**Sharing Time Troubles** Grace MacCarone, 1996 Sam searches through all of his toys but can't find anything good enough to take to school for show and tell until his troublesome little brother appears      **Sharing Time Troubles (Dot Book)** Grace MacCarone, 1997 Sam searches through all of his toys but can't find anything good enough to take to school for show and tell until his troublesome little brother appears      **The Trouble With Sharing** Aeri Lampinen, 2022-05-31 Peer to peer exchange is a type of sharing that involves the transfer of valued resources such as goods and services among members of a local community and or between parties who have not met before the exchange encounter It involves online systems that allow strangers to exchange in ways that were previously confined to the realm of kinship and friendship Through the examples in this book we encounter attempts to foster the sharing of goods and services in local communities and consider the intricacies of sharing homes temporarily with strangers also referred to as hospitality exchange or network hospitality Some of the exchange arrangements discussed involve money while others explicitly ban participants from using it All rely on digital technologies but the trickiest challenges have more to do with social interaction than technical features This book explores what makes peer to peer exchange challenging with an emphasis on reciprocity closeness and participation How should we reciprocate How might we manage interactions with those we encounter to attain some closeness but not too much What keeps people from getting involved or draws them into exchange activities that they would rather avoid This book adds to the growing body of research on exchange platforms and the sharing economy It provides empirical examples and conceptual grounding for thinking about interpersonal challenges in peer to peer exchange and the efforts that are required for exchange arrangements to flourish It offers inspiration for how we might think and design differently to better understand and support the efforts of those involved in peer to peer exchange While the issues cannot be simply solved by technology it matters which digital tools an exchange arrangement relies on and even seemingly small design decisions can have a significant impact on what it is like to participate in exchange processes The technologies that support exchange arrangements often platforms of some sort can be driven by differing sets of values and commitments This book invites students and scholars in the Human Computer Interaction community and beyond to envision and design alternative exchange arrangements and future economies      *FCC Record* United States.
