Roland,2006-01-01

This work is a bibliography of secondary sources in Canadian medical history **Essays in Honour of Michael Bliss** Elsbeth A. Heaman,Alison Li,Shelley McKellar,2008-03-22 A leading public intellectual Michael Bliss has written prolifically for academic and popular audiences and taught at the University of Toronto from 1968 to 2006 Among his publications are a comprehensive history of the discovery of insulin and major biographies of Frederick Banting William Osler and Harvey Cushing The essays in this volume each written by former doctoral students of Bliss with a foreword by John Fraser and Elizabeth McCallum do honour to his influence and at the same time reflect upon the writing of history in Canada at the end of the twentieth century The opening essays discuss Bliss's career his impact on the study of history and his academic record Bliss himself contributes an autobiographical essay that strengthens our understanding of the business of scholarship teaching and writing In the second section the contributors interrogate public mythmaking in the relationship between politics and business in eighteenth nineteenth and twentieth century Canada Further sections investigate the relationship between fatherhood religion and historiography as well as topics in health and public policy A final section on Medical Science and Practice deals with subjects ranging from early endocrinology lobotomy the mechanical heart and medical biography as a genre Going beyond a collection of dedicatory essays this volume explores the wider subject of writing social and medical history in Canada in the late twentieth century **Bedside Matters** Kathryn McPherson,2003-12-15 Nursing embodies the seemingly timeless characteristics of feminine healing caring and nurturing yet this archetypally female vocation also boasts a distinctive and complex history *Bedside Matters* traces four generations of Canadian nurses to explore changes in who became nurses what work they performed and how they organized to defend their occupational interests Whether in the apprenticeship method of the early twentieth century or in the present day restructuring of hospital work the position of nurses within the health care system has been structured by class gender and ethnic and racial relations Located between the doctors and untrained or subsidiary patient care attendants nurses have struggled to define the boundaries of their occupation vis vis other members of the health care hierarchy even as tensions between bedside and administrative

nurses created divisions within nursing itself Focusing on the daily labours of ordinary nurses McPherson argues that the persisting sex typing of nursing as women s work has meant that gender consistently complicated nursing s easy categorization as either professional or proletariat Combining archival records and oral histories the author shows how nurses in their work activities and social and sexual attitudes sought recognition as skilled workers in the health care system Previously published by Oxford University Press Brooklands, Winnipeg.
