European Constitution and linguistic religious and ethnic dividing lines show even in some of Europe's oldest nation states. How do literary texts, genres and forms thinking about them and teaching them respond to and shape ongoing processes of European self-understanding in our era of globalization? The volume seeks to answer these questions by charting key developments in a number of fields crucial to the emergence of a European common literary space: literature and cultural value systems, literature and cultural memory, literary history, translation, the impact of the new media and the information age on matters of literature and identity and the impact of the postcolonial. Literature for Europe is a thought-provoking tour d'horizon of cutting-edge developments in the relationship between literary studies and the matter of Europe and suggesting an exciting agenda for literary studies in Europe. It will be of interest to everyone working in European studies and/or European literature.

**Translation** Peter France, 2000. Translation has been a crucial process in world culture over the past two millennia and more. In the English-speaking cultures many of the most important texts are translations from Homer to Beckett, the Bible to Freud. Although recent years have seen a boom in translation studies, there has been no comprehensive yet convenient guide to this essential element of literature in English. Written by eminent scholars from many countries, the Oxford Guide to Literature in English: Translation meets this need and will be essential reading for all students of English and comparative literature. It highlights the place of translation in our culture, encouraging awareness of the issues raised, making the translator more visible. Concentrating on major writers and works, it covers translations out of many languages from Greek to Korean, from Swahili to Russian. For some works, e.g. Virgil's Aeneid, which have been much translated, the discussion is historical and critical, showing how translation has evolved over the centuries and bringing out the differences between versions. Elsewhere, with less familiar literatures, the Guide examines the extent to which translation has done justice to the range of work available. The Guide is divided into two parts. Part I contains substantial essays on theoretical questions, a pioneering outline of the history of translation into English and discussions of the problems raised by specific types of text, e.g. poetry, oral literature. The second, much longer part consists of entries grouped by language of origin; some are devoted to individual texts, e.g. the Thousand and One Nights, or writers, e.g. Ibsen, Proust, but the majority offer a critical overview of a genre, e.g. Chinese poetry, Spanish Golden Age drama, or of a national literature, e.g. Hungarian, Scottish Gaelic. There is a selective bibliography for each entry and an index of authors and translators.

The Very Slow Time Machine Ian Watson, 2011-09-29. The Very Slow Time Machine arrives on earth in 1985. Its sole inhabitant is old and mad. Soon it becomes apparent that for him time is going slowly backward. With every day he is getting younger and saner. The world and its whole concept of time, science and philosophy must wait for him to speak. But while the world waits, it changes.
