Sharks Of Polynesia:

Sharks of Polynesia Richard H. Johnson, 1978 **Sharks of Polynesia** Richard Hanslee Johnson, 1987 *Sharks of Tropical and Temperate Seas* Richard Hanslee Johnson, 1978 **Sharks of Tropical and Temperate Seas** Richard Hanslee Johnson, 1995 *Sharks of the Open Ocean* Merry D. Camhi, Ellen K. Pikitch, Elizabeth A. Babcock, 2009-01-21 This important and exciting title represents the first authoritative volume focussed on pelagic open ocean sharks as a group. Virtually every pelagic shark expert in the world has contributed to this landmark publication which includes the latest data and knowledge on pelagic shark biology, fisheries management and conservation. Pelagic sharks face unprecedented levels of exploitation in all the world's oceans through both direct fisheries and by catch and effective management for these species is contingent upon solid science and data which this book brings together for the first time. All those involved in shark biology will need to have a copy of this book. **Sharks in the Arts** Vivienne Westbrook, Shaun Collin, Dean Crawford, Mark Nicholls, 2018-05-11 This book is the most thorough exploration to date of the many ways in which a wild creature has been absorbed, reimagined and represented across the ages in all of the major art forms. The authors consider not only how the identity of sharks in the natural environment became incorporated into a cultural environment but also how sharks came to be considered the most feared creatures in the open oceans as a consequence of this incorporation. Yet sharks are especially important in helping to maintain a balance that is essential to the health of the oceans. The book begins with a treatment of the three sharks at the top of global shark attack files from scientific, economic and environmental perspectives. Subsequent chapters engage with cultural representations of sharks in poetry, drama, art, novels, screenplay adaptations and films. Through an exploration of the ways in which sharks have been represented in human culture through the centuries, this book alerts the global community to the importance of sharks as a common cultural heritage. It aims to change perceptions of sharks so that they can become more revered than feared. The authors of this book argue that an increased understanding of sharks should lead to the development of better strategies for shark and human interactions. This book will be of great interest to researchers and students of the Environmental Humanities, Cultural History and the Arts. It is also excellent supplementary reading for courses in Zoology and Marine Science. Conservation Physiology Christine L. Madliger, Craig E. Franklin, Oliver P. Love, Steven J. Cooke, 2021 This novel textbook provides the first consolidated overview of the scope, purpose and applications of conservation physiology with a focus on wildlife. It outlines the major avenues and advances by which the field is contributing to the monitoring, management and restoration of wild animal populations. **Sharks: Conservation, Governance and Management** Erika J. Techera, Natalie Klein, 2014-06-05 The key aim of this book is to explore the global conservation and management of sharks. There has been a rapid decline in populations of many shark species while new science has emerged of the critical role they play in marine ecosystems. However, the authors show that conservation law and policy have been slow to develop with only a small number of iconic species being protected worldwide. The increase in

fishing impact primarily through shark finning and by catch has led to shark conservation receiving greater international attention in recent years The book explores our current knowledge and status of the law and science in relation to sharks with a particular focus on improving frameworks for their conservation and management Recent trends are analysed including shark finning bans that have been put in place in several countries the widening number of nations establishing shark sanctuaries and the growth of shark based tourism The efficacy of current listing processes for endangered species and fisheries regulations is also examined Tourism is explored as an alternative to fishing and the risks and impacts associated with this industry are analysed Contributors include leading authorities from universities and conservation organizations in North America Europe and Australia A common theme is to emphasise the importance of collaborative governance between various interest groups and the need for inter disciplinary research and management approaches that are necessary to address the decline in sharks

