Atma Bodha By Shankaracharya Shraddhesh Chaturvedi, 2019-10-05 Traditionally Who am I has been the central quest of Vedic texts Knowing I without any external attributes such as body mind age etc is termed as self knowledge Or we can say that knowing what we are and what we are not constitutes the complete answer For example a transparent crystal placed near a hibiscus flower appears to be red Until we see it without the flower we ll not know that it is transparent and not red Similarly if our notion about ourselves is mixed with some external attributes which are different from us we ll perceive our reality differently This wrong perception will give rise to various conflicts like death pain and anxiety So it looks imperative to know our fundamental reality and taste the immortal bliss within Once we accept that there is something we need to know we talk about the ways in which the correct understanding can be reached We find ways to test that we have reached And we also want to know how this reality actually is In this short original and profound work Shankaracharya has answered these questions and shared his insight about non dual reality *Hermeneutical Essays on Vedāntic Topics* John Geeverghese Arapura, 1986 This book is a collection of essays on central topics of Vedanta arranged in a thematically

connected manner It facilitates a look inside the system from certain vantage points which are the topics divided into the main body and an appendix The topics in the main body are being Maya and the discourse about Brahman Transcendence and the Transcendent Via the Doctrines of Brahman and Sunyata the Notion of Aviadya Macro Micro Cosmology Approached through the Gita Text Time within Logos and without as in Grammer philosophy and Madhyamika **Paths to Transcendence** Reza Shah-Kazemi,2006-02-22 This groundbreaking book is the first to compare and illuminate the doctrine of the Transcendent Absolute and its implications both conceptually and experientially in the spiritual perspectives of three towering figures in the history of world religions Shankara Ibn Arabi and Meister Eckhart represent the metaphysical and mystical summits of Hinduism Islam and Christianity By focusing on the theme of transcendence often neglected in studies of religion and comparative mysticism this work takes the reader to the heart of Religion as such ultimately illuminating the unity of spiritual vision and experience which underlies all religious forms In our day when there is much strife between several religious factions the teachings of these great masters illustrated through rigorous analysis of key primary texts point to a path of true ecumenical understanding **A Conversation with an Atheist** Daniel McKenzie,2023-05-26 In A Conversation with an Atheist Daniel McKenzie takes on the thorny topic of God Countering religion s simple faith based answers to life s biggest questions McKenzie uses everyday logic and the teachings of non dual wisdom to make a clear case for God knowledge over God belief The book begins with a contentious dialog between an atheist and a sage who shares a vision of God that isn t in conflict with reality Taking inspiration from the Upanishads and the Bhagavad Gita The Song of God the author shows that in order to understand God we must first see it as two different operating principles before seeing it as a unified whole what he calls God 1 and God 2 The result is a cognitive shift that changes not only our view of God but also how we view ourselves and our connection to each other and the cosmos
