## **Selfishness Altruism And Rationality:**

Selfishness, Altruism, and Rationality Howard Margolis, 1984-10-15 Why do we volunteer time Why do we contribute money Why even do we vote if the effect of a single vote is negligible Rationality based microeconomic models are hard pressed to explain such social behavior but Howard Margolis proposes a solution He suggests that within each person there are two selves one selfish and the other group oriented and that the individual follows a Darwinian rule for allocating resources between those two selves Howard Margolis's intriguing ideas provide an alternative to the crude models of rational choice that have dominated economics and political science for too long Times Literary Supplement      **Selfishness, altruism, and rationality. a theory of social choice** Howard Margolis, 1982      **Selfishness, Altruism, & Rationality** Howard Margolis, 1979      *Ethics, Rationality, and Economic Behaviour* Francesco Farina, Frank Hahn, Stefano Vannucci, 1996 The connection between economics and ethics is as old as economics itself and central to both disciplines The essays included in the present volume provide an analysis of the connections between ethics and economics as viewed from several different oft      **The End of Rationality and Selfishness** Rui-Wu Wang, 2023-05-16 This book reviews the antinomy of rationality and selfishness raised from egoism though rationality and selfishness are understood as basic evolutionary dynamics of humans and other organisms in both classical economics and evolutionary biology Based on the research and a comparison with human's social cooperative behavior the author presents his belief that the social cooperative system in its essence cooperation and conflict are of uncertain stochasticity resulting from their intrinsic asymmetric interaction between cooperative partners The book then discusses limitations of Newton's methodology of monism in both biology and social science The understanding of the asymmetric and uncertain characteristics found in cooperation system needs perspective of quantum physics of pluralism At the end of the book the author undertakes a review of consistency of Newtonian and monism philosophy and the links between quantum physics and pluralism philosophy      Choice, Welfare and Measurement Amartya Sen, 1997 Choice Welfare and Measurement contains many of Amartya Sen's most important contributions to economic analysis and methods including papers on individual and social choice preference and rationality and aggregation and economic measurement A substantial introductory essay interrelates his diverse concerns and also analyzes discussions generated by the original papers focusing on the underlying issues P 4 of cover      **Modeling Rationality, Morality, and Evolution** Peter Danielson, 1998-10-29 This collection focuses on questions that arise when morality is considered from the perspective of recent work on rational choice and evolution Linking questions like Is it rational to be moral to the evolution of cooperation in The Prisoners Dilemma the book brings together new work using models from game theory evolutionary biology and cognitive science as well as from philosophical analysis Among the contributors are leading figures in these fields including David Gauthier Paul M Churchland Brian Skyrms Ronald de Sousa and Elliot Sober      **Anarchy and the Law** Edward P. Stringham, 2017-07-05 Private property anarchism also known as anarchist libertarianism individualist anarchism

and anarcho capitalism is a political philosophy and set of economic and legal arguments that maintains that just as the markets and private institutions of civil society provide food shelter and other human needs markets and contracts should provide law and that the rule of law itself can only be understood as a private institution To the libertarian the state and its police powers are not benign societal forces but a system of conquest authoritarianism and occupation But whereas limited government libertarians argue in favor of political constraints anarchist libertarians argue that to check government against abuse the state itself must be replaced by a social order of self government based on contracts Indeed contemporary history has shown that limited government is untenable as it is inherently unstable and prone to corruption being dependent on the interest group politics of the state s current leadership Anarchy and the Law presents the most important essays explaining debating and examining historical examples of stateless orders Section I Theory of Private Property Anarchism presents articles that criticize arguments for government law enforcement and discuss how the private sector can provide law In Section II Debate limited government libertarians argue with anarchist libertarians about the morality and viability of private sector law enforcement Section III History of Anarchist Thought contains a sampling of both classic anarchist works and modern studies of the history of anarchist thought and societies Section IV Historical Case Studies of Non Government Law Enforcement shows that the idea that markets can function without state coercion is an entirely viable concept Anarchy and the Law is a comprehensive reader on anarchist libertarian thought that will be welcomed by students of govern

