Shared Care For Asthma:

Shared Care For Asthma Roland Clark, Jon Couriel, Stephen Holgate, Dr Mark Levy, Mark Levy, 1997-12-01 This text reviews the way family practitioners in the face of an increase in asthma cases can maximize a patient care regime and make referrals to hospitals and specialists when required It is divided into chapters addressing an explanation of the concept extent of the problem pathogenesis and appropriate molecular biology diagnosis management organization of care the professional healthcare interface and case studies

Shared Care Peter Edwards, Jones Stephen, Dennis Shale, Mark Thursz, 2018-04-19 Using practical examples this book demonstrates how a theoretical model for shared care operates in practice to deliver improved health outcomes within limited resources It shows how clinically led initiatives can influence health care commissioning strategies and how the implementation of the model meets the needs of clinicians purchasers and providers The model and evaluation protocols advocated here provide a firm foundation for the development of shared care in the future

Asthma Sebastian L. Johnston, Stephen T. Holgate, 2008-04-15 Asthma is one of the most important diseases affecting our society It is an extremely common condition that reduces quality of life and acute exacerbations can be life threatening It affects a disproportionate number of children With the overwhelming volume of research being carried out in this field specialists need a method of keeping up to date with current opinion As with the other Challenges books Challenges in Asthma is aimed at hospital specialists and therefore assumes a certain level of knowledge about the disease It builds on this by discussing only areas of controversy and uncertainty in both the basic understanding of asthma and its management An international author list will provide stimulating debate with and ultimately draw some conclusions from existing data which will benefit readers in their day to day practice

Clinical Asthma Jonathan Bernstein, Mark Levy, 2014-02-06 Enormous progress in asthma research has been made in the past 50 years including a greater understanding of its complex pathogenesis and new and more effective therapies Consequently the scientific literature has grown vast and can be difficult to integrate With contributions from a distinguished panel of world renowned authors Clinical Asthma

Muscle Resolution of Inflammation and Immunological Therapeutic Interventions in Asthma Trends in Asthma Research

Miroslav Tersa, 2005 Asthma is a disease that affects the lungs. It causes repeated episodes of wheezing, breathlessness, chest tightness, and night time or early morning coughing. Tens of millions of people throughout the world suffer from asthma. Airways are the paths that carry air to the lungs. As the air moves through the lungs, the airways become smaller, like branches of a tree. During an attack, the sides of the airways in the lungs become inflamed and swollen. Muscles around the airways tighten, and less air passes in and out of the lungs. Excess mucus forms in the airways, clogging them even more. The attack, also called an episode, can include coughing, chest tightness, wheezing, and trouble breathing. Environmental exposures such as house dust mites and environmental tobacco smoke are important triggers of an attack. This new book presents important new research on the causes of asthma as well as its diagnosis and treatment. Paediatrics for Lawyers S J

Staff, 2002-02-18 In the first 18 years of life, we change more than at any other stage in life. Infants and children can be assaulted by a bewildering variety of illnesses. This book attempts to explain the basics of paediatric practice and the rationale for medical decisions. Chronic Illness Care Timothy P. Daaleman, Margaret R. Helton, 2018-02-24 This book offers a comprehensive overview to chronic illness care, which is the coordinated, comprehensive, and sustained response to chronic diseases and conditions by a range of health care providers, formal and informal caregivers, healthcare systems, and community-based resources. Using an ecological framework, which looks at the interdependent influences between individuals and their larger environment, this unique text examines chronic illness care at multiple levels and includes sections on the individual influences on chronic illness, the role of family and social networks, and how chronic care is provided across the spectrum of health care settings, from home to clinic to the emergency department to hospital and residential care facilities. The book describes the organizational frameworks and strategies that are needed to provide quality care for chronically ill patients, including behavioral health care, management transitions of care, and health information technology. The book also addresses the changing workforce needs in health care and the fiscal models and policies that will be required to meet the needs of this population, with a focus on sustaining the ongoing transformation in health care. This book acts as a major reference for practitioners and students in medicine, nursing, social work, allied health, and behavioral medicine, as well as stakeholders in public health, health policy, and population health. *Evidence-Based Interventions for Social Work in Health*

