Selected Philosophical And Methodological Papers:

Selected Philosophical and Methodological Papers Paul Everett Meehl, The scope and imagination of Meehl's emeritus of psychology psychiatry and philosophy at the U of Minnesota and cofounder of the Minnesota Center for Philosophy of Science work are revealed in this collection of previously published essays as he explores the mind body problem freedom and determinism psychoanalytic explanation theory appraisal moral aspects of insanity and the law and precognitive telepathy Annotation copyrighted by Book News Inc Portland OR

Depth-Psychological Understanding Philip F. D. Rubovits-Seitz, 2013-05-13 Although clinical interpretation originated with Freud the latter's positivist preference for purely observational methods made him ambivalent toward interpretive methods According to Rubovits Seitz the legacy of Freud's positivism still pervades clinical thinking and interferes with progress in investigating and improving interpretive methods He reviews the paradigm shift in general science from positivism to postpositivism by way of demonstrating the compatibility of interpretive inquiry with a postpositivist approach Post Freudian models of clinical interpretation are evaluated and clinical methods of interpretation are compared with interpretive approaches in nonclinical fields A detailed discussion of the neglected problem of justifying interpretations incorporates evaluations of specific justifying procedures and a case report illustrating applications of such methods The work concludes with a consideration of common but avoidable errors in clinical interpretation along with remedial strategies for dealing with them Following *Depth Psychological Understanding* clinicians may no longer take for granted the interpretive process and the accuracy of their own interpretations Rubovits Seitz's scholarly survey marks a major advance in comprehending the methodology of clinical interpretation and in setting forth both the problems and promise of interpretive methods

Esther Heinrich-Ramharter, Alois Pichler, Friedrich Stadler, 2025-04-21 This volume covers the origin interpretations and reception of Wittgenstein's Tractatus Logico Philosophicus and offers a critical assessment of the related research and contemporary historiography The authors deal with an evaluation of research on Wittgenstein's philosophy life and work as well as of the editions of his work published since his death This includes upcoming editions with a special focus on the availability of Wittgenstein's digital Nachlass Special attention is given to the reception of and references to the Tractatus in the middle and later Wittgenstein as well as the reception by other philosophers Moreover open philosophical ethical and unresolved scientific questions are addressed with a critical investigation of current research Furthermore the complex diverse and mutual relation of Wittgenstein and the Vienna Circle of Moritz Schlick Otto Neurath Friedrich Waismann and others are addressed **Phenomenology, Uncertainty, and Care in the Therapeutic Encounter** Mark

Leffert, 2015-08-11 Phenomenology Uncertainty and Care in the Therapeutic Encounter is the latest in a series of books where Mark Leffert explores the therapeutic encounter as both process and situation looking for evidence of therapeutic effectiveness rather than accepting existing psychoanalytic concepts of theory or cure without question Mark Leffert focuses on the uncomfortable fact that analysts and therapists can and do make many mistaken assumptions and false moves within their clinical practice and that there is a tendency to ignore the significant levels of uncertainty in what they do Beginning with a discussion of the phenomenology of the self and its relations with the world the book moves on to explore the notion that interdisciplinary discourse both opens up possibilities in the therapeutic encounter but also imposes healthy constraints on what can be thought or theorized about psychoanalytically Phenomenology Uncertainty and Care in the Therapeutic Encounter contributes a new understanding of familiar material and brings a new focus to the care giving and healing aspects of psychoanalysis and psychotherapy leading to a shift in the analyst's identity from that of one who analyses to one who cares for and heals This book will be of interest to Psychoanalysts and psychotherapists neuroscientists and academics in the fields of psychiatry comparative literature and literature and the mind **Twelve Years of Correspondence With**

