Phenomenology and Embodiment Joona Taipale, 2014-02-28 At the dawn of the modern era philosophers reinterpreted their subject as the study of consciousness pushing the body to the margins of philosophy With the arrival of Husserlian thought in the late nineteenth century the body was once again understood to be part of the transcendental field And yet despite the enormous influence of Husserl's phenomenology the role of embodiment in the broader philosophical landscape remains largely unresolved In his ambitious debut book *Phenomenology and Embodiment* Joona Taipale tackles the Husserlian concept also engaging the thought of Maurice Merleau-Ponty Jean-Paul Sartre and Michel Henry with a comprehensive and systematic phenomenological investigation into the role of embodiment in the constitution of self awareness intersubjectivity and objective reality In doing so he contributes a detailed clarification of the fundamental constitutive role of embodiment in the basic relations of subjectivity

Phenomenology and the Problem of Time Michael R. Kelly, 2016-09-15 This book explores the problem of time and immanence for phenomenology in the work of Edmund Husserl Martin Heidegger Maurice Merleau-Ponty and Jacques Derrida Detailed readings of immanence in light of the more familiar problems of time consciousness and temporality provide the framework for evaluating both Husserl's efforts to break free of modern philosophy's notions of immanence and the influence Heidegger's criticism of Husserl exercised over Merleau-Ponty's and Derrida's alternatives to Husserl's phenomenology Ultimately exploring various notions of intentionality these in-depth analyses of immanence and temporality suggest a new perspective on themes central to phenomenology's development as a

movement and raise for debate the question of where phenomenology begins and ends *Inter- and Transcultural Learning in the Context of Canadian Young Adult Fiction* Grit Alter, 2015 Within the past few years transcultural learning has become one of the key terms in TEFL theory Central concerns in current research include differentiating between inter and transcultural learning navigating processes of understanding otherness and assessing cultural competences Using these aspects this study investigates texts recommended for cultural learning and key components of implementing literature in ELT The results call for a more holistic perception of alterity and argue in favour of transcultural literature as a basis for transcultural learning All of this dissertation is in English Subjects Literary Criticism Education Series

Costello,2012-01-01 Layers in Husserl s Phenomenology provides close readings and

analyses of a number of Husserl's key translated and untranslated works across the entirety of his corpus. While maintaining a dialogue with four decades worth of scholarship on Husserl, Peter R. Costello provides a number of new and significant insights that depart from earlier interpretations of his work along with a revised consistent translation of a number of important Husserlian terms. *Layers in Husserl's Phenomenology* situates Husserl firmly within the trajectory of later Continental thought and contributes to the recent reconsideration of Husserl as a legitimate precursor to the thought of Maurice Merleau-Ponty, Emmanuel Levinas, and Jacques Derrida. Written in a readable style appropriate for both undergraduate and graduate students, this study will be valued by those interested in phenomenology in general and in Husserl in particular.

The Concept of Passivity in Husserl's Phenomenology Victor Biceaga, 2010-06-16 Building upon Husserl's challenge to oppositions such as those between form and content and between constituting and constituted, *The Concept of Passivity in Husserl's Phenomenology* construes activity and passivity not as reciprocally exclusive terms but as mutually dependent moments of acts of consciousness. The book outlines the contribution of passivity to the constitution of phenomena as diverse as temporal syntheses, perceptual associations, memory fulfillment, and cross-cultural communication. The detailed study of the phenomena of affection, forgetting, habitus, and translation sets out a distinction between three meanings of passivity: receptivity, sedimentation, or inactuality, and alienation. Husserl's texts are interpreted as defending the idea that cultural crises are not brought to a close by replacing passivity with activity but by having more of both.

Subjectivity and Selfhood Dan Zahavi, 2008-08-29 What is a self? Does it exist in reality or is it a mere social construct, or is it perhaps a neurologically induced illusion? The legitimacy of the concept of the self has been questioned by both neuroscientists and philosophers in recent years. Countering this in *Subjectivity and Selfhood*, Dan Zahavi argues that the notion of self is crucial for a proper understanding of consciousness. He investigates the interrelationships of experience, self-awareness, and selfhood, proposing that none of these three notions can be understood in isolation. Any investigation of the self, Zahavi argues, must take the first-person perspective seriously and focus on the experiential givenness of the self. *Subjectivity and Selfhood* explores a number of phenomenological analyses pertaining to the nature of consciousness, self, and self-experience in light of contemporary discussions in consciousness research. Philosophical phenomenology, as developed by Husserl, Heidegger, Sartre, Merleau-Ponty, and others, not only addresses crucial issues often absent from current debates over consciousness but also provides a conceptual framework for understanding subjectivity. Zahavi fills the need given the recent upsurge in theoretical and empirical interest in subjectivity for an account of the subjective or phenomenal dimension of consciousness that is accessible to researchers and students from a variety of disciplines. His aim is to use phenomenological analyses to clarify issues of central importance to philosophy of mind, cognitive science, developmental psychology, and psychiatry. By engaging in a dialogue with other philosophical and empirical positions, says Zahavi, phenomenology can demonstrate its vitality and contemporary relevance.
