Resources in Education ,2000 **Critical Issues in Foreign Language Instruction** Ellen S. Silber, 2013-09-13 First Published in 1991 This is Volume 22 of the Source Books on Education series Politically speaking the study of foreign languages and cultures helps maintain a strong competitive position in an increasingly global marketplace It was hard to imagine in 1957 that the launching of a Soviet rocket would push the United States into its greatest investment ever in foreign language education As American policy makers attempted to play catch up with our brothers and sisters behind the iron curtain this country infused federal dollars into extensive foreign language teacher training and the creation of new foreign language educational programs As suddenly as federal support was given however so was it taken away and its withdrawal was responsible for one

of the darkest periods in the history of foreign language education in America Drawing on the expertise of a number of the nation s most experienced and creative foreign language educators this volume edited by Ellen S Silber addresses some of the crucial problems we face in foreign language education today *Lasting Change in Foreign Language Education* John L. Watzke,2003-03-30 *Lasting Change in Foreign Language Education* presents a historical account of foreign language in general education The author examines the struggle of this subject discipline to align with the changing mission of secondary education as it emerged as the predominant institution enrolling students in the study of second languages This 100 year history suggests trends persistent across major periods of reform to explain current problems in the expansion of learning opportunities in foreign language Included is a complete database of education statistics on foreign language education and national and state education law from 1899 to the present Analysis of this data is presented in multiple formats to describe the historical capacity of the education system to achieve reform A review of contemporary standards based education initiatives in states and school districts similarly serves to reflect how historical trends continue to restrict change Concise policy implications are suggested as a means to address historical precedence and the greater mission of general education in the development of education policy and its transformation into practice Policy development must include a greater understanding of the historical development of foreign language in general education This vital link has been lacking in the past century as foreign language has struggled to realign itself with the changing mission of general education For example there are distinct curricular differences between a general education for all students and one for leadership and higher education Only the latter makes room for solid foreign language education In addition the study of foreign language has remained primarily a beginning level endeavor for the majority of students over the past century This trend results in significant pressure on the beginning level curriculum particularly during periods of reform to provide multiple academic outcomes in education **Performed Culture in Chinese Language Education** Guangyan Chen,2020-06-22 *Performed Culture in Chinese Language Education* A Culture Based Approach for U S Collegiate Contexts elaborates on a cultural awareness oriented cultural performance based and cross cultural communication focused foreign language pedagogical paradigm *Performed Culture Approach* in the context of U S collegiate Chinese language education Guangyan Chen draws on the data collected through questionnaires comparisons between this pedagogy and mainstream pedagogical frameworks and analyses of curricular development lesson plans and classroom discourses Chen promotes the performed culture approach by delineating the theoretical framework of this pedagogy reporting studies that empirically support cultural primacy in Chinese language education and illustrating this pedagogy through analyses of a curricular structure a lesson plan and classroom discourses Chen shows how this pedagogy addresses the gaps between the social need for global citizens and the insufficient integration of culture into foreign language education The performed culture approach also addresses the overall drop in U S collegiate foreign language enrollment as this pedagogy connects foreign language programs to university missions and

unique glimpse into the identity dynamics that learners need to manage in their interaction with contradictory relational contexts e.g. teacher vs. classmates, parents vs. friends and that appear to impair their perceived competence and declared achievement in language learning. Furthermore, this work presents a new model of identity which incorporates several educational psychology theories e.g. self-discrepancy, self-presentation, impression management, developmental theories of adolescence and principles of foreign language teaching and learning. This book gives rise to potentially policy-changing insights and will be of importance to those interested in the relationship between self-identity and language teaching and learning.
