Civil Society And The State In Singapore Carol Soon,Gillian Koh,2017-01-05 Set within the context of growing political pluralism and the increasing use of new communication technologies for social mobilisation the Institute of Policy Studies organised a national conference on civil society in November 2013 This collection of the essays that were presented at or inspired by the conference provides nuanced analyses of the development of the sector in Singapore since the Institute s first such conference held in 1998 The first section of the book discusses the different philosophies and approaches that underpin how civic activists engage with the State the second section examines some key forces of change that are re shaping the sector and the third section sets out some emerging issues facing it Combining insights from experts and civic activists themselves this book proposes an agenda for the future development of the civil society in Singapore Singapore, Spirituality, and the Space of the State Joanne Punzo Waghorne,2020-03-19 This book examines spirituality in Singapore showing how important the city state is for understanding contemporary global configurations of urban space religion and spirituality Joanne Punzo Waghorne highlights how the formal religious spaces temples churches and mosques have been confined to allotted sites on the map of Singapore whereas various spiritual organizations particularly of Hindu origins and headed by a guru still continue to operate as societies classified by the government with other clubs These unconventional religiosities are not confined but ironically make their own places meeting in ostensive secular venues high rise flats malls businesses and community centers thus existing in the overall space of religion commerce and the state The book argues that State of Singapore also operates between the secular and the religious constructing an overarching spatial regime that both accommodates and yet rivals the alternate spheres that spiritual movements construct under its umbrella Both spatial configurations challenge the presumed relationships between myth and reality religion and commerce the ethereal and the concrete the sacred and the secular on the levels of self community and polity Singapore now deemed a model for urban development in Asia also offers an understanding of a new post secularity and perhaps reveals where the urbanized world is headed The “Bare Life” of Thai Migrant Workmen in Singapore Pattana Kitiarsa,2014-01-05 Transnational labor migration often begins with the dream of securing a more stable and prosperous future a chance to survive The lure of global

cities as a place to attain that dream looms large within the context of rural urban migration flows This book reveals some of the complex phenomena and processes that strip bare the lives and dreams of migrant workers living abroad whose life experiences are overwhelmingly dominated by stress and suffering and diminished gendered roles The book illuminates the intimate aspects of how Thai male migrants have transcended their harsh reality while living under Singapore's strict regulations governing foreign workers Stripped bare of the powerful sociocultural economic and legal processes that govern their existence at home these men must recraft their gendered selfhoods identities and sensibilities Using personal and interpretive ethnography the book explores how popular music sports religious beliefs cultural traditions sexual desire and intimacy are refashioned by appropriating cultural and symbolic capital into new cultural experiences It also provides an extensive look at the sudden unexplained nocturnal death syndrome SUNDS among young healthy Thai construction workers in Singapore The author's in depth analyses of migrant social life and male migrant gendered identity negotiating processes provide an invaluable contribution to our understanding of labor transnationalism in the Southeast Asian context Highlights An important contribution to studies of the masculinization of migration Provides ample insight into the lived experience of migrant workers Explores an often forgotten side of labor migration that of sexual intimacy Adds a rich detailed

understanding of village transnationalism **Transformation of the Intimate and the Public in Asian Modernity**

,2014-08-07 This volume the first major study in its field offers an invaluable stepping stone to a more informed understanding of the fundamental social changes taking place in Asia defined as a reconstruction of the intimate and public spheres Such changes are being observed worldwide but previous studies relating to this phenomenon are largely based on Western experiences dating back to the 1970s Developments in Asia however are manifesting both similarities and differences between the two regions The book's strongest appeal therefore lies in its theoretical orientation seeking to define frameworks that are most relevant to the Asian reality These frameworks include compressed and semi compressed modernity familialism familialization policy unsustainable society the second demographic dividend care diamonds and the transnational public sphere Such concepts are seen as essential in any discussion concerning the intimate and public spheres of contemporary Asia Accordingly Transformation of the Intimate and the Public in Asian Modernity can be seen as a valuable text as well as a work of reference and will be welcomed by social scientists and cultural anthropologists alike The book comprises an in depth introduction and ten chapters contributed by scholars from Japan Korea Thailand and Canada covering topics ranging from low fertility changing life course increasing non regular employment care provision migrant workers social policies and family law to the activities of transnational NGOs with a special focus on distinctive features of Asian experiences *Imagining Heaven in the Middle Ages* Jan S. Emerson,2014-04-08 Medieval attempts to capture a glimpse of heaven range from the ethereal to the mundane utilizing media as diverse as maps cathedrals songs treatises poems visions and sewer systems Heaven was at once the goal of the individual Christian life and the end of the cosmic plan It was simply

stated perfection But interpretations varied from the traditional to the dangerously unique as artists and authors theologians and visionaries struggled to define that perfection Depending on the source heaven s attributes vary from height to depth darkness to light silence to symphony the souls within it from activity to passivity experience to essence participation to distant admiration Questions addressed in this anthology include Are erotic and spiritual love mutually exclusive Does the soul s happiness depend on the resurrection of the body What will be the nature of the transfigured body Will it retain its gender Will it have senses Will it know desire How can desire and fulfillment exist together Can the human soul ever know God Contributors to this volume examine well known and previously unexplored texts and artefacts from historical and art historical theological philosophical and literary perspectives to complement and challenge more general surveys of the history of heaven and above all to illuminate the richness and variety of medieval Christian ideas on heaven

Population Policy and Reproduction in Singapore Shirley Hsiao-Li Sun,2012 This book examines the relationship between population policies and individual reproductive decisions in low fertility contexts Using the case study of Singapore it demonstrates that the effectiveness of population policy is a function of competing notions of citizenship and the gap between seemingly neutral policy incentives and the perceived and experienced disparate effects Drawing on a substantial number of personal interviews and focus groups the book analyzes the developmental welfare state s overarching emphasis of citizen responsibility and examines population policies that reinforce social inequalities and ignore cultural diversity These factors combine to undermine elaborate state policy efforts in encouraging citizens biological reproduction The book goes on to argue that in order to facilitate positive fertility decisions the state needs to modify the economic production at all cost approach and pay much more attention to the importance of social rights This suggests that the Singapore government might profitably approach the phenomenon of very low fertility with major initiatives similar to those of other advanced industrialized societies This book offers a significant contribution to the literature on social policy East Asian and Southeast Asian studies
