Self And Social Context:

Self and Social Context Ray Holland, 1979 *Self and Social Identity in Educational Contexts* Kenneth I. Mavor, Michael J. Platow, Boris Bizumic, 2017-02-24 This innovative volume integrates social identity theory with research on teaching and education to shed new and fruitful light on a variety of different pedagogical concerns and practices. It brings together researchers at the cutting edge of new developments with a wealth of teaching and research experience. The work in this volume will have a significant impact in two main ways. First and foremost, the social identity approach that is applied will provide the theoretical and empirical platform for the development of new and creative forms of practice in educational settings. Just as the application of this theory has made significant contributions in organisational and health settings, a similar benefit will accrue for conceptual and practical developments related to learners and educators from small learning groups to larger institutional settings and in the development of professional identities that reach beyond the classroom. The chapters demonstrate the potential of applying social identity theory to education and will stimulate increased research activity and interest in this domain. By focusing on self, social identity and education, this volume investigates with unprecedented clarity the social and psychological processes by which learners' personal and social self-concepts shape and enhance learning and teaching. *Self and Social Identity in Educational Contexts* will appeal to advanced students and researchers in education, psychology and social identity theory. It will also be of immense value to educational leaders and practitioners, particularly at tertiary level.

An Introduction to Sociology Open University. Faculty of Social Sciences, 1981

The Conceptual Self in Context Ulric Neisser, David A. Jopling, 1997-08-13 This book explores the self concept, its cultural, psychopathological and philosophical implications.

Self- and Social-Regulation Bryan Sokol, Ulrich Muller, Jeremy Carpendale, Arlene Young, Grace Iarocci, 2010-01-27 This volume is a valuable resource for student and professional researchers interested in executive function, emotion and social development.

Self and Identity : Fundamental Issues Richard D. Ashmore, Professor of Psychology, Rutgers University, Lee Jussim, Associate Professor of Psychology, Rutgers University, 1997-04-17 Self and identity have been important yet volatile notions in psychology since its formative years as a scientific discipline. Recently, psychologists and other social scientists have begun to develop and refine the conceptual and empirical tools for studying the complex nature of self. This volume presents a critical analysis of fundamental issues in the scientific study of self and identity. These chapters go much farther than merely taking stock of recent scientific progress. World-class social scientists from psychology, sociology and anthropology present new and contrasting perspectives on these fundamental issues. Topics include the personal versus social nature of self and identity, multiplicity of selves versus unity of identity and the societal, cultural and historical formation and expression of selves. These creative contributions provide new insights into the major issues involved in understanding self and identity. As the first volume in the Rutgers Series on Self and Social Identity, the book sets the stage for a productive second century of scientific analysis and heightened understanding of

self and identity Scholars and advanced students in the social sciences will find this highly informative and provocative reading Dr Richard D Ashmore is a professor and Dr Lee Jussim is an associate professor in the Department of Psychology at Rutgers University New Brunswick New Jersey The Social Context of James Ensor's Art Practice Susan M.

Canning,2022-10-20 Vive la Sociale This rousing revolutionary statement written on a bright red banner across the top of James Ensor's Christ's Entry into Brussels in 1889 served as a visual manifesto and call to action by the Belgian artist 1860-1949 one that announced with an insistent public voice the centrality of his art practice to the cultural discourse of modern Belgium This provocative declaration serves as the title for this new study of Ensor's art focusing on its social discourse and the artist's interaction with and at times satirical encounter with his contemporary milieu Rather than the alienated and traumatized Expressionist given preference in modern art history Ensor is presented here as an artist of agency and purpose whose art practice engaged the issues and concerns of middle class Belgian life society and politics and was informed by the values and class race and gendered perspectives of his time Ensor's radical vision and oppositional strategy of resistance self-fashioning and performance remains relevant This book with its timely nuanced reading of the art and career of this often misunderstood artist's artist invites a re-evaluation not only of Ensor's social context and expressive critique but also his unique contribution to modernist art practice **Social Context and Cognitive Performance** Pascal Huguet, Jean-Marc

