Connections and Influence in the Russian and American Short Story Jeff Birkenstein, Robert C. Hauhart, 2021-03-10 In *Connections and Influence in the Russian and American Short Story* editors Robert C Hauhart and Jeff Birkenstein have assembled a collection of eighteen original essays written by literary critics from around the globe Collectively these critics argue that the reciprocal influence between Russian and American writers is integral to the development of the short story in each country as well as vital to the global status the contemporary short story has attained This collection provides original analyses of both well known Russian

and American stories as well as some that might be more unfamiliar Each essay is purposely crafted to display an appreciation of the techniques subject matter themes and approaches that both Russian and American short story writers explored across borders and time Stories by Gogol Dostoevsky Turgenev Chekhov and Krzhizhanovsky as well as short stories by Washington Irving Faulkner Langston Hughes Richard Wright Ursula Le Guin Raymond Carver and Joyce Carol Oates populate this essential multivalent collection Perhaps more important now than at any time since the end of the Cold War these essays will remind readers how much Russian and American culture share as well as the extent to which their respective literatures are deeply intertwined

British Short Fiction in the Early Nineteenth Century

Tim Killick, 2016-05-23 In spite of the importance of the idea of the tale within Romantic era literature short fiction of the period has received little attention from critics Contextualizing British short fiction within the broader framework of early nineteenth century print culture Tim Killick argues that authors and publishers sought to present short fiction in book length volumes as a way of competing with the novel as a legitimate and prestigious genre Beginning with an overview of the development of short fiction through the late eighteenth century and analysis of the publishing conditions for the genre including its appearance in magazines and annuals Killick shows how Washington Irving's hugely popular collections set the stage for British writers Subsequent chapters consider the stories and sketches of writers as diverse as Mary Russell Mitford and James Hogg as well as didactic short fiction by authors such as Hannah More Maria Edgeworth and Amelia Opie His book makes a convincing case for the evolution of short fiction into a self conscious intentionally modern form with its own techniques and imperatives separate from those of the novel

Literature, Language and Computing Polina Eismont, Maria

Khokhlova, Mikhail Koryshev, 2025-03-26 This book brings together the selected revised papers representing a multidisciplinary approach to language and literature The collection presents studies performed using the methods of computational linguistics in accordance with the traditions of Russian linguistic and literary studies primarily in line with the Leningrad Petersburg philological school The book comprises the papers allocated into two sections discussing the study of corpora in language translation and literary studies and the use of computing in language teaching and translation and in emotional text processing A unique feature of the presented collection is that the papers compiled in one volume allow readers to get an understanding of a wide range of research conducted in Saint Petersburg State University and other Russian leading scientific institutions Both the classical tradition of Saint Petersburg philology and the results obtained with the help of new computer technologies as a sample of the symbiosis of technologies and traditions which bring research to a qualitatively new level to arouse interest

The Columbia Companion to the Twentieth-Century American Short

Story Blanche H. Gelfant, 2004-04-21 Esteemed critic Blanche Gelfant's brilliant companion gathers together lucid essays on major writers and themes by some of the best literary critics in the United States Part 1 is comprised of articles on stories that share a particular theme such as Working Class Stories or Gay and Lesbian Stories The heart of the book however lies in

