Sharing Security

Andrew Jaquith

Sharing Security:

Sharing Security M. Chalmers, 2016-04-30 Sharing Security is a unique and comprehensive study of a key yet often neglected feature of modern international society It begins by assessing how political theory can contribute to an understanding of international burdensharing It then analyses in turn why some Western states contribute more than others to common defences the European Union budget and overseas development aid It highlights the particular burdensharing problems involved in global regimes focusing on the UN s continuing financial crisis and the costs of combating global warming It argues that today s burdensharing disparities continue to be shaped by the particular character of the international settlement at the end of the Second World War

Safety and Security in Hotels and Home Sharing

Chelsea A. Binns, Robin J. Kempf, 2020-11-09 This brief comparatively reviews the security and safety features of hotels and home sharing services It reviews crime data laws and applicable theories such as defensible space rational choice and routine activity theories to determine how responsibility for crime control and accident prevention in these industries is allotted This analysis identifies key policy questions about the role of the home sharing hosts and guests in ensuring their own safety and security which will be of interest to policy makers researchers and practitioners in criminal justice and law enforcement as well as those involved in the home sharing and hotel industries

Encyclopedia of Cryptography, Security and Privacy Sushil Jajodia, Pierangela Samarati, Moti Yung, 2025-01-10 A rich stream of papers and many good books have been written on cryptography security and privacy but most of them assume a scholarly reader who has the time to start at the beginning and work his way through the entire text The goal of Encyclopedia of Cryptography Security and Privacy Third Edition is to make important notions of cryptography security and privacy accessible to readers who have an interest in a particular concept related to these areas but who lack the time to study one of the many books in these areas The third edition is intended as a replacement of Encyclopedia of Cryptography and Security Second Edition that was edited by Henk van Tilborg and Sushil Jajodia and published by Springer in 2011 The goal of the third edition is to enhance on the earlier edition in several important and interesting ways First entries in the second edition have been updated when needed to keep pace with the advancement of state of the art Second as noticeable already from the title of the encyclopedia coverage has been expanded with special emphasis to the area of privacy Third considering the fast pace at which information and communication technology is evolving and has evolved drastically since the last edition entries have been expanded to provide comprehensive view and include coverage of several newer topics

Blockchain: Empowering Secure Data Sharing Meng Shen, Liehuang Zhu, Ke Xu, 2020-07-15 With the development of big data data sharing has become increasingly popular and important in optimizing resource allocation and improving information utilization However the expansion of data sharing means there is an urgent need to address the issue of the privacy protection an area where the emerging blockchain technology offers considerable advantages Although there are a large number of research papers on

data sharing modeling and analysis of network security there are few books dedicated to blockchain based secure data sharing Filling this gap in the literature the book proposes a new data sharing model based on the blockchain system which is being increasingly used in medical and credit reporting contexts It describes in detail various aspects of the model including its role transaction structure design secure multi party computing and homomorphic encryption services and incentive mechanisms and presents corresponding case studies The book explains the security architecture model and the practice of building data sharing from the blockchain infrastructure allowing readers to understand the importance of data sharing security based on the blockchain framework as well as the threats to security and privacy Further by presenting specific data sharing case studies it offers insights into solving data security sharing problems in more practical fields The book is intended for readers with a basic understanding of the blockchain infrastructure consensus mechanisms smart contracts secure multiparty computing homomorphic encryption and image retrieval technologies
