Shanghai's Role In The Economic Development Of China Reform Of Foreign Trade And Investment:

Shanghai's Role in the Economic Development of China Gang Tian, 1996-11-25 This pioneering work presents for the first time a comprehensive study of the role of Shanghai in the economic development of China. Shanghai experienced stagnation and setbacks in comparison with other big cities and provinces in South China with the open door policy of 1979 and other economic reforms. In terms of export volume, use of foreign capital and overall economic growth, Shanghai remained behind Guangdong and Jiangsu. The fundamental question of why Shanghai maintained a lead position in the national economy and how it was neglected in the Special Economic Zones established in early 1980 is examined herein. In addition, the benefits of trade reform, comparative advantage and foreign direct investment in Shanghai's recent expansion is discussed.

Exports, Foreign Direct Investment and Economic Development in China X. Fu, 2004-08-20 This volume based on a series analysis using up to date econometric technique systematically investigates the role that exports and foreign direct investment (FDI) have played in China's development process and questions the received wisdom that exports and FDI are always an unalloyed blessing. It focuses on the transmission mechanisms through which exports and FDI influence growth and economic development and investigates the impact of exports and FDIs on employment, development, financing and productivity growth amongst other issues in China.

Economic Development and Inequality in China Hong Yu, 2017-09-29 The conventional belief that all regions have equally benefited from China's remarkable development over the last three decades is subjected to criticism in this book as Hong Yu systematically analyses the issue of regional inequality during the post 1978 period using the case of Guangdong. Guangdong is one of the key industrial centres and economic powerhouses in China and as a pioneer province instigating economic reform as China opened up to the world, it offers an ideal focus upon which to question and enrich the Western theories of economic geography and regional disparity. Based on field research, analysis of geographic characteristics and regression models, this book illustrates how Guangdong's impressive development record has been marred by its rising regional disparity, investigates the main causes of this disparity and draws conclusions regarding the lessons China can learn from it. **Economic Development and Inequality in China** will be of interest to students and scholars of Chinese economics, Chinese regional studies, economic geography and China Studies. Hong Yu is a Visiting Research Fellow at the National University of Singapore. His research interests lie in the field of regional economy. He is the author of a chapter on China's two delta regions in the book *China and The Global Economic Crisis*.

Provincial Strategies of Economic Reform in Post-Mao China Peter T. Y.
