**Middle Class Shanghai** Cheng Li, 2021-05-11 The United States may be headed toward a disastrous conflict with China unless Washington updates its understanding of contemporary Chinese society After four decades of engagement the United States and China now appear to be locked on a collision course that has already fomented a trade war seems likely to produce a new cold war and

could even result in dangerous military conflict The current deterioration of the bilateral relationship is the culmination of years of disputes disillusionment disappointment and distrust between the two countries Washington has legitimate concerns about Beijing's excessive domestic political control and aggressive foreign policy stances just as Chinese leaders believe the United States still has futile designs on blocking their country's inevitable rise to great power status Cheng Li's Middle Class Shanghai argues that American policymakers must not lose sight of the expansive dynamism and diversity in present day China The caricature of the PRC as a monolithic Communist apparatus set on exporting its ideology and development model is simplistic and misguided Drawing on empirical research in the realms of higher education avant garde art architecture and law this unique study highlights the strong constructive impact of bilateral exchanges Combining eclectic human stories with striking new data analysis this book addresses the possibility that the development of China's class structure and cosmopolitan culture exemplified and led by Shanghai could provide a force for reshaping U S China engagement Both countries should build upon the deep cultural and educational exchanges that have bound them together for decades The author concludes that U S policymakers should neither underestimate the role and strength of the Chinese middle class nor ostracize or alienate this force with policies that push it toward jingoistic nationalism to the detriment of both countries and the global community With its unique focus this book will enlighten policymakers scholars business leaders and anyone interested in China and its increasingly fraught relations with the United States

Knapp,2019-03-31 China s Old Dwellings is the most comprehensive critical examination of China s folk architectural forms in any language It and its companion volume China s Living Houses Folk Beliefs Symbols and Household Ornamentation UH Press 1999 together form a landmark study of the environmental historical and social factors that influence housing forms for nearly a quarter of the world s population Both books draw on the author s thirty years of fieldwork and extensive travel in China as well as published and unpublished material in many languages China s Old Dwellings begins by tracing the interest in Chinese vernacular buildings in the twentieth century Early chapters detail common and distinctive spatial components including the interior and exterior modular spaces that are axiomatic components of most Chinese dwellings as well as conventional structural components and building materials common in Chinese construction Later chapters examine representative housing types in the three broad cultural realms northern

southern and western into which China has been divided Knapp completes his survey with an exploration of China's old dwellings in the context of the rapid economic and social changes that are destroying so many of them China Constructing Capitalism Michael Keith, Scott Lash, Jakob Arnoldi, Tyler Rooker, 2013-09-23 China has been growing at over ten per cent annually since 1978 but this has only come to very widespread notice in the past decade This received wisdom about China has been largely of two types both of which more or less understand China in the context of neoliberalism The more business or business studies oriented literature seems to argue that if China does not adapt the rule of clear and distinct property and contract law in short of Western institutions its economy will stall The second set of voices is more clearly from the left arguing that the Chinese economy and city is neo liberal For them China does not diverge widely from the Anglo American model that from 2008 has brought the world economy to its knees China Constructing Capitalism takes issue with these analyses The authors argue that it is not Western neo liberalism that is constructing the Chinese economy but instead that China is constructing its own version of capitalism The two central theses of their argument are economic life neo liberal economic life is individualized and disembedded while the China model is relational and situated urban change China has created a form of local state capitalism which stands in contrast to neoliberal versions of the city This book analyses China as a risk culture examining among others Chinese firms and political ties property development migrant urbanisms and share trading rooms It scrutinises the ever present shadow of the risk averse yet uncertainty creating state China Constructing Capitalism is a must read for social scientists policy makers and investors