**Heroes, Saints, and Ordinary Morality** Andrew Michael Flescher, 2003-11-25 Most of us are content to see ourselves as ordinary people unique in ways talented in others but still among the ranks of ordinary mortals Andrew Flescher probes our contented state by asking important questions How should ordinary people respond when others need our help whether the situation is a crisis or something less Do we have a responsibility an obligation to go that extra mile to act above and beyond the call of duty Or should we leave the braver responses to those who are somehow different than we are better somehow heroes or saints Traditional approaches to ethics have suggested there is a sharp distinction between ordinary people and those called heroes and saints between duties and acts of supererogation going beyond the expected Flescher seeks to undo these standard dichotomies by looking at the lives and actions of certain historical figures Holocaust rescuers Martin Luther King Jr Dorothy Day among others who appear to be extraordinary but were in fact ordinary people Heroes Saints and Ordinary Morality shifts the way we regard ourselves in relationship to those we admire from afar it asks us not only to admire but to emulate as well further it challenges us to actively seek the acquisition of virtue as seen in the lives of heroes and saints to learn from them a dynamic aspect of ethical behavior that goes beyond the mere avoidance of wrongdoing Andrew Flescher sets a stage where we need to think and act calling us to lead lives of self examination even if that should sometimes provoke discomfort He asks that we strive to emulate those we admire and therefore allow ourselves to grow morally and spiritually It is then that the individual develops a deeper altruistic sense of self a state that allows us to respond as the heroes of our own

lives and therefore in the lives of others when times and circumstance demand that of us      *Recent Developments in the Foundations of Utility and Risk Theory* L. Daboni, Aldo M. Montesano, M. Lines, 2012-12-06 The Second International Conference on Foundations of Utility and Risk Theory was held in Venice June 1984 This volume presents some of the papers delivered at FUR 84 The First International Conference FUR 82 was held in Oslo and some of the papers presented on that occasion were published by Reidel in the volume *Foundations of Utility and Risk Theory with Applications* edited by Bernt P Stigum and Fred Wenst p The theory of choice under uncertainty involves a vast range of controversial issues in many fields like economics philosophy psychology mathematics and statistics The idea of discussing these problems in international conferences has been successful two conferences have been held and others will follow The climate of the debate has changed in the meantime partly as a result of these conferences It is no more only a question of attacking or defending the neo Bernoullian assumptions but also of proposing wider generalizations and including new elements in the analysis of the decision process For instance Amartya Sen comparing the two current notions of rationality internal consistency and self interest pursuit introduces the concept of reasoning and considers the irrationality which may result from the failure of a positive correspondence between reasoning and choice or from a limited capacity of reasoning Rationality is also considered with respect to the controversial axiom of strong independence John C Harsanyi introduces the concept of practical certainty i e

**The Institutional Dynamics of Culture, Volumes I and II** Perri Six, 2018-12-20 These two volumes present the most important recent developments in the institutional theory of culture and demonstrate their practical applications Sometimes called grid group analysis or cultural theory they derive from the work of Durkheim in the 1880s and 1900s and develop the insights of the anthropologist Mary Douglas and her followers from the 1960s on First redefined within social and cultural anthropology the theory s influence is shown in recent years to have permeated all the main disciplines of social science with substantial implications for politics history business work and organizations the environment technology and risk and crime and consumption Today the institutional theory of culture now rivals the rational choice Weberian and postmodern outlooks in influence across the social sciences      **The New Palgrave** John Eatwell, Murray Milgate, Peter Newman, 1990 Each volume in this series includes a collection of authoritative essays from the New Palgrave A Dictionary of Economics selected by the Editors to illustrate the range and diversity of economic thought on a particular topic

*Rationality and Freedom* Amartya Sen, 2002 Rationality and freedom are among the most profound and contentious concepts in philosophy and the social sciences In this the first of two volumes Amartya Sen brings clarity and insight to these difficult issues      Other People's Struggles Nicholas Owen, 2019-05-30 Other People s Struggles is the first attempt in over forty years to explain the place of conscience constituents in social movements Conscience constituents are people who participate in a movement but do not stand to benefit if it succeeds Why do such people participate when they do not stand to benefit Why are they sometimes present and sometimes absent in social movements Why and when is their participation

welcome to those who do stand to benefit and why and when is it not The work proposes an original theory to answer these questions crossing disciplinary boundaries to draw on the findings of social psychology philosophy and political theory in search of explanations of why people act altruistically and what it means to others when they do so The theory is illustrated by examples from British history including the anti slavery movement the women s suffrage and liberation movements labor and socialist movements anti colonial movements anti poverty movements and movements for global justice Other People s Struggles also contributes to new debates concerning the rights and wrongs of speaking for others Debates concerning the limits of solidarity who can be an ally and on what terms have become topical in contemporary politics especially in identity politics and in the newest social movements The work provides a theoretical and empirical account of how these questions have been addressed in the past and how they might be framed today

