Self Society Social Change Individua:

Identity and Social Change Joseph E. Davis, 2017-07-12 *Identity and Social Change* examines the thorny problem of modern identity Trenchant critiques have come from identity politics focusing on the construction of difference and the solidarity of minorities and from academic deconstructions of modern subjectivity This volume places identity in a broader sociological context of destabilizing and reintegrating forces The contributors first explore identity in light of economic changes consumerism and globalization then focus on the question of identity dissolution Zygmunt Bauman examines the effects of consumerism and considers the constraints these place on the disadvantaged Drawing together discourses of the body and globalization David Harvey considers the growth of the wage labor system worldwide and its consequences for worker consciousness Mike Featherstone outlines a rethinking of citizenship and identity formation in light of the realities of globalization and new information technologies Part two opens with Robert Dunn s examination of cultural commodification and the attenuation of social relations He argues that the media and marketplace are part of a general destabilization of identity formation Kenneth Gergen maintains that proliferating communications technologies undermine the traditional conceptions of self and community and suggest the need for a new base for building the moral society In the final chapter Harvie Ferguson argues that despite the contemporary infatuation with irony the decline of the notion of the self as an inner depth effectively severs the long connection between irony and identity

The Internet and Social Change Carla G. Surratt, 2017-07-06 Starting with only four hosts in 1969 the Internet consisted of more than 56 million hosts by the end of 1999 In 1993 the World Wide Web was only 130 sites strong six years later it boasted more than seven million sites Despite this explosive growth of the Internet and computer technology little is known about the social implications of computer mediated communications In this work the author uses social science theory to evaluate the social transformations taking place today She asks whether human beings use the Internet to change basic social institutions and if so whether these changes are a matter of degree only or represent an overthrow of previous modes of organizing The work examines the rise of the Internet as the logical extension of the Industrial Revolution and urbanization consistent with the basic tenets of modernity and offers a new conceptual framework through which to understand the Internet
