Selected Works of Deng Xiaoping /1975-1982 Xiaoping Deng, 1984 Chinese Nationalism in the Global Era Christopher R. Hughes, 2006-04-07 Presenting an analysis of the tension between nationalism and globalization in China since the beginning of the reform and opening period in the late 1970s to the present day this book makes a unique contribution to the on going debate on the nature of Chinese nationalism It shows how nationalism is used to link together key areas of policy making including economic policy national unification and foreign policy Hughes provides historical context to the debate by examining how nationalism became incorporated into the ideology of the Chinese Communist Party in the 1980s and the ways in which this strengthened and combined with globalization discourse through the domestic crisis of the Tiananmen Massacre and the external shock of the Cold War's conclusion The different perspectives towards this resulting orthodoxy are discussed including those of the state and dissent in mainland China and the alternative views from Taiwan and Hong Kong Based on Chinese sources throughout this book offers a systematic treatment of Chinese nationalism providing conceptual insights that allow the reader to grasp the complex weave of Chinese nationalist sentiment today and its implications for the future The Nanxun Legacy and China's Development in the Post-Deng Era John Wong, Yongnian Zheng, 2001 In the spring of 1992 Deng Xiaoping made a historical tour of south China popularly known as the Nanxun southern tour During the tour he boldly called for more radical economic reform and further opening up of China The Nanxun has become a political landmark in the history of the People's Republic of China much like great events such as the Great Leap Forward the Cultural Revolution and the 1989 Tiananmen crackdown Deng Xiaoping has left his own legacy for the country The Nanxun belongs to Deng just as the 1911 revolution belongs to Sun Yat sen and the communist revolution to Mao Zedong In this collection of articles leading China scholars and experts analyze how the Nanxun has sparked off dynamic economic growth in China and drastically changed the political and social landscape of the country Local Politics and Social Policy in China Kerry E. Ratigan, 2022-08-04 Due to uneven economic reforms Chinese provinces have developed distinct approaches to governing that impact social policy priorities and policy implementation Ratigan shows how coastal provinces tended to prioritize health and education and developed a pragmatic policy style which fostered innovation and professionalism in policy implementation Meanwhile inland provinces tended to prioritize targeted poverty alleviation and affordable housing while taking a paternalist top down approach to implementation This book provides a quantitative analysis of provincial social policy spending in the 2000s and qualitative case studies of provinces with divergent approaches to social policy It highlights healthcare but also draws on illustrative examples from poverty alleviation education and housing policy By showing the importance of local actors in shaping social policy implementation this book will appeal to scholars and advanced students of Chinese politics comparative welfare studies and comparative politics Deng Xiaoping Alexander V. Pantsov, Steven I. Levine, 2015-04-01 Deng Xiaoping joined the Chinese Communist movement as a youth and

rose in its ranks to become an important lieutenant of Mao s from the 1930s onward Two years after Mao s death in 1976 Deng became the de facto leader of the Chinese Communist Party and the prime architect of China's post Mao reforms Abandoning the Maoist socio economic policies he had long fervently supported he set in motion changes that would dramatically transform China's economy society and position in the world Three decades later we are living with the results China has become the second largest economy and the workshop of the world And while it is essentially a market economy socialism with Chinese characteristics Deng and his successors ensured the continuation of CCP rule by severely repressing the democratic movement and maintaining an iron grip on power When Deng died at the age of 92 in 1997 he had set China on the path it is following to this day Alexander Pantsov and Steven Levine's new biography of Deng Xiaoping does what no other biography has done based on newly discovered documents it covers his entire life from his childhood and student years to the post Tiananmen era Thanks to unprecedented access to Russian archives containing massive files on the Chinese Communist Party the authors present a wealth of new material on Deng dating back to the 1920s In a long and extraordinary life Deng navigated one epic crisis after another Born in 1904 Deng like many Asian revolutionary leaders spent part of the 1920s in Paris where he joined the CCP in its early years He then studied in the USSR just as Stalin was establishing firm control over the Soviet communist party He played an increasingly important role in the troubled decades of the 1930s and 1940s that were marked by civil war and the Japanese invasion He was commissar of a communist dominated area in the early 1930s loyal henchman to Mao during the Long March regional military commander in the anti Japanese war and finally a key leader in the 1946 49 revolution During Mao's quarter century rule Deng oscillated between the heights and the depths of power He was purged during the Cultural Revolution only to reemerge after Mao s death to become China s paramount leader until his own death in 1997 This objective balanced and unprecedentedly rich biography changes our understanding of one of the most important figures in modern history The Second Chinese Revolution E. Bregolat, 2016-04-30 The Second Chinese Revolution