*Staging England in the Elizabethan History Play* Ralf Hertel, 2016-04-01 Applying current political theory on nationhood as well as methods established by recent performance studies this study sheds new light on the role the public theatre played in the rise of English national identity around 1600 It situates selected history plays by Shakespeare and Marlowe in the context of non fictional texts such as historiographies chorographies political treatises or dictionary entries and cultural artefacts such as maps or portraits and thus highlights the circulation and mutation of national thought in late sixteenth century culture At the same time it goes beyond a New Historicist approach by foregrounding the performative surplus of the theatre event that is so essential for the shaping of collective identity How this study crucially asks does the performative art of theatre contribute

to the dynamics of the formation of national identity Although theories about the nature of nationalism vary a majority of theorists agree that notions of a shared territory and history as well as questions of religion class and gender play crucial roles in the shaping of national identity These factors inform the structure of this book and each is examined individually In contrast to existing publications this inquiry does not take for granted a pre existing national identity that simply manifested itself in the literary works of the period nor does it proceed from preconceived notions of the playwrights political views Instead it understands the early modern stage as an essentially contested space in which conflicting political positions are played off against each other and it inquires into how the imaginative work of negotiating these stances eventually contributed to a rising national self awareness in the spectators
