J. Mozzochi,2004 Part I The purpose of this part of the monograph is to discuss the hypnotic response and to present two methods for achieving it Part II The purpose of this part of the monograph is to outline an extremely effective procedure for obtaining self control through the use of tape recordings which you can easily make yourself This part of the monograph contains a new idea for although the idea of giving commands to oneself directly without the formal use of hypnosis goes back at least to Cou c 1920 and no doubt much farther a careful search of the literature seems to indicate that the idea of programming by means of the repeated use of a recording the subconscious mind to respond directly to arbitrary commands from the conscious mind is original with the author and consistent with the conclusions of other researchers His method helps a person realize his or her potential in what appears to be an innate ability Operating Manual for Enlightenment Lincoln Stoller,2024-11-01 This book is not offering enlightenment it s describing it The enlightened mind unites intellect and emotion despite their separation being built into the structure of our brains This split appears in the mythic division between our lower and higher natures and the separation of mind and body Intellect and emotion function in concert As color and shape are to vision one complements the other When fully integrated they cannot be taken apart The topics in the book s first half lean toward the intellectual The second half looks at the division from the emotional side What we are separating with one hand we are putting together with the other Struggle We naturally consider our problems as different from ourselves We see them in our environment and rely on our skills and insights to resolve them Our intellectual solutions address one aspect of these problems while our emotions address another Are these problems to be solved or processes to be understood What should we do if our problems are inside us Mind Your state determines your readiness arousal and self reflection Your state of mind orients your thinking how you can feel about yourself and who you re able to be Equally important are thoughts you re not likely to have or cannot have at all This book is about the states of mind that support focus awareness thoughts and feelings It s is not a guide to solving problems it s an explanation of how you see State With our state of mind we gather our thoughts and focus our attention Focus without a state is like a telescope with no one to look through it In order to focus first take full responsibility for all you think and feel The properties of your state determine what you re capable of One state of mind is not enough because you cannot understand the world from one point of view Your future is determined by your range