Shark Daniel Abel, Sophie A. Maycock, 2025-03-18 A marvelously illustrated look at the life of the shark No two species of shark have the same life history yet these magnificent creatures share many things in common This one of a kind narrative biography brings together a wide array of species from habitats around the globe examining the biology ecology and behavior of sharks as well as their cultural role in human history Written by two experienced shark educators scientists and conservationists *Shark The Illustrated Biography* blends engaging profiles of selected species with captivating illustrations to offer an unparalleled exploration of the life and times of the shark Features a beautiful and informative array of watercolors Tells the biographical story of the shark using the life histories of representative species from birth and early family life to adolescence and the adult years Discusses sharks of all kinds such as Shortfin Makos Sandbar Sharks Spiny Dogfish Great Whites Tiger Sharks Basking Sharks Angel Sharks and Great Hammerheads Covers evolutionary history distinguishing features habitats reproduction and migration Examines the role of sharks in art music literature spirituality and mythology An essential must have reference for shark lovers everywhere [Shark Repellents](#)

In the Name of Sharks François Sarano, 2023-10-17 Twenty metres below water the oceanographer Fran ois Sarano came face to face with a five and a half metre great white shark Seduced by the gentle elegance of this majestic creature Sarano experienced a profound sense of affinity with her as they swam side by side shoulder to shoulder eye to eye cutting a single figure through the ocean depths It was an experience which made him realize the depth of our ignorance of the lives of sharks leading him to become a passionate advocate for their protection Drawing on the latest scientific research on the biology and ethology of sharks and their exceptional characteristics this book aims to break through the barrier of prejudice and to pay homage to their true nature Representing a last vestige of wildness their

populations are nevertheless under threat like so many species they have been hunted and exploited by humans Sarano argues for a change of mindset in which we lose ourselves in the world of the other so that each living entity human and non human can take their rightful place in the broader global ecosystem Also available as an audiobook *Sharks of the World* David A. Ebert, Sarah Fowler, 2021-07-20 Fully revised and updated Back cover **Sharks and People** Thomas P. Peschak, 2014-02-27 At once feared and revered sharks have captivated people since our earliest human encounters Children and adults alike stand awed before aquarium shark tanks fascinated by the giant teeth and unnerving eyes And no swim in the ocean is undertaken without a slight shiver of anxiety about the very real and very cinematic dangers of shark bites But our interactions with sharks are not entirely one sided the threats we pose to sharks through fisheries organized hunts and gill nets on coastlines are more deadly and far reaching than any bite In *Sharks and People* acclaimed wildlife photographer Thomas Peschak presents stunning photographs that capture the relationship between people and sharks around the globe A contributing photographer to National Geographic Peschak is best known for his unusual photographs of sharks his iconic image of a great white shark following a researcher in a small yellow kayak is one of the most recognizable shark photographs in the world The other images gathered here are no less riveting bringing us as close as possible to sharks in the wild Alongside the photographs *Sharks and People* tells the compelling story of the natural history of sharks Sharks have roamed the oceans for more than four hundred million years and in this time they have never stopped adapting to the ever changing world their unique cartilage skeletons and array of super senses mark them as one of the most evolved groups of animals Scientists have recently discovered that sharks play an important role in balancing the ocean including maintaining the health of coral reefs Yet tens of millions of sharks are killed every year just to fill the demand for shark fin soup alone Today more than sixty species of sharks including hammerhead mako and oceanic white tip sharks are listed as vulnerable or in danger of extinction The need to understand the significant part sharks play in the oceanic ecosystem has never been so urgent and Peschak's photographs bear witness to the thrilling strength and unique attraction of sharks They are certain to enthrall and inspire **My Sunset Rendezvous** Ila France Porcher, 2011-01-11 A woman who spent years studying sharks up close became an advocate for their preservation and protection **The Broad, Broad Ocean and Some of Its Inhabitants** William Jones, 1879 [Introduction to French Polynesia](#) Gilad James, PhD, French Polynesia is a group of 118 islands located in the central region of the South Pacific Ocean The islands are divided into five main groups the Society Islands the Tuamotu Archipelago the Gambier Islands the Marquesas Islands and the Austral Islands French Polynesia is also known for its coral reefs and lagoons and it is a popular tourist destination due to its beautiful scenery and warm climate French Polynesia has a rich history and cultural heritage It was first inhabited by the Polynesians who lived there for thousands of years before European explorers arrived in the 16th century The islands were later colonized by the French in the 19th century and became a French overseas territory in 1946 Today French Polynesia has a unique blend of French and