The Socio-economics of Crime and Justice Brian Forst, 2016-06-16 This book on crime and justice is motivated primarily by the idea that individual behaviour is influenced both by self interest and by conscience or by a sense of community responsibility Forst has assembled a collection of authors who are writing in four parts 1 the philosophical foundations and the moral dimension of crime and punishment 2 the sense of community and the way it influences the problem of crime 3 on offenders and offences and 4 on the response of the criminal justice system

*Revolution* Rosemary H. T. O'Kane, 2000 All of the major work on the subject of revolutions is collected in this useful set Including work from seminal figures such as Hatto and Gottschalk in the 1940s as well as the most important literature all the way through 1998 the articles reprinted here consider the concept theory and causes of revolution revolutionary state building and the outcomes of revolutions case studies of great revolutions and much more

**Protecting the Elderly** Charles Lockhart, 2010-11-01 Building on the pioneering work of anthropologist Mary Douglas and political scientist Aaron Wildavsky this book develops and applies grid group theory to show how political culture can be used to explain decisions about social policy and how as an interpretive approach this theory complements the now more dominant rational choice and institutionalist models In Part One Lockhart elaborates on the basic ideas involved in grid group theory using examples to help illuminate how the theory can address areas of explanation left out of rational choice and institutionalist models such as preference formation and institutional design According to grid group theory different societies have varying proportions of their members who adhere to one or another of three ubiquitous socially interactive cultures hierarchy individualism and egalitarianism The adherents of these disparate cultures adopt culturally constrained rationalities based on rival sets of values and strive to construct distinctive institutional designs In Part Two this theory is used to help make better sense of social policy decision making A society whose political elite is predominantly hierarchical for instance will develop social programs sharply distinct from those of societies whose leaders are adherents of individualism or egalitarianism The empirical focus of this part of the book is on the decisions about policy affecting the elderly in the United States the former Soviet Union Germany and Japan during the economically difficult 1980s Important

aspects of these decisions Lockhart shows reflect the relative influence of rival cultural purposes among relevant societal elites

**Causes of Wealth of People** Yanchen Zhao, 2013-05 Based on ten years of study ten years of entrepreneurial experience and a further ten years of research Zhao Yanchen's *Causes of Wealth of People* lays out a comprehensive theory of entrepreneurship while at the same time serves as a practical guide for the entrepreneur First published in China in 2004 this new English edition is the first translation of the book to ever be published Analyzing all phases of business from project selection through operation and sales and equally at home discussing the benefits and necessity of the free market and the Tao of an enterprise the book provides novel and valuable insights on entrepreneurship from an Eastern philosophical perspective

Human and Artificial Intelligence in Group Decision and Negotiation José María Moreno-Jiménez, Danielle Costa Morais, María Teresa Escobar, Alberto Turón, 2025-05-31 This book constitutes the refereed proceedings of the 25th International Conference on Group Decision and Negotiation GDN 2025 which took place in Zaragoza Spain during June 2025 The field of Group Decision and Negotiation focuses on decision processes with at least two participants and a common goal but conflicting individual goals Research areas of Group Decision and Negotiation include electronic negotiations experiments the role of emotions in group decision and negotiations preference elicitation and decision support for group decisions and negotiations and conflict resolution principles The 12 full papers included in these proceedings were carefully reviewed and selected from 99 submissions They were organized in topical sections as follows AI Ethics and Societal Impact in Group Decision and Negotiation Preference Modeling Evaluation and Decision Support in Group Contexts and Conflict Modeling in Complex Decision Environments

*From Individual to Collective Intentionality* Sara Rachel Chant, Frank Hindriks, Gerhard Preyer, 2014-04 Acting together requires collective intentions The contributions to this volume seek to critically assess or to enrich theories of collective intentionality by exploring topics such as collective belief mutual coordination and the explanation of group behavior
