Class and the Communist Party of China, 1921-1978 Marc Blecher, David S G Goodman, Yingjie Guo, Jean-Louis Rocca, Tony Saich, 2022-02-24 Examining the interaction between the Communist Party of China CCP and specific social categories including peasants workers the middle classes and the dominant class with a focus on class and class discourse this volume analyses the CCP's impact on social change in China between 1921 and 1978 By exploring the CCP's evolving discourse of class this book demonstrates that while class has retained its centrality its meaning has been re-articulated from an ideological political tool to a less meaningful signifier though always used instrumentally By examining the impact of the CCP's policies and discourse surrounding class it also reveals how its own policies since 1921 have shaped the CCP's current 2021 perspectives on class and stratification This volume through an analysis of economic political and cultural inequalities in Chinese society even after 1949 also reveals the emergence of a diverse and often overlooked middle class in Chinese society during the 1950s Delivering a detailed analysis of how the CCP has developed its practical approaches to class and mobilization this study will be of interest to students and scholars of Chinese politics Chinese history Asian politics and Asian studies

Anyuan Elizabeth Perry, 2012-10-01 How do we explain the surprising trajectory of the Chinese Communist revolution Why has it taken such a different route from its Russian prototype An answer Elizabeth Perry suggests lies in the Chinese Communists creative development and deployment of cultural resources during their revolutionary rise to power and afterwards Skillful cultural positioning and cultural patronage on the part of Mao Zedong his comrades and successors helped to construct a polity in which a once alien Communist system came to be accepted as familiarly Chinese Perry traces this process through a case study of the Anyuan coal mine a place where Mao and other early leaders of the Chinese Communist Party mobilized an influential labor

movement at the beginning of their revolution and whose history later became a touchstone of political correctness in the People's Republic of China. Once known as China's Little Moscow, Anyuan came over time to symbolize a distinctively Chinese revolutionary tradition. Yet the meanings of that tradition remain highly contested as contemporary Chinese debate their revolutionary past in search of a new political future.

*Insurgency Trap* Eli Friedman, 2014-05-08

During the first decade of the twenty-first century, worker resistance in China increased rapidly despite the fact that certain segments of the state began moving in a pro-labor direction. In explaining this, Eli Friedman argues that the Chinese state has become hemmed in by an insurgency trap of its own devising and is thus unable to tame expansive worker unrest. Labor conflict in the process of capitalist industrialization is certainly not unique to China and indeed has appeared in a wide array of countries around the world. What is distinct in China, however, is the combination of postsocialist politics with rapid capitalist development. Other countries undergoing capitalist industrialization have incorporated relatively independent unions to tame labor conflict and channel insurgent workers into legal and rationalized modes of contention. In contrast, the Chinese state only allows for one union federation, the All China Federation of Trade Unions, over which it maintains tight control. Official unions have been unable to win recognition from workers, and wildcat strikes and other forms of disruption continue to be the most effective means for addressing workplace grievances. In support of this argument, Friedman offers evidence from Guangdong and Zhejiang provinces where unions are experimenting with new initiatives, leadership models, and organizational forms.

**A New Deal for China's Workers?** Cynthia Estlund, 2017-01-02

China's leaders aspire to the prosperity, political legitimacy, and stability that flowed from America's New Deal, but they are irrevocably opposed to the independent trade unions and mass mobilization that brought it about. Cynthia Estlund's crisp comparative analysis makes China's labor unrest and reform legible to Western readers.

**Understanding Chinese Society** Norman Stockman, 2013-07-08

This new book provides an accessible and wide-ranging introduction to the main features of Chinese society. Drawing on a wealth of material, the author offers a fresh understanding of a unique society that has undergone continuous transformation and upheaval throughout the twentieth century. *Understanding Chinese Society* looks in all its richness at the society with the largest population on earth. In order to explore long-term change and continuity, the book examines China from pre-revolutionary times to today's rapidly modernizing society, although the focus is on recent change. Particular attention is paid to China's cultural traditions and hierarchical relationships in familial and wider social settings and their fate in the modern world. Successive chapters investigate changes in the relations of rural and urban sectors of society, in the structure of families, in political and economic power, in cultural hegemony, education, and the media, and in patterns of social inequality. A final chapter asks whether Chinese society is becoming more complex and differentiated in the course of modernisation and considers recent debates on the growth of civil society and democratisation. This book will be indispensable for anyone studying Chinese society, Asian societies, and comparative sociology.

*The Ashgate Companion to the History of Textile Workers, 1650-2000* Dr Elise van

Nederveen Meerkerk, Mr Els Hiemstra-Kuperus, Prof Dr Lex Heerma van Voss, 2013-06-28 This impressive collection offers the first systematic global and comparative history of textile workers over the course of 350 years. This period covers the major changes in wool and cotton production and the global picture from pre industrial times through to the twentieth century. After an introduction the first part of the book is divided into twenty national studies on textile production over the period 1650-2000. To make them useful tools for international comparisons each national overview is based on a consistent framework that defines the topics and issues to be treated in each chapter. The countries described have been selected to include the major historic producers of woollen and cotton fabrics and the diversity of global experience and include not only European nations but also Argentina, Brazil, China, Egypt, India, Japan, Mexico, Turkey, Uruguay and the USA. The second part of the book consists of ten comparative papers on topics including globalization and trade, organization of production, space, identity, workplace, institutions, production relations, gender, ethnicity and the textile firm. These are based on the national overviews and additional literature and will help apply current interdisciplinary and cultural concerns to a subject traditionally viewed largely through a social and economic history lens. Whilst offering a unique reference source for anyone interested in the history of a particular country's textile industry, the true strength of this project lies in its capacity of international comparison. By providing global comparative studies of key textile industries and workers both geographically and thematically, this book provides a comprehensive and contemporary analysis of a major element of the world's economy. This allows historians to challenge many of the received ideas about globalization, for instance highlighting how global competition for lower production costs is by no means a uniquely modern issue and has been a feature of textile production for much of the last 350 years. As such, this collection will be welcomed by all scholars engaged in the history of the textile industry and international trade.

**Red Silk** Robert Cliver, 2021-02-01 *Red Silk* is a history of China's Yangzi Delta silk industry during the wars, crises and revolutions of the mid twentieth century. Based on extensive research in Chinese archives and focused on the 1950s, the book compares two very different groups of silk workers and their experiences in the revolution. Male silk weavers in Shanghai factories enjoyed close ties to the Communist party state and benefited greatly from socialist policies after 1949. In contrast, workers in silk thread mills or filatures were mostly young women who lacked powerful organizations or ties to the revolutionary regime. For many filature workers, working conditions changed little after 1949 and politicized production campaigns added a new burden within the brutal and oppressive factory regime in place since the nineteenth century. Both groups of workers and their employers had to adapt to rapidly changing circumstances. Their actions, protests, petitions, bribery, tax evasion, compelled the party state to adjust its policies, producing new challenges. The results, though initially positive for many, were ultimately disastrous. By the end of the 1950s, there was widespread conflict and deprivation among silk workers and despite its impressive recovery under Communist rule, the industry faced a crisis worse than war and revolution.
