## Self Portraits:

500 Self-Portraits Julian Bell, 2004-04 The mirror above all the mirror is our teacher wrote Leonardo da Vinci Portraits are an endless source of fascination responding as they do to the basic human impulse to scrutinize a face and strive to peer into the person behind it Self portraits have the added fascination that comes from looking into the mirror and trying to study one's own face and the elusive self lurking behind its surface This striking and sensitive compilation presents an uninterrupted sequence of 500 self portraits in chronological order all the way from ancient Egypt to the late twentieth century and including painting drawing sculpture and photography The challenge of interpreting and re creating their own likenesses has proven irresistible to artists throughout the ages Included here are powerfully evocative works by many of the world's greatest painters and sculptors from Dürer and Rembrandt to Frida Kahlo and Andy Warhol Each image is both a work of art and a rigorous exploration in psychology and self perception Presented without commentary these works speak for themselves a compelling collection for every student of art and human nature The illuminating introduction is by the renowned painter and writer Julian Bell

self     **Modelling the Individual** ,2022-05-20 One of the most noticeable features of the Renaissance is what Jacob Burckhardt called the rise of the individual in politics and religion in its social life and in the arts and in the mentality of Renaissance man with his inclination to explore to invent and to make new discoveries Yet this characteristic is also very puzzling to modern people who see that although the categories of art which depict particular people increased to a spectacular degree in a period when biography and portrait painting were among the most popular genres and autobiography began to emerge as a genre in itself and painters began to produce self portraits an interest individuals is not necessarily the same thing as the more recent interest in the purely personal aspects of individuals Literary and artistic traditions social and ideological backgrounds and the motives for the production of literature have changed profoundly Renaissance biography and autobiography portraiture and self portraiture have little to do with their modern counterparts Therefore this book stresses that the Renaissance is not predominantly a mirror of modernity but rather a period of stimulating difference or alterity The contributors to this collection of essays aim to create a better understanding of Renaissance biographies and portraits through the analysis and reconstruction of the traditions contexts backgrounds and circumstances of their production     *Eye to I* National Portrait Gallery (Smithsonian Institution), Brandon Brame Fortune, 2019 This richly illustrated book features an introduction by the National Portrait Gallery's chief curator and nearly 150 insightful entries on key self portraits in the museum's collection *Eye to I* provides readers with an overview of self portraiture while revealing the intersections that exist between art life and self representation Drawing primarily from the museum's collection *Eye to I* explores how American artists have portrayed themselves since 1900 The book shows that while each individual's approach to self portraiture arises under unique circumstances all of their representations raise important questions about self perception and self reflection Sometimes artists choose to reveal intimate details of their inner lives Other times they use the genre to obfuscate their true selves or invent alter egos Today with the proliferation of selfies and the contemporary focus on identity it is time to reassess the significance of the self portrait Exhibition National Portrait Gallery Washington D C USA 02 11 2018 18 28 2019