Paul Meehl Donald R. Peterson, 2017-09-29 In 1996 Division 12 of the APA presented Centennial Awards to two psychologists who were considered to have made the greatest lifetime contributions to the discipline One of those individuals was Paul Meehl Dr Meehl's writings on research methodology and mental illness influenced generations of researchers and psychotherapists Twelve Years of Correspondence With Paul Meehl is composed mainly of letters between Drs Paul Meehl and Donald Peterson during the final 12 years of Meehl's life After Meehl's death Dr Peterson revisited their correspondence

and found a remarkable order in it One topic flowed into another With some connective explanatory text the letters shaped themselves into a book The correspondence forms a story of the relationship between an extraordinary mentor and his student as well as a dialogue between two eminent psychologists The letters explore penetrating questions and underlying arguments about some of the most recalcitrant issues that scientists and practitioners encounter in their efforts to understand the human condition Paul Meehl contributed notably to seven areas philosophy of science learning schizophrenia clinical and research training personality assessment taxometrics and clinical versus statistical prediction The letters touch on each of these areas and examine some issues more thoroughly than either Meehl or Peterson had done in any other writings The book includes an extensive set of endnotes that identify the many works that are referred to in the letters as well as explanatory comments This intimate look at Paul Meehl's way of thinking will appeal to graduate students and professionals in such diverse fields as psychology psychiatry biology sociology law education and philosophy

Evaluation Ethics for Best Practice Michael Morris, 2007-09-22 Focusing on ethical challenges in program evaluation this innovative book features six case study scenarios that end at a point where the evaluator faces a significant decision about how to proceed For each case two distinguished evaluators offer insights on the best course of action to choose and why What If boxes modify the details of the scenarios inviting readers to reflect on whether these changes alter the ethical implications of the case Six additional cases are presented with questions that guide readers to develop their own ethical analyses The book is organized to follow the progress of an evaluation from the entry contracting phase through the utilization of results

The Expanded Social Scientist's Bestiary Denis Charles Phillips,2000 The Expanded Social Scientist's Bestiary addresses a number of important theoretical and philosophical issues in the social sciences from the perspective of contemporary philosophy of science The book discusses and critiques the various arguments that purport to establish that it is a mistake to believe that a naturalistic social science i e social science that in some way resembles the natural sciences can be produced It is intended to guide social scientists researchers teachers and students so that they will not fall victim to the beasts they will encounter in the course of their inquiries Such beasts include holism post positivistic work in the philosophy of science Kuhnian relativism the denial of objectivity and value neutrality hermeneutics and several others both good and bad This expanded and revised edition contains four new chapters tackling such contemporary beasts as Popperian rules narrative research and various forms of constructivism The chapters presented in this volume are as far as possible self contained so that each chapter can be consulted without the necessity of having read the others thus making this volume an invaluable guide for faculty members and graduate students in the whole of the social sciences and related applied fields

Measuring the Intentional World J. D. Trout,2003 Scientific realism has been advanced as an interpretation of the natural sciences but never the behavioral sciences This exciting book introduces a novel version of scientific realism Measured Realism that characterizes the kind of theoretical progress in the social and psychological sciences that is uneven but indisputable Trout proposes a theory of measurement Population Guided Estimation that connects natural psychological and social scientific inquiry Presenting quantitative methods in the behavioral sciences as at once successful and regulated by the world *Measuring the Intentional World* will engage philosophers of science historians of science sociologists of science and scientists interested in the foundations of their own disciplines

Handbook of Gender Research in Psychology Joan C. Chrisler,Donald R. McCreary,2010-03-12 Donald R McCreary and Joan C Chrisler The Development of Gender Studies in Psychology Studies of sex differences are as old as the eld of psychology and they have been conducted in every sub eld of the discipline There are probably many reasons for the popularity of these studies but three reasons seem to be most prominent First social

psychological studies of person perception show that sex is especially salient in social groups It is the first thing people notice about others and it is one of the things we remember best Fiske Haslam Stangor Lynch Duan Glass 1992 For example people may not remember who uttered a witty remark but they are likely to remember whether the quip came from a woman or a man Second many people hold firm beliefs that aspects of physiology suit men and women for particular social roles Men's greater upper body strength makes them better candidates for manual labor and their greater height gives the impression that they would make good leaders i.e. people we look up to Women's reproductive capacity and the caretaking tasks e.g. breastfeeding baby minding that accompany it make them seem suitable for other roles that require gentleness and nurturance Third the logic that underlies hypothesis testing in the sciences is focused on difference Researchers design their studies with the hope that they can reject the null hypothesis that experimental groups do not differ

