcripts of recorded conversations between doctors and patients He demonstrates how doctors unintentionally maintain dominance in their dealings with patients encourage conforming social behavior and attitudes and marginalize patients concerns with social problems Waitzkin urges physicians to attend to the social as well as the medical problems that emerge from patients narratives and suggests ways to restructure the manner in which patients and doctors communicate with each other Physicians and patients for example should work together to demystify medical discourse should refrain from medicalizing social problems through medications or reassurances that dull socially caused pain and should be prepared to call on advocacy organizations seeking to change the social conditions that create personal distress This book will influence and challenge physicians scholars and students in the

social sciences and humanities as well as anyone concerned about the present problems and future direction of medicine