Care Marcia Egan, 2009-12-04 Social work practice in health care requires that practitioners be prepared to meet the interdisciplinary and managed care demands for best practices in efficacious, time-limited, and culturally competent interventions with populations across the lifespan. This text is designed to meet that demand for evidence-based practice. The result of extensive systematic reviews, *Evidence-based Interventions for Social Work in Health Care* provides substantive, in-depth knowledge of empirically based interventions specifically for major and emerging medical diseases and health conditions, particularly affecting diverse, at-risk, and marginalized populations. It outlines best practices for the psychosocial

problems associated with the emerging chronic and major health conditions of the twenty first century such as paediatric asthma Type I and Type II diabetes obesity paediatric cancer and adult hypertension The interventions discussed are detailed in terms of for whom by whom when under what circumstances for what duration and for what level client system the intervention has proven most effective This invaluable text is suitable for students and will be a useful reference for practitioners specialising in social work in health settings

Difficult To Treat Asthma Sandhya Khurana, Fernando Holguin, 2019-08-29 This book provides a practical stepwise evidence based approach to effective management of patients with difficult to treat asthma The impact of asthma on morbidity and healthcare utilization increases exponentially with severity Severe refractory asthma accounts for less than 5% of all asthma Its prevalence however is often overestimated as there are several other confounding factors that make asthma difficult to treat Many novel albeit expensive therapies are now available and providers caring for patients with severe asthma are charged with selecting the best evidence treatment This calls for complex and nuanced decision making Whether people with asthma gain and maintain control over their condition depends not only on the availability of effective drugs but also multiple patient and healthcare provider behaviors Therefore now more than ever it has become increasingly important to differentiate difficult from severe refractory asthma to allow identification of patients most likely to benefit from these therapies This volume delves into the current understanding of mechanisms and increasingly recognized heterogeneity of this complex disease It discusses a structured approach to identification and optimization of factors contributing to poor asthma control including nonadherence comorbidities and occupational environmental triggers The book includes state of the art reviews on recent advances in

traditional and targeted asthma therapies as well as a glimpse into what the future may hold Highlights include a comprehensive guide to management of severe asthma in children and pregnancy as well as practical considerations to management of asthma based on different clinical phenotypes Each chapter is authored by leading experts in the field who share their own clinical approach This is an ideal guide for clinical pulmonologists and allergist immunologists as well as primary care providers physician extenders in specialty practice physicians in pulmonary allergy training and even industry partners

A Practical Guide to Cluster Randomised Trials in Health Services Research Sandra Eldridge,Sally Kerry,2012-01-09 Cluster randomised trials are trials in which groups or clusters of individuals are randomly allocated to different forms of treatment In health care these trials often compare different ways of managing a disease or promoting healthy living in contrast to conventional randomised trials which randomise individuals to different treatments classically comparing new drugs with a placebo They are increasingly common in health services research This book addresses the statistical practical and ethical issues arising from allocating groups of individuals or clusters to different interventions Key features Guides readers through the stages of conducting a trial from recruitment to reporting Presents a wide range of examples with particular emphasis on trials in health services research and primary care with both principles and techniques explained Topics are specifically presented in the order in which investigators think about issues when they are designing a trial Combines information on the latest developments in the field together with a practical guide to the design and implementation of cluster randomised trials Explains principles and techniques through numerous examples including many from the authors own experience Includes a wide range of references for those who wish to read further This book is intended as a practical guide written for researchers from the health professions including doctors psychologists and allied health professionals as well as statisticians involved in the design execution analysis and reporting of cluster randomised trials Those with a more general interest will find the plentiful examples illuminating

Recent Advances in Attempts to Improve Medication Adherence - from basic research to clinical practice, volume II Przemyslaw Kardas,Tamas Agh,Ines Potočnjak,Cristina Mihaela Ghiciuc,Maria Teresa Herdeiro,2024-12-04 This exciting Research Topic is the second volume of Recent Advances in Attempts to Improve Medication Adherence from basic research to clinical practice which you can explore here Adequate implementation of evidence based long term therapies is an issue of utmost importance It has a direct impact on both individual and public health as well as on the sustainability of healthcare systems Unfortunately despite more than half a century of extensive research and practical and awareness raising activities medication adherence remains far from perfect Many reasons are responsible for non adherence and the issue is complicated by the rapid aging of the global society the rising tide of non communicable chronic diseases multimorbidity and associated

polypharmacy This might be further exacerbated by certain conditions such as the Covid 19 pandemic However one thing is perfectly clear medication non adherence is no longer merely perceived as a patient problem In fact medication adherence depends on many non patient related factors and thus is an important indicator of the quality of care Therefore instead of blaming patients need to be supported in their therapeutic journeys Thus all the stakeholders need to collectively create adherence enabling environments and support patients in the execution of their therapies
