

The background of the entire image is a vibrant sunset or sunrise scene. A silhouette of a person stands in the foreground on the left, with their arms raised high in a gesture of triumph or joy. They are standing in a field of tall grass. Several butterflies are scattered throughout the scene, some in flight against the colorful sky. The sky transitions from deep reds and oranges near the horizon to lighter pinks and yellows towards the top. A white rectangular box with a blue border is positioned in the upper right corner, containing the main title text.

If the universe is aimless, how do selves and aims emerge? Why do living beings have aims when inanimate things do not? Current science encourages us to reject the ghost in the machine explanation that something called spirit, soul, mind or will was somehow breathed into matter and instead accept that selves are just matter in aimless mechanistic motion like everything else. But what about life's many emergent qualities, the multifarious purposes that shape actual physical behavior, not just in human lives but in all of life? Even the simplest life forms have adaptive functions, traits that accomplish goals or ends. How can we explain the nature and origin of selves and aims without resorting to supernatural forces or explaining them away as nothing but cause and effect mechanisms? In *Neither Ghost nor Machine*, Jeremy Sherman explains the emergence of selves and aims in an aimless universe. He distills for a general audience the theory developed by renowned neuroscientist Terrence Deacon, which extends the breakthrough constraint-based insight that inspired evolutionary information and self-organization theory. Emergent dynamics theory provides a testable hypothesis for how mattering arose from matter, function from physics and means to ends, behavior from cause and effect dynamics. It offers a physics of purpose, demonstrating that there is a strictly physical explanation for the emergence and nature of selves and aims, one that shows our existence in an otherwise inanimate universe is not absurd. *Neither Ghost nor Machine* bridges the gap between the hard and soft sciences, suggesting fresh and exciting solutions to philosophical mysteries that have perplexed humanity for millennia, from free will to causality to morality. *Neuro-Coaching with emotionSync* Christian Hanisch, Claudia Wilimzig, 2017-05-03. Neuro-Coaching and effective Psychotherapy. The new way to solve problems and to create a better future. What is this book about? It is about solving mental blocks. Why don't we do

something even though we long for it Why don't we achieve our goals Why are we unhappy depressed and suffered from terrible fears Something is in our head which inhibits ourselves Limits ourselves So much that we are not fulfilling our potential and prevent ourselves from being successful How psychotherapy or coaching based on physical and physiological especially neuro electric principles can work can be read here The humorous work up is just as informative for laymen as for experienced therapists
