Trettin, 1991 Fourteen chapters discuss regional stratigraphy by time intervals from Precambrian to Quaternary while other chapters describe the geography geomorphology tectonics geophysical characteristics and resources of the region A summary chapter includes geologic maps structural cross sections a geotectonic correlation chart a gravity map and a location map for exploration wells in the Arctic Islands and northern Greenland A wealth of additional information is contained on the nine accompanying plates The Sedimentary Rocks of Devon Island, Canadian Arctic Archipelago R. Thorsteinsson, Ulrich Mayr, 1987 The present study deals mainly with the stratigraphy structural geology and environment of deposition of the strata of the Arctic Platform comprising mainly a structurally concordant succession of lower Palaeozoic strata in the western three quarters of the island **New Zealand Journal of Geology and Geophysics** , 1974 Global Geological Record of Lake Basins: Volume 1 E. Gierlowski-Kordesch, K. Kelts, 2006-11-23 The sequence of sediments deposited in lakes forms an archive of a high resolution record of the changes and rates of changes in continental palaeoenvironments Global Geological Record of Lake Basins is the first in a short series of books containing concise geological summaries of lake basin deposits Geoscientists worldwide have co operated to bring together the information available on a global spectrum of lacustrine deposits looking in particular at palaeoenvironmental aspects The compilation has resulted from IGCP 219 Comparative Lacustrine Sedimentology in Space and Time which has given impetus to the field of limnogeology Lacustrine deposits are widespread throughout the geological record and this series of books will assess for every geological time window key lacustrine sequences worldwide in the form of short summaries of specific deposits A common language will be defined to describe these deposits Aspects of Fluvial Sedimentation in the Lower Triassic Buntsandstein of Europe Detlef Mader, 2006-04-10 **Fish Physiology: The Physiology of Tropical Fishes** Adalberto Luis Val, Vera Maria Fonseca de Almeida e Val, David J. Randall, 2005-08-18 The Physiology of Tropical Fishes is the 21st volume of the well known Fish Physiology series and consists of 12 chapters The purpose of the book is to consolidate and integrate what is known about tropical fishes marine and freshwater species The twelve chapters focus on the physiological adaptations acquired during the evolutionary process to cope with warm and shallow hypoxic waters from tropical and neotropical hydrographic basins as well as with the intertidal and coral reef habitats which occur in abundance in tropical seas The special characteristics of tropical fish fauna will be issued in order to explain the tropical fish radiation which gave rise to such extreme fish diversity This present volume is a voyage through the tropical region reviewing the fish diversity of the main tropical freshwater sheds including the major tropical rivers and lakes the major dams and marine environments State of the art information on tropical fish physiology Written by specialists working in the Tropics Offers a diverse depiction of the various tropical fishes and the environment where they inhabit 12