Monteil,2013-05-24 Based on twenty years of research on the social regulation of academic performances this book offers theoretical and empirical arguments in favour of the inclusion of the social dimension of human beings as essential for their cognitive activities We all engage in social interactions compare ourselves with other people belong to social groups and are the object of a myriad of categorisations Not only do such social experiences affect cognition but they actually determine its form and its content Several experiments indeed reveal that cognitive performance depends on the relationship between the individual and the social context in which cognition takes place And this relationship is not forged directly by features of the situation but rather by personal construals of these features most notably social comparison This fact alone justifies granting the individual's social experiences a psychological status and it further strengthens the key idea of this book namely that the social context only exists through the intervention of cognitive processes of contextualization producing a cognitive context of the self such as those involved in autobiographical memory A social psychology of cognition is suggested in which the fashionable distinction between cognition and social cognition makes no sense From this innovative perspective it is indeed more the social nature of the individual rather than that of the object to be processed that defines the social nature of cognition Well known phenomena such as social facilitation and social loafing as well as established educational practices are also re-examined from this perspective **Attitudes, Behavior, and Social Context** Deborah J. Terry, Michael A.

Hogg,1999-11-01 The reasons why people do not always act in accord with their attitudes has been the focus of much social psychological research as have the factors that account for why people change their attitudes and are persuaded by such

influences as the media There is strong support for the view that attitude behavior consistency and persuasion cannot be well understood without reference to the wider social context in which we live Although attitudes are held by individuals they are social products to the extent that they are influenced by social norms and the expectations of others This book brings together an international group of researchers discussing private and public selves and their interaction through attitudes and behavior The effects of the social context on attitude behavior relations and persuasion is the central theme of this book which in its combination of theoretical exposition critique and empirical research should be of interest to both basic and applied social psychologists **The Self and Social Relationships** Joanne V. Wood, Abraham Tesser, John G.

Holmes, 2013-05-13 Although the two major research areas of the Self and Social Relationships have flourished they have done so largely independently of each other More and more research however has indicated that relationships shape the nature of the self and identity and that self views influence interpersonal processes and the manner in which people navigate their close relationships The integration of research on self and social relationships has proved a particularly rich one generating some of the most creative and insightful theories in psychology The Self and Social Relationships is the first volume that marks expedites and defines this exciting new research synthesis It serves both as a platform for authors to present their latest ideas on the topic and to encourage continued integration in this emerging field The contributions represent a diverse set of perspectives from social personality and clinical psychology Each chapter covers a topic that is central to the study of self and relationships and presents some of the most exciting research programs in the field This volume is essential reading for researchers and students in the areas of both self and relationships Social interaction,

Social Context, and Language Dan Isaac Slobin, Julie Gerhardt, Amy Kyratzis, Jiansheng Guo, 2014-07-10 This collection of essays is a representative sample of the current research and researchers in the fields of language and social interactions and social context The opening chapter entitled Context in Language is written by Susan Ervin Tripp whose diverse and innovative research inspired the editors to dedicate this book to her honor Ervin Tripp is known for her work in the fields of linguistics psychology child development sociology anthropology rhetoric and women s studies She has played a central role in the definition and establishment of psycholinguistics child language development and sociolinguistics and has been an innovator in terms of approaches and methods of study This book covers a wide range of research interests in the field from linguistically oriented approaches to social and ethnography oriented approaches The issue of the relationships between forms and structures of language and social interactions is examined in studies of both adult and child speech It is a useful anthology for graduate students studying language and social interaction as well as for researchers in this field The Role of Context in Language Teachers' Self Development and Motivation Amy S. Thompson, 2021-02-09 This book unpacks data from conversations with bi multilingual EFL teachers whose L1s are languages other than English and who are from understudied contexts Argentina Egypt Estonia Senegal Turkey Ukraine and Vietnam to provide insights into the formation of