Critical Rationalism and Educational Discourse, 2023-09-20 Critical Rationalism has become an influential philosophy in many areas including a great number of scientific disciplines Yet only few studies have been devoted to the role of the philosophy of Sir Karl Popper in the vast field of education This volume undertakes to fill this gap Leading scholars in the educational science and in the philosophy of education have critically written for this volume in an attempt to elaborate Popper's methodological and socio-political views and confront them with a globally relevant spectrum of scientific objectives and cultural values Among the topics discussed are moral values education for freedom and its consequences for the student and the critical attitude in political education Attention is also paid to the historiography of this significant philosophical movement Regarding pedagogical research the empirical paradigm the falsificatory approach to educational research the complex relationship between educational theory and practice as well as the problem of value neutrality in educational science are objects of critical analysis

Sensorama Michael Pelczar, 2015-03-05 Michael Pelczar presents an original account of space time and conscious experience How does the modern scientific conception of time constrain the project of assigning the mind its proper place in nature On the scientific conception it makes no sense to speak of the duration of a pain or the simultaneity of sensations occurring in different parts of the brain Such considerations led Henri Poincaré one of the founders of the modern conception to conclude that consciousness does not exist in spacetime but serves as the basic material out of which we must create the physical world The central claim of Sensorama is that Poincaré was substantially correct The best way to reconcile the scientific conception of time with the evidence of introspection is through a phenomenalist metaphysic according to which consciousness exists in neither time nor space but serves as a basis for the logical construction of spacetime and its contents

Detection of Malingering during Head Injury Litigation Cecil R. Reynolds, 2013-03-09 Neuropsychologists and forensic psychologists have long lacked a systematic scientific means of assessing head injury cases of distinguishing those plaintiffs whose pain and suffering is real and deserves

just compensation from those who are simply faking it Cecil R Reynolds and his expert contributors provide the first definitive work on this subject focusing on problems that beset clinicians who are called upon to evaluate head injuries in civil courts They describe the major malingering detection techniques currently in use

Boundaries of Competence

Gwynne Nettler, 2017-12-02 The term social science promises more than its practitioners can deliver it promises knowledge This knowledge is to consist of statements of empirical regularities of such quality as will enhance predictive power and inform public and private policy Boundaries of Competence illuminates obstacles to this aspiration Chapter 1 grounds knowledge in perception Chapter 2 challenges the assumption that ordinary language necessarily describes reality and reveals the mischief words can do Chapter 3 proposes a continuum of perceiving conceiving involved in different ways of knowing worlds Chapter 4 lays out requirements of measurement arguing that assigning numbers to dubious observations gives false assurance that mathematical manipulations necessarily represent events Chapter 5 shows how choice of unit affects the correlations we find in our search for causes Chapter 6 holds that given deficiencies in knowledge and perhaps because of the way Nature works we assess probabilities rather than seek certainties Chapter 7 notes difficulties in counting events that consist of social facts which depend on us and those that refer to brute facts that exist independently of us Chapter 8 criticizes the practice of employing proxies for observations of what we're talking about In particular it demonstrates the error produced by relying on what people say as measure of what they do Chapter 9 criticizes ways of explaining conduct by characterizing actors and their acts and by understanding them through empathy Chapter 10 discusses the important and never ending quarrel about causation Chapters 11 and 12 argue that in social affairs decision is regularly torn between doing what is effective rational and doing what is right moral Nettler's writing is crisp and his argument balanced He employs research from several disciplines to challenge ideologically driven descriptions of our condition and explanations of our