explores some of the keys to understanding China a country whose evolution already affects all of us Beginning in 1978 when China's GDP was only 6% of the USA's the author takes us through the different aspects that have played a fundamental role in the country's change China's eruption in world markets in the background of the West's economic crisis its obsession with science and technology and its relentless march towards a knowledge society and a reassessment of the Tiananmen Square events of June 1989 and the ongoing debate on political reform The book also includes a comparative analysis of the reforms in China and Russia in the last decades *The End of the Maoist Era:* Chinese Politics During the Twilight of the Cultural Revolution, 1972-1976 Frederick C Teiwes, Warren Sun, 2014-12-18 This book launches an ambitious reexamination of the elite politics behind one of the most remarkable transformations in the late twentieth century As the first part of a new interpretation of the evolution of Chinese politics during the years 1972 82 it provides a detailed study of the end of the Maoist era demonstrating Mao s continuing dominance even as his ability to

control events ebbed away The tensions within the gang of four the different treatment of Zhou Enlai and Deng Xiaoping and the largely unexamined role of younger radicals are analyzed to reveal a view of the dynamic of elite politics that is at odds with accepted scholarship The authors draw upon newly available documentary sources and extensive interviews with Chinese participants and historians to develop their challenging interpretation of one of the most poorly understood periods in the history of the People's Republic of China **The Labors of Sisyphus** Joan Roland, 2017-07-05 Almost a half century has passed since the inception of the People's Republic of China In that time a charismatic leader has ruled and died leaving a wake of Destruction in his quest to transform China In that time too the PRC s most powerful ally and mentor the Soviet Union has dismantled and announced that jcmmunism had failed Today China fluctuates between tradition and modernity ideology and pragmatism between an antiquated collectivist ethic and a new spirit rf individualism It is a country precariously suspended between past and future Maria Hsia Chang's The Labors of Sisyphus is a long overdue reassessment of rie meaning and purpose of the Chinese communist revolution In it she discusses the thought of Mao Zedong and Deng Xiaoping reform and its dilemmas regionalism in greater China and autonomous areas and nationalism She also eyinines China's immediate present and uncertain future If it manages to transform economic growth into development China filled with natural resources and a large capable labor force has the potential to become a world superpower It could also collapse under the weight of its own problems regionalism a flawed state sector corruption and a pronounced decline in state capacity If China succeeds an imposing new economic power will enter the global stage one that is often arbitrary and prone to despotism and xenophobia unless it is tempered by political reform Prior accounts of communist China have failed to capture China's evolving present In all its complexity and variety misrepresenting Maoist China In the process Information shortfall was partly to blame as recently as August 1994 the Chinese government itself decried falsification of statistics by government officials and cadres Sinologists in the 1960s and 1970s had to approach analysis of contemporary China with clear recognition of the limitations involved and the questionable validity of the factual sources available Maria Hsia Chang lends structure meaning and purpose to the very complex recent political and historical past of communist China With greater access to more accurate information Chang is able to analyze objectively without political motive or intention providing readers with a fresh look at the People's Republic Her pathbreaking work will be of interest to scholars of international economics and politics sinologists and historians Comparative Political Philosophy Anthony Parel, Ronald C. Keith, 2003-01-01 Comparative Political Philosophy Studies Under the Upas Tree examines four major traditions of political philosophy and discusses similarities in their key ideas and assumptions An intellectually daring enterprise this fascinating volume focuses on key texts from Chinese Indian Western and Islamic political philosophy The End of China's Non-Intervention Policy in Africa Obert Hodzi, 2018-10-22 This book gives a compelling analysis and explanation of shifts in China's non intervention policy in Africa Systematically connecting the neoclassical realist theoretical logic with an

empirical analysis of China's intervention in African civil wars the volume highlights a methodical interlink between theoretical and empirical analysis that takes into consideration the changing status of rising powers in the global system and its effect on their intervention behaviour Based on field research and expert interviews it provides a rigorous analysis of China's emergent intervention behaviour in some key African conflicts in Libya South Sudan and Mali and broadens the study of external interventions in civil wars to include the intervention behaviour of non Western rising powers Obert Hodzi is Visiting Researcher at the African Studies Center Boston University USA and Postdoctoral Researcher at the University of Helsinki Finland The Labors of Sisyphus Maria Hsia Chang, 1999-10-01 Maria Hsia Chang s The Labors of Sisyphus is a reassessment of the meaning and purpose of the Chinese communist revolution In it she discusses the thought of Mao Zedong and Deng Xiaoping reform and its dilemmas regionalism in greater China and autonomous areas and nationalism She