ideal teacher selves The author discusses the complexities surrounding the development of the teachers selves and motivation as well as their intertwinement with the sociopolitical realities of their individual contexts The work reveals how these realities and the specific social interactions that occur therein influence the language learning and teaching processes it also challenges the notions of and the need for a native non native speaker dichotomy in the field Expanding on Ushioda s 2009 person in context approach and reflecting on the multilingual settings of the teachers the integration of the context specific politics of language learning and teaching is a fresh approach to work in motivation The Social Self in Zen and American Pragmatism Steve Odin,1996-01-01 This is the first book on East West comparative thought to critically analyze the Zen Buddhist model of self in modern Japanese philosophy from the standpoint of American pragmatism **The Psychology of the Social Self** Tom R. Tyler,Roderick M. Kramer,Oliver P. John,2014-04-04 Leading theoreticians and researchers present current thinking about the role played by group memberships in people s sense of who they are and what they are worth The chapters build on the assumption developed out of social identity theory that people create a social self that both defines them and shapes their attitudes and behaviors The authors address new developments in the theoretical frameworks through which we understand the social self recent research on the nature of the social self and recent findings about the influence of social context upon the development and maintenance of the social self Individual Self, Relational Self, Collective Self Constantine Sedikides,Marilynn B. Brewer,2001 This volume is a comprehensive collection of critical essays on *The Taming of the Shrew* and includes extensive discussions of the play s various printed versions and its theatrical productions Aspinall has included only those essays that offer the most influential and controversial arguments surrounding the play The issues discussed include gender authority female autonomy and unruliness courtship and marriage language and speech and performance and theatricality *Interactions between emotions and social context - Basic, clinical and non-human evidence* Maria Ruz,Agustin Ibanez,Sonja A E Kotz,Louise Barrett,Jorge Moll,2014-07-17 The emotions that we feel and also those that we perceive in others are crucial to the social functioning of both humans and non human animals Although the role of context has been extensively studied in basic sensory processing its relevance for social cognition and emotional processing is little understood In recent years several lines of research at the behavioral and neural levels have highlighted the bidirectional interactions that take place between emotions and social context Experienced emotions even when incidental bias decision making Remarkably even basic emotions can be strongly influenced by situational contexts In addition both humans and non human animals can use emotional expressions strategically as a means of influencing and managing the behavioral response of others in relation to specific environmental situations Moreover social emotions e g engaged in moral judgment empathic concern and social norms seem to be context dependent which also questions a purely abstract account of emotion understanding and expression as well as other social cognition domains The present Research Topic of Frontiers in Human Neuroscience highlights the need for a situated approach to emotion and social cognition We

presented theoretical and empirical work at the behavioral and neural levels that contribute to our understanding of emotion within a highly contextualized social realm and vice versa Relevant contributions are presented from diverse fields including ethology neurology biology cognitive and social neuroscience and as well as psychology and neuropsychiatry This integrated approach that entails the interaction between emotion and social context provide important new insights into the growing field of social neuroscience

Children's Development Within Social Context Lucien T. Winegar, Jaan Valsiner, 2013-09-05

These companion volumes bring together research and theoretical work that addresses the relations between social context and the development of children They allow for the in depth discussion of a number of vital metatheoretical theoretical and methodological issues that have emerged as a result of increased investigation in these areas For example Which methodological and statistical procedures are appropriate and applicable to studies of social context and processes of development Should the nature of social context be reconceptualized as something more than different levels of some social independent variable Are theories of development that do not consider social context incomplete Will the increasingly finer definitions of social context lead to extreme situationism and contextualism As developmental theory and investigation continues to address relationships between social and cognitive development it becomes increasingly important that issues concerning social context be elaborated and discussed

The Social Self Joseph P. Forgas, Kipling D. Williams, 2014-02-04

What is the nature of the self how do everyday experiences shape it and how does it influence our thinking judgements and behaviors Such questions constitute enduring puzzles in psychology and are also of critical practical importance for applied domains such as clinical counseling educational and organizational psychology In this book a select group of eminent international researchers survey the most recent advances in research of the self In particular they discuss the influence of cognitive and intra psychic processes Part 1 interpersonal and relational variables Part 2 and inter group phenomena on the self Part 3

The Effect of Social Context on the Structure of the Self Craig Allen Johnson, 1990 Submitted in partial fulfillment of the requirements for the degree of Master of Arts in Social Psychology in the Graduate School of Syracuse University

Memory in a Social Context Takashi Tsukiura, Satoshi Umeda, 2017-12-15 This book explores new points of view of human memory in the link among mind brain and society Research of human memory traditionally has been in the field of experimental psychology and a number of psychological researchers have come upon important findings regarding human memory They have provided critical theories to explain human memory processes but this approach is hitting a brick wall The experimental psychological approach or laboratory based approach to human memory functions is examined in a very controlled environment but the evidence obtained from this approach may not necessarily reflect real life events in our mind In addition findings from experimental psychology have often ignored the link with biological structures or the brain One solution is a cognitive neuroscience approach in which functional neuroimaging techniques have enabled us to view how memory processes are represented in the brain In addition the new approach extends the traditional concept of human

memory into a wider framework by reconsidering memory functions in a social context. These advanced approaches help us to understand how social memory is represented in the human brain and is processed in real life situations. The work reported in this volume is at the forefront of cognitive neuroscience in the research of human memory in a social context and the potential application of memory research. This book will help to motivate young scientists and graduate and undergraduate students in psychology and neuroscience.