Part 2 which contains more than one hundred pieces on individual writers and their work including Fitzgerald Hemingway Richard Ford Raymond Carver Eudora Welty Andre Debus Zora Neal Hurston Anne Beattie Bharati Mukherjee J D Salinger and Jamaica Kincaid as well as engaging pieces on the promising new writers to come on the scene Mastering Twentieth-Century Russian History Norman Lowe, 2020-08-29 Mastering Twentieth Century Russian History presents a vivid and informative account of the events which befell the Russian people during the course of the twentieth century Explores the major developments of the last century from the revolution of 1905 to the First and Second World Wars to the Cold War and the rise and fall of the USSR Examines key figures and their actions from Nicholas II Lenin Trotsky Stalin Khrushchev Brezhnev Gorbachev and Yeltsin to Putin Deals with events right up to 2000 enabling the Soviet experiment to be placed in context a decade after its collapse Incorporates the latest research from British American and Russian historians examining key controversies and debates Includes primary source material maps photographs posters and a full chronology of events This text is the ideal companion for anyone seeking a clear yet detailed introduction to the fascinating events of twentieth century Russian history **The Variation Theory of Comparative Literature** Shunqing Cao, 2014-03-21 Seeing the restrictions of former studies in Comparative Literature and aiming to amend these deficiencies the author of this book mainly discusses the major theoretical significance and academic value of the Variation Theory in the whole process of the development of Comparative Literature in the world In China the seminal comparative study of literature among different cultures can be dated back to ancient China while the founding of comparative literature as a distinct academic discipline has to be largely owing to the influence of the West The modern Chinese study of comparative literature formed its uniqueness under Western influence The direct influence of the translation of western theories into China is remarkable However in the course of translation and reception of Western theories Chinese comparatists and intellectuals have been encountering various problems and solving them with an alternative method accordingly different from the traditional methods proposed by the French School and the American School Therefore in this book modern Chinese study of comparative literature is put in a historical context with regard to the theoretical issue of the discipline in China through the entire 20th century At present many scholars in China and in other countries agree that with the influence study proposed by the French School and the study of analogy advocated by the American School the entire theoretical system of Comparative Literature is well built However when the comparative study of literature between East and West is concerned the theory of Comparative Literature is far from perfect It is not only because many problems still exist but there are significant defects in their theoretical bases respectively Many researches have proven that even with the influence study and the study of analogy we still can not solve many problems in the practice of studies in comparative literature This does not mean that we have no respect for the contributions of the French School and the American School we just want to attach importance to literary variations which is a phenomenon that has long been neglected The purpose of putting forward the Variation Theory in Comparative Literature

is to provide new perspectives new methods and new theory to the study of comparative literature which may be a major breakthrough in the international arena of Comparative Literature The neglect of literary variation is mainly because all the previous theories about comparative literature start off in search of similarities but not differences Accordingly in 1990s heterogeneity as a premise of comparability was put forward And later the variation theory was further advanced It is not only the important phenomenon in literary communication but also the most valuable research object in Comparative Literature Still it will be an important path to cultural innovation The Variation Theory may make up the major flaws of theories by both French school and the American School since it focus on heterogeneity and variability in cross cultural literary events especially the ones of inter civilization which will be a new course for comparative literature Throughout the history of literature and the history of literary communication collisions between different civilizations have always been producing new literary events which make the heterogeneity of different civilizations and variability traceable The higher stage of literary communication may mean dialogue and blend between different cultures The overarching concerns of this book include different levels of variation in literary communication and the studies of different objects The introduction begins with a literature review of major achievements made by the French School and the American School with pointing out what they have neglected The body of the book is divided into three parts In the first part Chapter 1 deals with the major contributions of influence study and its weaknesses The origination of comparative literature in most of European countries is reviewed first and then the major contributions of the French School are listed to point out its merits and weaknesses The author discusses the relation between Influence Study and the Variation Theory and the importance of the French school in theoretical development of comparative literature is stressed too Chapter 2 offers a critical introduction and reflection on the study of analogy Both its major contributions and weaknesses are made clear to further illustrate the relationship between interpretation and the Variation Theory And the discursive variation is discussed Part II is a transitional part with only one chapter that gives a clear account of phenomenon of variation from international perspective Part III consists of four chapters Chapter 4 offers a detailed description of The Variation Theory in cross languages context Chapter 5 deals with cross cultural variation in homogeneous circle of civilization Chapter 6 discusses the variation among heterogeneous civilization For a long period of time the theoretical study of comparative literature in China has largely been confined to the Chinese academic arena thus has long been neglected On one hand western comparatists have gradually realized the importance of a non western perspective in the study of the discipline on the other hand few books are available to introduce the recent development of comparative literature study in China Compared with the enthusiastic reception of the theories of the French School and the American School the theories of Chinese comparatists receives relatively little attention in western countries In this sense the proposed book attempts to challenge the myth of monolithic theories of comparative literature trying to construct an alternative theory of the discipline
