Lawrence R. Samuel,2025-07-28 This work whose target audience includes both historians and practitioners is a socioeconomic history of American consumers The author shows how over the past century Americans personal and national identities became heavily defined by how they spent money in the marketplace The American consumer is presented as a character on the national stage whose role changed significantly over time based on varying social economic and political conditions What did not change over the course of five different eras however was a continual transformation of Americans from citizens to consumers as the private sphere steadily eclipsed the public or civic arena The principal argument of the work is that alongside critics justifiable claims that American style consumption is ultimately unsustainable consumer culture has consistently served as a principal source of meaning and purpose in people s lives Key insights into the American idea and experience are revealed by charting the trajectory of consumers     *Food Is Love* Katherine J. Parkin,2011-06-03 Modern

advertising has changed dramatically since the early twentieth century but when it comes to food Katherine Parkin writes the message has remained consistent Advertisers have historically promoted food in distinctly gendered terms returning repeatedly to themes that associated shopping and cooking with women Foremost among them was that regardless of the actual work involved women should serve food to demonstrate love for their families In identifying shopping and cooking as an expression of love ads helped to both establish and reinforce the belief that kitchen work was women s work even as women s participation in the labor force dramatically increased Alternately flattering her skills as a homemaker and preying on her insecurities advertisers suggested that using their products would give a woman irresistible sexual allure a happy marriage and healthy children Ads also promised that by buying and making the right foods a woman could help her family achieve social status maintain its racial or ethnic identity and assimilate into the American mainstream Advertisers clung tenaciously to this paradigm throughout great upheavals in the patterns of American work diet and gender roles To discover why *Food Is Love* draws on thousands of ads that appeared in the most popular magazines of the twentieth and early twenty first centuries including the *Ladies Home Journal* *Good Housekeeping* *Ebony* and the *Saturday Evening Post* The book also cites the records of one of the nation s preeminent advertising firms as well as the motivational research advertisers utilized to reach their customers     **The Handbook of Food Research** Anne Murcott,Warren Belasco,Peter Jackson,2013-08-15

*Growing Girls* Susan A Miller,2007-07-20 In the early years of the twentieth century Americans began to recognize adolescence as a developmental phase distinct from both childhood and adulthood This awareness however came fraught with anxiety about the debilitating effects of modern life on adolescents of both sexes For boys competitive sports as well as primitive outdoor activities offered by fledging organizations such as the Boy Scouts would enable them to combat the effeminacy of an overly civilized society But for girls the remedy wasn t quite so clear Surprisingly the girl problem a crisis caused by the transition from a sheltered family centered Victorian childhood to modern adolescence where self control and a strong democratic spirit were required of reliable citizens was also solved by way of traditionally masculine adventurous outdoor activities as practiced by the Girl Scouts the Camp Fire Girls and many other similar organizations Susan A Miller explores these girls organizations that sprung up in the first half of the twentieth century from a socio historical perspective showing how the notions of uniform identity civic duty primitive domesticity and fitness shaped the formation of the modern girl **Historical and Archaeological Perspectives on Gender Transformations** Suzanne M. In many facets of Western culture including archaeology there remains a legacy of perceiving gender divisions as natural innate and biological in origin This belief follows that men are naturally pre disposed to public intellectual pursuits while women are innately designed to care for the home and take care of children In the interpretation of material culture accepted notions of gender roles are often applied to new findings the dichotomy between the domestic sphere of women and the
