Bronze and Stone Yunchiahn C. Sena, 2019-04-01 Despite China's long tradition of venerating the past as the ultimate source of cultural authority the discourse of antiquity prior to the Song period 960-1279 demonstrated little concern for ancient objects With a focus on physical artifacts of the past Song intellectuals began a new discipline the study of bronze and stone jinshixue that generated collections of items such as bronze vessels and bells stone steles and ink rubbings of inscriptions carved or cast on objects This first comprehensive study in English of the Song antiquarian movement and how it refashioned the distant past uses textual and material evidence to examine this development which has had long lasting influence on Chinese intellectual history and on the preservation of material objects In addition to collecting and comparing artifacts Song antiquaries

compiled extensive catalogs that included drawings measurements and meticulous descriptions Their studies have contributed to the way history has been documented since the eleventh century and serve as a basis for archaeology of the modern period Bronze and Stone contextualizes the Song antiquarian movement among previous Chinese engagements with antiquity subsequent popular interest in ancient objects and world antiquarianism

So,1995 The supreme art form of ancient China was the bronze ritual vessel Kings and nobles offered food and drink to their ancestors in spectacular cast bronze containers which served to advertise the owner s wealth and power no less than his piety Many of the bronzes eventually found their way into the tombs of their owners where they lay undisturbed for centuries or millennia until accidental discovery or the archaeologist s spade brought them once more to light The vast collection of Chinese bronzes formed by the late Dr Arthur M Sackler ranges over the entire Bronze Age The bronzes of the Eastern Zhou period 8th to 3rd century BC are the subject of this third and concluding volume of the comprehensive catalogue of the collection In a thorough and up to date introduction Dr Jenny So Assistant Curator of Ancient Chinese Art at the Arthur M Sackler Gallery Smithsonian Institution gives a detailed account of the history of Eastern Zhou bronzes Particularly valuable is Dr So s systematic use of the latest archaeological discoveries to trace regional and chronological developments and to study the political context in which bronzes were made and used An especially valuable supplement to the volume is a major study of bronze bells coauthored by an archaeologist and an acoustical physicist Professor Lothar von Falkenhausen of UCLA and Professor Thomas D Rossing of Northern Illinois University The Sackler Collection includes twenty one bells which were employed in the same offering rituals as the bronze vessels Ninety color plates provide full documentation of the Sackler bronzes and over 560 black and white comparative illustrations help to set them in the context provided by archaeological research Scholarly appendices report elemental composition data on the bronze alloys lead isotope ratios and
