*Selected poems* Ronald S. Thomas, 1977      **R.S. Thomas: Poet of the Hidden God** D.Z. Phillips, 1986-01-01 This book is one philosopher's response to the poetry of R S Thomas It examines the poet's struggle with the possibilities of sense in religion R S Thomas has described his poetry as an obsession with the possibility of having conversations or linguistic confrontations with ultimate reality Some attempts at giving meaning to religious belief cannot withstand the assaults of criticism In R S Thomas's verse however there emerges a hard won celebration of the worship of a hidden God a rare achievement in contemporary poetry In plotting the course of the development of the poetry the book brings out its many similarities with the thrusts and counter thrusts of argument in the philosophy of religion in the second half of the twentieth century The book should be of interest not only to admirers of R S Thomas but to philosophers theologians students of literature and to anyone concerned with questions concerning the sense or senselessness of religious belief      *R.S. In his catechetical series widely known as the Theology of the Body John Paul II analyzes what is distinctive about human beings He undertakes a reading of the body This book reflects on John Paul II's interpretation extending his findings to the Virgin Mary Her specifically female maternal body is seen to offer insights into how the body images God in how it speaks The transformations of the female body parallel the transformations of language in poetry The reconfigurations and accommodations of the gestational body are this book suggests poetic incarnations of God likeness Body Poetics of the Virgin Mary offers a Mariological slant on theological anthropology and a new way to think of how humans poetically image God

D. Blanton, 2013-12-10 This volume introduces students to the most important figures movements and trends in post war British and Irish poetry An historical overview and critical introduction to the poetry published in Britain and Ireland over the last half century Introduces students to figures including Philip Larkin Ted Hughes Seamus Heaney and Andrew Motion Takes an integrative approach emphasizing the complex negotiations between the British and Irish poetic traditions and pulling together competing tendencies and positions Written by critics from Britain Ireland and the United States Includes suggestions for further reading and a chronology detailing the most important writers volumes and events Architect Knows Best Simon Richards, 2016-04-15 The idea that buildings could be used to reform human behaviour and improve society was fundamental to the modernist architecture and planning of people like Walter Gropius Le Corbusier and Jos Luis Sert in the first half of the 20th century Their proposals for functional zoning multi level transport high rise living and machine inspired aesthetics came under attack from the 1950s onwards and many alternative approaches to architecture and planning emerged It was

thought that the environmental determinist strand of the discourse was killed off at this time as well This book argues that it was not but on the contrary that it has deepened and diversified Many of the most prominent architect planners continue to design with a view to improving the behaviour of individual people and of society at large By looking at and interviewing major figures and movements of recent years in Britain Europe and America including L on Krier Peter Eisenman Andr s Duany Jane Jacobs Robert Venturi and Denise Scott Brown it demonstrates the myriad ways that architect planners seek to shape human behaviour through buildings In doing so the book raises awareness of this strand within the discourse and examines its different purposes and manifestations It questions whether it is an ineradicable and beneficial part of architecture and planning or a regrettable throwback to a more authoritarian phase discusses why is it seldom acknowledged directly and whether it could be handled more responsibly and with greater understanding Richards does not provide any simple solutions but in conclusion is critical of architect planners who abuse the rhetoric of social reform simply to leverage their attempts to secure building commissions while being more sympathetic towards those who appear to have a sincere desire to improve society through their buildings

*Saturday's Silence* Richard McLauchlan, 2016-11-15 R S Thomas is recognised globally as one of the major poets of the twentieth century Such detailed attention as has been paid to the religious dimensions of his work has however largely limited itself to such matters as his obsession with the absent God his appalled fascination with the mixed cruelty and wonder of a divinely created world his interest in the world view of the new physics and his increasingly heterodox stance on spiritual matters What has been largely neglected is his central indebtedness to key features of the classic Christian tradition This book concentrates on one powerful and compelling example of this reading Thomas s great body of religious work in the light of the three days that form the centre of the Gospel narrative the days which tell of the death entombment and resurrection of Christ
