

# PROBLEM-SOLVING

## DEFINITION

Problem-solving is a cognitive process used to identify, analyze, and resolve challenges or obstacles. It involves evaluating various solutions and selecting the most suitable one based on the given criteria. Effective problem-solving requires critical thinking, creativity, and the ability to apply different strategies and techniques.

## EXAMPLES

- **Five Whys:** The Five Whys method is a problem-solving technique that involves asking "why" five times to drill down into the root cause of an issue.
- **Pro-Con Analysis:** A pro-con analysis helps in weighing the advantages and disadvantages of a decision, facilitating more informed and balanced choices.

*The Influence of Culture on Human Resource Management Processes and Practices* Dianna Stone, Eugene Stone-Romero, 2007-12-07 This book with contributions from expert academics is designed to motivate both the further development of models concerned with the influence of cultural diversity on several human resource management processes and practices and the design and conduct of empirical research on the same topic      *Police Selection and Training* J.C. Yuille, 2012-12-06 The New Police Officer During the past twenty years the tasks required of police officers have expanded and changed with dramatic rapidity The traditional roles of the police had been those of law enforcement and the maintenance of public order As a consequence police officers were typically large bodied males selected for their physical abilities and trained to accept orders and enforce the law Over the past two decades however the industrialized nations have placed a variety of new demands on police officers To traditional law enforcement and public order tasks have been added social work mental health duties and community relations work For example domestic disputes violence between husbands and wives lovers relatives etc have increased in frequency and severity or at least there has been a dramatic increase in reporting the occurrence of domestic violence Our societies have no formal system to deal with domestic disputes and the responsibility to do so in most countries has fallen to the police In fact in some areas as many as 60% of calls for service to the police are related to domestic disputes see the chapter in this text by Dutton As a result the police officer has had to become a skilled social worker able to intervene with sensitivity in domestic situations Alternatively in the case of West

Germany the officer has had to learn to work co operatively with social workers see the chapter by Steinhilper **Modern Methods in High School Teaching** Harl Roy Douglass,1926 This volume addresses teachers and principals presenting a comprehensive treatment of the methods of teaching in high schools The author assumes a familiarity on the part of his readers with the nature of the learning process adolescence and the psychological foundations of interests and motives as they relate to whole hearted pupil activity The fundamentals of both theory and practice are set forth and an attempt has been made to outline and describe the newer types of procedure which are being employed in different subjects in the best secondary schools Throughout the volume the attempt has been made clearly to represent practices rather than to advocate their adoption The reader is permitted to draw his own conclusions The book will appeal to the type of reader who wants to be intelligent about what is going on in high school teaching Human Performance on the Flight Deck Don

Harris,2016-12-05 Taking an integrated systems approach to dealing exclusively with the human performance issues encountered on the flight deck of the modern airliner this book describes the inter relationships between the various application areas of human factors recognising that the human contribution to the operation of an airliner does not fall into neat pigeonholes The relationship between areas such as pilot selection training flight deck design and safety management is continually emphasised within the book It also affirms the upside of human factors in aviation the positive contribution that it can make to the industry and avoids placing undue emphasis on when the human component fails The book is divided into four main parts Part one describes the underpinning science base with chapters on human information processing workload situation awareness decision making error and individual differences Part two of the book looks at the human in the system containing chapters on pilot selection simulation and training stress fatigue and alcohol and environmental stressors Part three takes a closer look at the machine the aircraft beginning with an examination of flight deck display design followed by chapters on aircraft control flight deck automation and HCI on the flight deck Part four completes the volume with a consideration of safety management issues both on the flight deck and across the airline the final chapter in this section looks at human factors for incident and accident investigation The book is written for professionals within the aviation industry both on the flight deck and elsewhere for post graduate students and for researchers working in the area
