E. Collinge, 1985-01-01 This book collects all the named laws of Indo European presents each in its original form and rationale and then provides an evaluation of all major attacks revisions and exploitations along with a full bibliography and index Complete thorough exhaustive **Handbook of Comparative and Historical Indo-European Linguistics** Jared Klein, Brian Joseph, Matthias Fritz, 2017-10-23 This book presents the most comprehensive coverage of the field of Indo European Linguistics in a century focusing on the entire Indo European family and treating each major branch and most minor languages The collaborative work of 120 scholars from 22 countries Handbook of Comparative and Historical Indo European Linguistics combines the exhaustive coverage of an encyclopedia with the in depth treatment of individual monographic studies **Selected Works** E. Polivanov, 2017-12-04 No detailed description available for Selected Works **Sievers' Law and the History of Semivowel Syllabicity in Indo-European and Ancient Greek** Peter Barber, 2013-11-28 This book investigates how semivowels were realized in Indo European and in early Greek More specifically it examines the extent to which Indo European i and y were independent phonemes in what respects their alternation was predictable and how this situation changed as Indo European developed into Greek The comprehensive and chronologically sensitive nature of this study together with its careful assessment of what is inherited and what is innovative enables substantive conclusions to be drawn regarding the behaviour of semivowels at various stages

in the history of Greek and in Indo European itself Castalia: Studies in Indo-European Linguistics, Mythology, and Poetics Laura Massetti, 2023-05-08 Since the beginning of Indo European Studies linguists have attempted to reconstruct aspects of the Indo European traditions that go beyond the atomic dimensions of related languages such as inherited aspects of Indo European texts and traits shared by cognate pantheons and narratives The chapters in this volume address these very aspects of cultural reconstruction Interdisciplinary case studies on poetic features religion and mythology of several ancient Indo European languages Ancient Greek Latin and Italic Hittite Phrygian Sanskrit Avestan Old Norse Old Irish and Old Russian work at the intersection of linguistic reconstruction and philology The results of these investigations shed new light on a variety of aspects ranging from obscure etymologies to the reconstruction of the genetic link among entire Indo European myths *The Precursors of Proto-Indo-European* Alwin Kloekhorst, Tijmen Pronk, 2019-10-07 In *The Precursors of Proto Indo European* some of the world s leading experts in historical linguistics shed new light on two hypotheses about the prehistory of the Indo European language family the so called Indo Anatolian and Indo Uralic hypotheses The Indo Anatolian hypothesis states that the Anatolian branch of the Indo European family should be viewed as a sister language of classical Proto Indo European the ancestor of all the other non Anatolian branches The common ancestor of all Indo European languages including Anatolian can then be called Proto Indo Anatolian The Indo Uralic hypothesis states that the closest genetic relative of Indo European is the Uralic language family and that both derive from a common ancestor called Proto Indo Uralic The book unravels the history of these hypotheses and scrutinizes the evidence for and against them Contributors are Stefan H Bauhaus Rasmus G Bj rn Dag Haug Petri Kallio Simona Klemen i Alwin Kloekhorst Frederik Kortlandt Guus Kroonen Martin J K mmel Milan Lopuha Zwakenberg Alexander Lubotsky Rosemarie L hr Micha l Peyrot Tijmen Pronk Andrei Sideltsev Michiel de Vaan Mikhail Zhivlov *Grammatical Change in Indo-European Languages* Vit Bubenik, John Hewson, Sarah Rose, 2009-07-16 The product of a group of scholars who have been working on new directions in Historical Linguistics this book is focused on questions of grammatical change and the central issue of grammaticalization in Indo European languages Several studies examine particular problems in specific languages but often with implications for the IE phylum as a whole Given the historical scope of the data over a period of four millennia long range grammatical changes such as the development of gender differences strategies of definiteness the prepositional phrase or of the syntax of the verbal diathesis and aspect are also treated The shifting relevance of morphology to syntax and syntax to morphology a central motif of this research has provoked lively debate in the discipline of Historical Linguistics **Proto-Slavic Inflectional Morphology** Thomas Olander, 2015-04-14 Proto Slavic the reconstructed ancestor of the Slavic languages presents a rich inflectional system inherited from Proto Indo European In this handbook all the inflectional endings of Proto Slavic are traced back to Proto Indo European through a systematic comparison with the corresponding forms in related languages Applying a redefinition of Proto Slavic based on prehistoric loanword relations with neighbouring non Slavic

languages Thomas Olander provides a new look at the Proto Slavic inflectional system The systematic coherent and exhaustive approach laid out in the handbook paves the way for new solutions to long standing problems of Slavic historical grammar

Indo-European Perspectives J. H. W. Penney, 2004-10-14 This book brings together new and original work by forty two of the world s leading scholars of Indo European comparative philology and linguistics from around the world It shows the breadth and the continuing liveliness of enquiry in an area which over the last century and a half has opened many unique windows on the civilizations of the ancient world The volume is a tribute to Anna Morpurgo Davies to mark her retirement as the Diebold Professor of Comparative Philology at the University of Oxford The book s six parts are concerned with the early history of Indo European Part I language use variation and change in ancient Greece and Anatolia Parts II and III the Indo European languages of Western Europe including Latin Welsh and Anglo Saxon Part IV the ancient Indo Iranian and Tocharian languages Part V and the history of Indo European linguistics Part VI Indo European Perspectives will interest scholars and students of Indo European philology historical linguistics classics and the history of the ancient world