also examines China's immediate present and uncertain future If it manages to transform economic growth into development China filled with natural resources and a large capable labor force has the potential to become a world superpower It could also collapse under the weight of its own problems regionalism a flawed state sector corruption and a pronounced decline in state capacity If China succeeds an imposing new economic power will enter the global stage one that is often arbitrary and prone to despotism and xenophobia unless it is tempered by political reform **Modern Chinese Complex Sentences II** XING Fuyi, 2023-01-31 This book is the second volume of a four volume set on modern Chinese complex sentences with a focus on coordinate complex sentences and their relevant forms Complex sentences in modern Chinese are unique in formation and meaning The author proposes a tripartite classification of Chinese complex sentences according to the semantic relationships between the clauses that is coordinate causal and adversative This volume analyzes the coordinated type in the broad sense and the relevant forms including the representative form in which the clauses are juxtaposed with each other paired and single occurrences of the connective y bi n and various forms of successive progressive and alternative complex sentences as well as the compound forms The book will be a useful reference for scholars and learners interested in Chinese grammar and language information processing **Literature and Literary Theory in Contemporary China** Zhang Jiong, 2017-07-14 Marxism initiated a new era not only for people to fight for socialist future but also for each discipline of sciences to witness profound changes In such a context literature which has always been closely related to politics will inevitably move toward a new direction This book is composed of two parts Part One studies the development of literary theories in contemporary China from a Marxist perspective It introduces the basic ideas of Marxist literary theories as well as their spread and development in China such as the combination of the theories and Chinese revolutionary literature Moreover it discusses the challenges facing Marxist literary theories in the 21st century under the background of diversification of literature and art in terms of theory and practice and high technologies which brought about electronic writing and digital communication of literary works The second part elucidates the author's insights into major issues

Deng Xiaoping Michael Dillon, 2014-10-27 One of the most important figures in global politics during the second half of the 20th century Deng Xiaoping is generally considered the central figure behind China's economic liberalization programme that produced historically unprecedented growth rates and development beginning in the late 1970s Lifting nearly a billion people out of poverty Deng Xiaoping's Four Modernisations called for reform in agriculture industry military and science and technology Today these reforms are considered to be the crucial turning point in modern Chinese history enabling China to effectively harness its previously latent power in its quest to become a global economic superpower Just ten years after this tremendous achievement Deng's brutal suppression of the democracy movement at Tiananmen Square severely undermined his international and domestic reputation To explain the seeming contradictions between Deng Xiaoping's desire for economic liberalization and political conservatism Michael Dillon's biography utilizes recently released Chinese sources to detail Deng Xiaoping s emergence from a minority second class community in the Sichuan province via education in France to his meteoric rise to the top of the CCP's political hierarchy illustrating the ways in which his life of struggle and survival shaped his political career Dillon's biography addresses Xiaoping as both an intensely committed communist capable of playing a principal role in the Great Leap Forward from 1958 to 1961 while incurring the wrath of Mao only ten years later as he was exiled and purged during the Cultural Revolution Emphasizing Deng Xiaoping's effectiveness as a party operator and political bruiser rather than an intellectual capable of formulating the reforms for which he eventually took credit this book sheds light on Deng's ability to capitalize upon the planning expertise of other party members This biography of the central figure in China's economic liberalization is essential for any reader interested in or affected by China's rise to global Twilight of the Gods - Götterdämmerung over the "New World Order" Stefan Engel, 2016-03-02 For prominence the title of this book author Stefan Engel employs an allegory from German mythology in the g tterd mmerung the twilight of the gods the end of the world engulfs the worn out gods of an antiquated age and out of the world conflagration grows an admirable new world of peace an full joyous live The parallel with the decline of the present ruling stratum of world society and the preparation of a new future well worth living is intended The book wrests this vision from the realm of mythology and places it on a scientific foundation It conveys a perspective to all those for whom the g tterd mmerung of ruling world finance capital does not signify the end of history but the starting point for an new epoch of the social development of humanity without hunger exploitation and war Comrades! Robert Service, 2007 Service offers a history of communism drawing the uncomfortable conclusion that the poverty and injustice that enabled its rise are still dangerously alive Unsettling and compelling this is a comprehensive study of one of the most important movements of the modern world Chinese

