Genes on the Couch Paul Gilbert, Kent G. Bailey, 2014-07-10 Philosophers and therapists have long theorised about how psychological mechanisms for love jealousy anxiety depression and many other human characteristics may have evolved over millions of years In the dawn of the new insights on evolution provided by Darwin's theories of natural selection Freud Jung and Klein sought to identify and understand human motives emotions and information processing as functions deeply rooted in our evolved history Despite this promising start and major developments in modern evolutionary psychology anthropology and sociobiology the last fifty years has seen little in the way of therapies derived from an evolutionary understanding of human psychology The contributors to this timely book illuminate how an evolution focused approach to psychopathology can offer new insights for different schools of therapy and provide a rationale for therapeutic integration *Genes on the Couch* brings together respected clinicians who have integrated evolutionary insights into their case conceptualisations and therapeutic interventions Various psychotherapy schools are represented and each author provides illustrative examples of the interventions used Specific topics addressed include the nature of evolved mental mechanisms regulation dysregulation of internal processes attachment and kinship in therapy the importance of internalising warmth as a therapeutic goal kin selection and incest avoidance cooperation and deception in social relations difficulties in working with certain male clients gender differences in therapy and the roles of shame and guilt in treatment Providing up to date summaries of recent thinking in this increasingly important but

Family Systems Application to Social Work Karen Gail Lewis, 2015-07-24 Originally published in 1991 this title is a valuable social work text which demonstrated how to apply family system concepts to clinical situations encountered in work with inner city populations at the time Unlike traditional theories in clinical social work which were oriented toward the individual this fascinating book offers a paradigm for social work that encompasses the client his or her immediate and extended family the community the government and the social worker The family systems concepts in this refreshing volume are illustrated by case examples addressing the specific issues of AIDS and drug abuse homelessness foster care wife abuse care of those with intellectual disabilities and adoption issues Social workers and social work students can still gain perspective from these insightful chapters and will discover that it is not pathological people that make difficult populations but difficult life situations that breed pathology