Balto-Slavic Accentual Mobility Thomas Olander, 2009-03-26 Why does the accent jump back and forth in Russian words like golov head acc g lov u gen golov dat golov etc How come we find similar alternations in other Slavic languages and in a Baltic language like Lithuanian The quest for the origin of the so called mobile accent paradigms of Baltic and Slavic leads the reader through other Indo European language branches such as Indo Iranian Greek and Germanic all of which are relevant to the reconstruction of the Proto Indo European accentuation system After the examination of the evidence for the reconstruction of the Proto Indo European accentuation system focus is moved to the Baltic and Slavic accentuation systems and their relationship to each other and to Proto Indo European A comprehensive history of research and numerous bibliographical references to earlier pieces of scholarship throughout the book make it a useful tool for anybody who is interested in Balto Slavic and Indo European accentology Written in a simple style and constantly aiming at presenting old and new opinions on the various problems the volume may serve as an introduction to this complicated field

From Proto-Indo-European to Proto-Germanic Don Ringe, 2017-08-15 This book describes the earliest reconstructable stages of the prehistory of English focusing specifically on linguistic structure It outlines the grammar of Proto Indo European considers the changes by which one dialect of that prehistoric language developed into Proto Germanic and provides a detailed account of the grammar of Proto Germanic In the course of his exposition Don Ringe draws on a long tradition of work on many languages including Hittite Sanskrit Greek Latin Slavic Gothic and Old Norse This second edition has been significantly revised to provide a more in depth account of Proto Indo European with further exploration of disputed points it has also been updated to include new developments in the field particularly in the reconstruction of the Proto Indo European verb and nominal inflection The author also reconsiders some of his original approaches to specific linguistic changes and their relative chronology based on his recent research This new edition of the first volume in A Linguistic History of English

will be of central interest to all scholars and students of comparative Indo European and Germanic linguistics the history of English and historical linguistics more generally The second volume The Development of Old English by Don Ringe and Ann Taylor was published by OUP in 2014 paperback 2016 *Alignment and Alignment Change in the Indo-European Family* Eystein Dahl, 2022-08-01 This volume brings together work from leading specialists in Indo European languages to explore the macro and micro dynamic factors that contribute to variation and change in alignment and argument realization Alignment is taken to include both basic alignment patterns associated with major construction types as well as various valency decreasing constructions such as passives anticausatives and impersonals The chapters explore synchronic and diachronic aspects of alignment morphosyntax based on data from Anatolian Indo Iranian Greek Italic Armenian and Slavic All have a strong empirical focus drawing on both qualitative and quantitative methods and range from broad comparative studies to detailed investigations of specific constructions in individual languages The book is one of very few studies to examine variation and change in alignment typology across languages in a single family It contributes to a greater understanding of the roles played by analogy extension reanalysis and areal factors in alignment change and demonstrates the extent of variation found in the morphosyntax of argument realization in genetically related languages **The World's Major Languages** Bernard Comrie, 1987 Detailed guide to the world's forty major languages with full historical sociological and linguistic information **The Sound of Indo-European** Benedicte Nielsen Whitehead, 2012 This contribution in this volume discusses a large variety of issues from the realm of Indo European phonology in its broadest definition stretching from minute phonetic to more abstract levels of phonemics and morphophonemics and centering upon all varieties of Indo European including the protolanguage and its recent pre stages and in effect all of its post stages till this day **The Oxford Handbook of Historical Phonology** Patrick Honeybone, Joe Salmons, 2015 This critical overview examines every aspect of the field including its history key current research questions and methods theoretical perspectives and sociolinguistic factors The authors represent leading proponents of every theoretical perspective The book is a valuable resource for phonologists and a stimulating guide for their students *Tracing the Indo-Europeans* Birgit Anette Olsen, Thomas Olander, Kristian Kristiansen, 2019-08-23 Recent developments in aDNA has reshaped our understanding of later European prehistory and at the same time also opened up for more fruitful collaborations between archaeologists and historical linguists Two revolutionary genetic studies published independently in Nature 2015 showed that prehistoric Europe underwent two successive waves of migration one from Anatolia consistent with the introduction of agriculture and a later influx from the Pontic Caspian steppes which without any reasonable doubt pinpoints the archaeological Yamnaya complex as the cradle of Core Indo European languages Now for the first time when the preliminaries are clear it is possible for the fields of genetics archaeology and historical linguistics to cooperate in a constructive fashion to refine our knowledge of the Indo European homeland migrations society and language For the historical comparative linguists this opens up a

wealth of exciting perspectives and new working fields in the intersections between linguistics and neighbouring disciplines for the archaeologists and geneticists on the other hand the linguistic contributions help to endow the material findings with a voice from the past The present selection of papers illustrate the importance of an open interdisciplinary discussion which will gradually help us in our quest of Tracing the Indo Europeans
