Banks and Shareholder Value Stephanie Gross, 2007-11-06 Foreword When CEO Joseph Ackermann set Deutsche Bank the target for 2005 of achieving at least 25% return on equity before tax he was sending out a clear signal Management in the German banking sector was finally realizing that it had to focus more on share holder interests Parallel to the discontinuation of German state guarantees Gewa tragerhaftung and Anstaltslast in

2005 there was a change in owner s requirements on members of the largest German banking group the Landesbanks and savings banks Some municipalities have been increasing pressure on their institutions to create grea ter financial value which will then allow higher payouts The increasing importance of shareholder value orientation in the banking sector poses at least three interesting sets of questions How should one measure economic value creation for shareholders in banking Does the banking sector possess any special features that have to be taken into consideration when measuring this To what extent do banks market values truly reflect expected shareholder value creation Which factors are responsible for systematic deviations of a bank s intrin sic value from its market value What are the key financial and operational levers that bank managers should focus on in order to increase shareholder value This dissertation by Ms Gross focuses on precisely these three sets of questions

Corporate Evaluation in the German Banking Sector Svend Reuse,2007-11-06 Foreword Corporate Evaluation in the German Banking sector is becoming more and more important In times of hostile takeovers missing success in the retail market and an unpleasant cost income ratio especially small cooperative banks and savings banks are facing a changed situation they have never expected The changing speed has increased dramatically in the German banking sector While selling of a savings bank was not possible even 5 years ago this hard frontier is broken up now Banks have to manage this changed situation in order to prevent to be taken over or to increase the own value and the own independency accordingly In both cases the quantification of the own value is an essential aspect The presented Master Dissertation of Svend Reuse solves theoretical and practical problems according to

this topic It combines actual value oriented management tools with the classical methods of corporate evaluation and the results of the actual status quo in the German banking sector The essentials can be summed up as follows First the theoretical status quo of corporate evaluation in the German banking sector was fixed The result is that only the earnings value method equity approach and multiplier method are useful for banks All entity models must be rejected as they do not consider the fact that a bank generates value with the liability side Discussing several bank individual evaluation models led to open questions

Executive Compensation and Shareholder Value Jennifer Carpenter, D. Yermack, 2013-04-17 Executive compensation has gained widespread public attention in recent years with the pay of top U S executives reaching unprecedented levels compared either with past levels with the remuneration of top executives in other countries or with the wages and salaries of typical employees The extraordinary levels of executive compensation have been achieved at a time when U S public companies have realized substantial gains in stock market value Many have cited this as evidence that U S executive compensation works well rewarding managers who make difficult decisions that lead to higher shareholder values while others have argued that the overly generous salaries and benefits bear little relation to company performance Recent conceptual and empirical research permits for the first time a truly rigorous debate on these and related issues which is the subject of this volume