Investment in Africa David N. Abdulai, 2016-11-03 China leads the world when it comes to investment and influence on the African continent The extent of Chinese investment in Africa is well known and much has been written about China's foray into Africa However most of the available material has approached this issue by looking at China as the New Colonialist more interested in Africa's vast natural resources than working in partnership for sustained development Whilst China's interest in Africa's resources is evident it is just half of the story China's foray into Africa goes beyond its appetite for natural resources and into the realm of geo politics and international political economics For example China is all too aware of how it can cultivate Africa's support on global issues at the United Nations and at other international fora Breaking free from the binary arguments and analysis which characterize this topic Professor Abdulai presents a refreshing perspective that China's foray into Africa can produce win win outcomes for China and Africa if Africans really know what they want from China Hitherto each African country has tended to engage China with an individual bucket list acting in isolation and not as part of a wider continent indeed Africa and the African Union does not yet have a coordinated policy towards China For Africa to be able to do that it needs to know where China is coming from the factors that contributed to its awakening and success and the benefits and possible pitfalls of this foray in order to better position itself for a win win engagement with China This book will be a valuable read for policy makers think tanks and students of Africa China studies programmes alike China's New Red Guards Jude Blanchette, 2019 In China's New Red Guards Jude Blanchette illuminates two trends in contemporary China that point to its revival of Mao Zedong's legacy a development that he argues will result in a more authoritarian and more militaristic China This book not only will reshape our understanding of the political forces driving contemporary China it will also demonstrates how ideologies can survive and prosper despite pervasive rumors of their demise **Chinese Foreign** Policy in Transition Guoli Liu, 2004-01-01 Since the establishment of the People's Republic of China in 1949 and particularly after the opening brought about by economic reforms roughly thirty years thereafter China has become an influential player in regional and global affairs Increasingly both American and European policymakers examine Chinese foreign policy as a flexible pragmatic and significant element in world affairs This has accelerated in the middle of the new first decade of this century as business firms and political officials have developed interests in the sources processes and significance of China's reemergence as a global force This volume examines how in conjunction with rapid economic growth and profound social transformation China's foreign policy is experiencing significant transition. The purpose of this truly deep and probing collection is to deepen Western understanding of the sources substance and significance of Chinese foreign policy with a focus on the post Cold War environment Contributors include academic specialists area researchers and distinguished journalists all with firsthand experience in the field of China studies The volume is divided into four parts 1 theory and culture 2 perspective and identity 3 bilateral relationships and 4 retrospective and prospective essays on Chinese policy concerns The volume is sensitive to changes in national leadership and Communist Party structure as well as

continuity and change in foreign policy As Lowell Dittmer of the University of California notes in his Foreword precisely because it is so difficult to do well the analysis of foreign policy is often conducted rather tritely. Thus it is a real pleasure to find assembled here a treasure trove of some of the finest work by some of the field s most penetrating minds This is fortunate for at the core of this volume is one of the biggest and most portentous questions to confront the world at the outset of the twenty first century That question is in the decades to come what role will China play in the world As the homeland of about a fifth of mankind this question is almost guaranteed relevance whatever the fate of China's domestic economy Guoli Liu is associate professor of political science and international relations at the College of Charleston in South Carolina Chinese Foreign Policy in Transition is an extremely useful collection of articles by leading China scholars Lucian W Pye Foreign Affairs Mao's Invisible Hand Sebastian Heilmann, Elizabeth J. Perry, 2020-10-26 Observers have been predicting the demise of China's political system since Mao Zedong's death over thirty years ago The Chinese Communist state however seems to have become increasingly adept at responding to challenges ranging from leadership succession and popular unrest to administrative reorganization legal institutionalization and global economic integration What political techniques and procedures have Chinese policymakers employed to manage the unsettling impact of the fastest sustained economic expansion in world history As the authors of these essays demonstrate China's political system allows for more diverse and flexible input than would be predicted from its formal structures Many contemporary methods of governance have their roots in techniques of policy generation and implementation dating to the revolution and early PRC techniques that emphasize continual experimentation China's long revolution had given rise to this guerrilla style decisionmaking as a way of dealing creatively with pervasive uncertainty Thus even in a post revolutionary PRC the invisible hand of Chairman Mao tamed tweaked and transformed plays an important role in China's adaptive governance
