Self, Sign, and Symbol Mark Neuman, Michael Payne, 1987 These essays wrestle with a number of postformalist questions and are ordered so as to present a new argument for the self sufficiency of the text Collectively they suggest that recovery of interest in the meaning of texts and the exchange between writer and reader may become the next new criticism

Hegel and the Symbolic Mediation of Spirit Kathleen Dow Magnus,2001-08-09 Employs Derrida s critique of Hegel as the impetus for a new understanding of Hegel s concept of spirit

Nothingness Jytte Bang,2017-07-05 This book addresses nothingness as not only the intangible presence of an emotional cultural social or even political void that is felt on an existential level but has some solid foundations in reality The death of a loved one the social isolation of an individual or

the culture shock one may experience in another country are examples of situations in which an external sense of absence mirrors an internal psychological and philosophical sense of nothingness. Not much has been explicitly written on nothingness in the history of psychology. On the other hand, nothingness seems to be implicitly embedded in many scholars' work. This duality of explicitly and implicitly expressed ideas about nothingness reveals how psychology finds inspiration in philosophy and vice versa. The book aims to illustrate how the concept of the presence of absence, nothingness, fills a void in contemporary psychological theorizing.

A Manual of Church Decoration and Symbolism Ernest Geldart, 1899 *The Pale Criminal* Stephen J. Costello, 2018-05-08

It was Freud borrowing Nietzsche's phrase from Thus Spoke Zarathustra who described as pale criminals those who committed criminal acts out of deep lying unconscious guilt. The focus of this challenging and penetrating study is on this type of criminality. The book brings a unifying vision and theoretical integration to the array of perspectives and theories in this field. He draws together for the first time the thoughts on the subject of Sigmund Freud, Carl Jung, Melanie Klein, Donald Winnicott, and Jacques Lacan. It examines the contributions of both orthodox and evolutionary psychiatry and explores the role of family experience in shaping the pale criminal. The result is an ambitious theory of criminality, a depth psychological psychoanalytic model of the human being. In the early chapters, the author provides a judicious and even-handed exposition of his chosen thinkers' views before proceeding to an impressive and well-argued dialectical synthesis in which each theoretical perspective is used to correct, qualify, or supplement the others. In a diffuse and divided field, this volume should provide an indispensable source of clarification and a stimulus to open creative debate.

Rethinking Creativity Vlad Petre Glăveanu, Alex Gillespie, Jaan Valsiner, 2014-07-25

Despite more than half a century of psychological research on creativity, we are still far from a clear understanding of the creative process, its antecedents and consequences, and most of all, the ways in which we can effectively support creativity. This is primarily due to a narrow focus on creative individuals isolated from culture and society. *Rethinking Creativity* proposes a fundamental review of this position and argues that creativity is not only a psychological but a sociocultural phenomenon. This edited volume aims to relocate creativity from inside individual minds to the material, symbolic, and social world of culture. It brings together eminent social and cultural psychologists who study dynamic, transformative, and emergent phenomena and invites them to conceptualise creativity in ways that depart from mainstream definitions and theoretical models existing in past and present literature on the topic. Chapters include reflections on the relationship between creativity and difference, creativity as a process of symbolic transformation, the role of apprenticeships and collaboration, the importance of considering materiality and affordances in creative work, and the power of imagination to construct individual trajectories. The diverse contributions included in this book offer readers multiple pathways into the intricate relationship between mind, culture, and creativity and invite them to rethink these phenomena in ways that foster creative action within their own life and the lives of those around them. It will be of key interest to both social and cultural psychologists as well as to creativity researchers and those who as

part of their personal or professional life try to understand creativity and develop creative forms of expression **The**
